TO ARCH STREETS WITH BIG TREES

Maps and Photographs to Show City's Hope For Future Beautification

How Harrisburg, in the future, hopes to arch its streets with trees will be interestingly shown by maps and photographs at the State Welfare and Efficiency Conference to be held in this city November 15-19. The city exhibit will be featured in connection with the State forestry conservation exhibit and City Forester Harry J. Mueller is now preparing a series of tree bark, branches, twigs and leaves, showing the various kinds of scale, tree lice, moths and other pests. Whether or not the display of this-sock and other moths can be arranged on the scale that Mr. Mueller hopes is questionable, but he has planned to give Harrisburg folks a mighty lifelike idea of some nightmarish-looking worms and things. Not the least of these are a few of the long, fat, green worms—gaudy moths in the primary stage—that boast of big red eyes and long horns. The average American youngster knows 'em more familiarly as "tobacco worms."

Use—Ugh! The city forester isn't sure yet that he can provide for this feature of the display, but if it is possible he expects to show some of these crawlers as they appear in life. The method of preserving and mounting them as described by Mr. Mueller is a trifle shivery to listen to. First, he says, the fat, bright green worm is chloroformed. Then tiny holes are bored through the skin along the spine. Then by means of a tiny thin straw-like tube the taxidermist blows out the subject's "innards." "It's just like blowing through a putty-blower," said Mr. Mueller, matter-of-factly, in describing the process. "Who'd do it? Why, I could easily do it myself," he answered casually. And he even murmured an "ugh!" When only the green shell remains, the forester concluded, it is roasted over an alcohol flame for a few minutes in order that it may become thoroughly hardened. Then the "exhibit" is inflated with air to its natural size, the tube holes are sealed—and the shivery visitor at the forestry exhibit can gaze upon a long green worm or caterpillar that looks just ready to swing from its leaf to—oh! horrors—perhaps, one's hat. In addition to the pest exhibit Mr. Mueller will devote a portion of the city display to sections of tree trunks and branches, showing proper and improper methods of pruning, trimming and treatment.

The City's Plans The proposed plan for tree planting on the streets under the city's comprehensive scale will be cleverly shown by means of a big map and colored crayons. From time to time as the present trees decay or have to be removed for some other cause the city's plan will be to replace these trees with those of the type selected and the type selected for the particular street. The various streets to be planted and the type of trees to be chosen as will be shown on Forester Mueller's map, will be as follows: Front and Cameron streets from end to end of the city and West State street; American elm; Second street, red oak; Third and East State streets, European linden; Berryhill, pin oak; Market, tulip tree; Green, Maclay, Fourteenth and some of the other cross streets, Norway maples; Eighteenth, red oak; Pine street and other highways which have more or less narrow pavements, maiden hair fern trees.

PRESENTS PILED HIGH Kioto, Nov. 11.—Cordial messages of congratulation to Emperor Yoshihito have been received from King George of Great Britain, Emperor Nicholas, of Russia, President Poincare, of France, President Yuan Shih Kai, of China, and others, while the felicitations sent by Japanese organizations fill a score of trunks. Gifts made to the Emperor are piled high in many buildings.

Passengers Did Not Know Rochambeau Was Burning

New York, Nov. 11.—Wireless messages received here from persons on board the French Line steamer Rochambeau say that the passengers on board that vessel first learned of the fire in the Rochambeau's coal bunkers when they received wireless messages from New York asking for details of the fire. The blaze was discovered when the Rochambeau was 150 miles south of Halifax on her way to Bordeaux Sunday afternoon. The messages state that discipline was perfect, that there was no excitement and that the crew fought the fire for five hours, winning the praise of the passengers.

Liberty Bell Paraded Through Frisco Streets

San Francisco, Nov. 11.—Escorted by every available United States soldier and sailor here, national guardsmen and a huge crowd of civilians, the Liberty Bell which has been at the Panama Exposition for several months was paraded through the streets to-day, preparatory to starting on the return journey to Philadelphia. From the Panama-Pacific Exposition here, the bell goes to San Diego to be displayed for several days at the Panama-California Exposition. It will then be taken to its home, Independence Hall, Philadelphia.

VICE-PRESIDENTS ELECTED

Savannah, Ga., Nov. 11.—The Atlantic Deep-sea Waterways Convention last night elected the following State vice-presidents: Frederick H. Babbit, Vermont; F. P. Crane, Massachusetts; Franklin N. Blake, Rhode Island; Ernest C. Rogers, Connecticut; William S. Bennett, New York; Chas. A. Ellis, New Jersey; Hiram R. Burton, Delaware; Joseph C. Whitney, Maryland; George Ainslee, Virginia; George T. Leach, North Carolina; W. D. Morgan, South Carolina; W. A. Bours, Florida; and Wallace J. Pierpont, Georgia.

HOW ANY WOMAN CAN DRY CLEAN

Put gasoline and solvite in a wash boiler and save five dollars.

Here's a way to make soiled or dingy-looking wearing apparel look like new. Any woman can easily clean and restore the original color and brightness to kid gloves and shoes, neckties, ribbons, silks, satins, laces, network, yokes, furs, shirtwaists, children's coats, suits, caps, woolen garments, swiss, lawn, organdy and chiffon dresses, draperies, rugs, in fact any and every thing that would be ruined with soap and water.

Get two ounces of solvite at any drug store and put it in two gallons of gasoline, where it quickly dissolves, then put in the goods to be cleaned, rub a little and out they come looking clean, bright and fresh as new. You will find nothing fades, shrinks or wrinkles, requiring no pressing. It takes a few moments to do what dry-cleaning establishments would charge five dollars or more for. It is as simple as ordinary laundering and you can't make a mistake. Any drugist will supply two ounces of solvite, which is simply a gasoline soap, and you can obtain the gasoline at any grocery or garage. Then a wash boiler or large dishpan will complete your dry-cleaning outfit. As gasoline is very inflammable, be sure to do your dry cleaning out of doors or in a room away from fire or flame, with the windows left open.—Advertisement.
