OPEN SATURDAYS UNTIL 10 P. M.

THE GLOBE

# We Planned to Overcoat the Town

This "Big Live, Progressive Store" when planning its Overcoat showing, determined to Overcoat most of the men of this town—and judging by the crowds coming here daily, we know we are succeeding.

Talk about enthusiasm—a man can't see this wonderful assortment of splendid Overcoats without "warming right up" to them. And, no wonder, never before have you seen so many fine, handsome garments gathered together in one store.

Here you can choose sterling quality Overcoats from the world's best Overcoat tailors—elegant and exclusive fabrics in just the style model you have in mind. If you want to pick your Overcoat from the largest and most comprehensive assortment and where values are always better, then

Come Here Tomorrow For That Overcoat

\$15 \$20 \$25

## There's a Suit for Every Man Here

New styles—new fabrics—new ideas of tailoring—clothes for the man who makes youthful lines the dominant note in his apparel—and dignified, comfortable styles for the conservative man. Sizes for men of every build. Wonderful assortments at

\$15 \$20 \$25

## We Have Not Overlooked the Boys Overcoats—

Every boy can choose an Overcoat here that he'll wear with pride and whose real worth will please every parent. All-wool fabrics—Chinchillas, Shaggy Shetland Cloths and Scotchly Chevots—newest style-ideas in single and double-breast models, including the new belted effects. Any boy at any age will find his Overcoat here.

\$3.95 to \$12.50

BOYS' MACKINAWs—Striking color combinations—shawl and convertible collar models at \$3.95 to \$7.50

## THE GLOBE "Dubbel-Hedder" 2 Pant Suits at \$5.00

The Suit that makes every boy a member of THE GLOBE DUBBEL-HEDDER CLUB and gives double wear and double value for the money.

## BOY'S Right-Posture Suits at \$6.50 to \$12.50

"The National Health Suit"—with a health device that will keep his shoulders back and give his lungs free play.

## The Better Kind of Sweaters at \$3.50 to \$10

Here, at Harrisburg's "Greatest Sweater Store" you'll find V-necks and shawl collar styles in Cardigan and Rope Weaves and Shaker Knit Sweaters—with inverted pockets and reinforced shoulder seams and patented buttonholes that won't rip. An exceptionally good, heavy Shawl Collar Shaker Knit Sweater is shown at \$5.00.

## Duofold—The Hygienic Underwear

Duofold is made of two fabrics—cotton and wool—knitted together with air-space between. Cotton is worn inside. The cotton absorbs excessive perspiration. The air-space dries it and the wool keeps you warm.

Shirts and Drawers, at \$1.00 and \$1.50 each.  
Men's Union Suits, at \$2.50 and \$3.50.  
Boys' Union Suits, at \$1.00.

# THE GLOBE "The Big Friendly Store"

## Young Man! You Will Appreciate This Store

This store has won much approval with the young fellows who seek the last word in apparel.

Worthy Clothes embody the very newest in fabric, model and shade—smart in appearance without being freakish—crowded with value, without being expensive.

And for these reasons our conservative models appeal in like manner to the business and professional man who wants to be stylishly dressed, yet stay within the limits of conservatism.

## Two Garments Much in Demand

Soft shaggy Shetland Overcoats, single or double breasted, form-fitting or full box back models, in grayish, greenish and brownish mixtures and overplaids, quarter, eighth, half and full lined, \$15.00  
Balkan-Norfolk Suits, in blues and blacks with neat white stripes—the popular fabric of the season—plain or pinch back models \$15.00

Then there are many other models and fabrics at

\$15, \$20, \$25

14 N. Third Street—Next Door to Gorkas' Drug Store—is the Home of Worthy Clothes

would enable it to overtake most battleships, but not battle cruisers.

A small submarine suitable for coast defense work costs in the neighborhood of 1/2 million and a sea-going submarine between a million and a million and a half.

It is in the small arms and ammunition industry that the great expansion has taken place in Bridgeport. The Remington and Union Metallic Companies have made this within the last year one of the world's great centers for the making of rifles and cartridges.

The cartridge company had one factory here. It now has nine and its capacity has been multiplied by at least that number.

The Remington Arms Company was not represented here a year ago at all, its original factory being at Ilion, New York. Ground was broken last December for what is now one of the greatest rifle and bayonet shops. It is almost complete and in partial operation. At present there are about 3,000 employees and this number is to be increased at the rate of 1,000 a month until there are 15,000. Meanwhile the company has purchased a large tract of land where it is building a whole village of model detached houses for its prospective employees. These will be rented at a nominal sum, or may be purchased at cost on easy terms. They bear no resemblance to the tinner and painter shacks of other war-boom towns. They are brick houses with porches and garden.

The man who conducted the welfare work for the employees of the Canal Commission on the Isthmus of Panama, and who is so modest that he does not like to have his name mentioned in newspapers is in charge of the welfare work here. He has organized bowling and rifle clubs, a foremen's club, provided the employees with tennis courts, conducts a mutual benefit organization for them, takes care of them when they are sick, and listens to all their grievances. He has a system of justice by which any man discharged by a foreman may appeal to him and be reinstated if the circumstances warrant it.

As all of these things indicate, there is nothing temporary about Bridgeport's new arms factory. Officers of the company state that it will continue to do a large business after the war is over, despite the fact that the greater part of its present business, and in fact its very existence are due to the war.

The confidence of these men in the future of the industry is based upon the belief that America is to displace Germany as the armorer of the world. Almost all of the nations bought arms from Germany before the war. But after the present struggle, the members of the entente, who have been her best customers, are not going to buy anything from Germany that they can get elsewhere. Then there are all the other countries that need rifles—South America, for example, and China, whose army is said to have ten different kinds of rifles, so that when a Chinese soldier wants to load his gun he sometimes has to try several cartridges before finding one that will fit.

So, with German exports cut off, and half the world against her, the American gun makers see an opportunity beyond the immediate one, and are prepared accordingly.

All of these factories are guarded with military care. A force of about 200 men is maintained in a special barracks. This is necessary not only to guard against spies and cranks, but to protect the public from explosions. Cartridge factories are compelled to keep on hand large quantities of inflammable for use in their primers. This dangerous material has to be kept wet, as it will often explode from spontaneous combustion when dry. It is stored in flimsy sheds, scattered over the large property of the company. These structures fly to pieces when the material explodes, causing much less concussion than if it were

confined in a strong building. The public is prevented from getting too near these magazines by a ten-foot barbed wire fence.

The course of industry has been rapid in Bridgeport rather than smooth. There have been more than fifty strikes in a few months. All but one of them have been victories for labor in a very short time. Shorter hours have been the principal demand in every case. Somewhat against her will, Bridgeport has become the pioneer among New England factory towns in establishing the eight-hour day, and it looks as though her example would force it upon all the rest of them.

Two entirely new arms companies have been organized here and are now building their plants while there is active trading in their stock in Wall street. A local automobile factory has orders for 3,000 cars. Every small shop in the town is busy making bullets, fuses, cartridge clips and other accessories on sublet contracts. It is the busiest year in Bridgeport history.

## How You Can Quickly Remove Hairy Growths

(Aids to Beauty)

A well known beauty specialist advises this treatment for the removal of hair from the face. Mix into a paste some powdered delatone and water, apply to hairy surface and after about 3 minutes rub off, wash the skin and every trace of hair has vanished. This method is quick and entirely safe. To avoid disappointment, however, it is well to make certain you get genuine delatone.—Advertisement.

## GOOD-BYE-ECZEMA!

## New Discovery That Stops Itching and Soon Heals Sores

There are many kinds of eczema and the new antiseptic, Ucanol, will usually heal all except one rare form. In order that people suffering with this variety may not spend their money uselessly this remedy is sold on the money-back plan, and all druggists are authorized by the laboratory to refund the price paid for Ucanol if it does not cure.

We know no other remedy more valuable than Ucanol in healing and curing the different kinds of eczema, scalds, burns, salt rheum, and all other skin diseases, even old ulcers and sores yielding to its antiseptic and curative powers.

Get 50 cents' worth of Ucanol from H. C. Kennedy and see how quickly you can bid good-bye to eczema, pimples, or any other skin trouble you may have. It stops the itching and irritation quickly and soon kills the poison germs in the skin and makes it clear, soft and free from blemish.—Advertisement.

## Clears Away Pimples

There is one remedy that seldom fails, to clear away all pimples, black heads and skin eruptions and that makes the skin soft, clear and healthy. Any drugist can supply you with zemo, which generally overcomes all skin diseases. Acne, eczema, itch, pimples, rashes, black heads in most cases give way to zemo. Frequently, minor blemishes disappear overnight. Zemo usually stops instantly. Zemo is safe, clean, easy to use and dependable. It costs only 25c, an extra large bottle, \$1.00. It will not stain, is not greasy or sticky and is positively safe for tender, sensitive skin. Zemo, Cleveland, Ohio.—Advertisement.

JOINT SESSION OF SOCIETIES  
Annville, Pa., Nov. 12.—A joint session of the Philokosmian and Clonian Literary Societies, the latter a woman's organization at Lebanon Valley College, will be held this evening in the Philos' rooms in the administration building. A literary program will be given and a social time will follow.

NEEDLEWORK GUILD EXHIBIT  
Special to The Telegraph  
Mount Union, Pa., Nov. 12.—Mount Union branch of the Needlework Guild of America has a large and beautiful display of work on exhibition in the high school building.

## MERCHANTS GIVEN WARNING ON LAWS

Secretary Patton Has Them Informed of the Way Foods Must Be Sold Nowadays

Over 250 merchants of Harrisburg, Steelton and other places in Dauphin county have been warned in the last few days against violating the State laws governing the sale of cold storage foods and of dried fruits. The work has been in charge of G. M. Felton, of Youngsville, Warren county, one of the special agents of the Dairy and Food Commissioner. This work was inaugurated by direction of Secretary Patton after he had studied the situation.

Mr. Felton has been showing merchants how they must display cold storage goods and dried fruits containing certain substances and has been explaining the laws so that they will not get into trouble. When he completes his campaign of education in this county he will go into York and Lancaster.

Similar work is being done by other agents of Commissioner Foust in other counties.

To Raise Quarantine. — Dr. C. J. Marshall, State veterinarian, announced last night that on Monday an order would be issued admitting to Pennsylvania cattle from Illinois for immediate slaughter under special permits. The cattle must be sent in sealed cars to slaughter houses with proper sidings and be under federal supervision and inspection. Dr. Marshall says that this will affect about fifteen slaughter houses.

To Plant Tree. — Governor Brumbaugh will plant a tree at Derry Church to-morrow afternoon. On Sunday he will preach in Steelton.

Dr. Snyder Dead. — A telegram was received last night by Governor Brumbaugh announcing the death of old

friends, Dr. Z. X. Snyder, one of the best known of western educators. He died at Greeley, Col., where he was head of the State Normal school. Dr. Snyder, who was a Pennsylvanian, is remembered by people at the Capitol as he was the man named by Governor Pattison for superintendent of public instruction and lost out in the big law suit, which resulted in D. J. Waller, Jr., remaining in the office. Dr. Snyder was superintendent of schools of Reading and Greensburg.

Eight Arrests. — Eight arrests of public instruction and lost out in the big law suit, which resulted in D. J. Waller, Jr., remaining in the office. Dr. Snyder was superintendent of schools of Reading and Greensburg.

Lieutenant Dropped. — General orders issued by the adjutant general's department announce the discharge of Second Lieutenant Frank Beatty of Company L, Tenth Infantry, at Blairsville. He had been absent without leave for more than thirty days.

Making Inspection. — E. B. Engle, chief inspector of the State Zoologist's division, has gone to Philadelphia to make inspections of nursery/stock brought into this State from Holland and Belgium. The shipments are mostly for forists in the eastern counties of the State.

Revenues Drop. — State revenues are considerably behind those for the last three years and it is feared that the close of the fiscal year this month will show quite a falling off in income as compared with previous years.

To Push Hearing. — Plans of the Public Service Commissioners are to push the hearing in the case of the Philadelphia Electric Company through next week and there will be no continuances. The inventory will be taken up at Philadelphia next week. It will be the biggest proposition ever handled by the commission.

WOMAN FOUND DEAD  
Special to The Telegraph  
Mount Union, Pa., Nov. 12.—Miss Katie Mackelroy, an aged woman of Barree, Pa., was found dead in her home yesterday. Death was due to heart trouble.

## VISITING THE WAR BRIDES

By Frederic J. Haskin

(Continued from Editorial Page.)

signs, for they have proved to the world that submarines are the most effective of war craft.

To-day the Lake Torpedoboot Company is more than trebling the capacity of its plant at the end of Seawall avenue. Its old yard has room for ten submarines to be laid down, while the new one, which it is building, will accommodate twenty. In addition to this, the improved shop facilities will enable it to complete the craft in a much shorter time than formerly.

The company has also purchased large areas of land, which it is draining and filling. It is prepared for an almost unlimited expansion. Simon Lake and his associates believe that the submarine has now proved itself one of the most effective weapons of war, especially for coast and harbor defense, and that there is going to be a great demand for them from every nation in the world that has a seaboard.

It is upon this assumption, and not upon war orders, that the company's expansion is based. It is in the market for foreign orders, but at present is building boats only for the United States Navy. It was given a contract for six out of the last sixteen, for which Congress made an appropriation, and it now has 12 submarines in all under construction for the American government.

Dives Straight Down  
Lake's submarine has several features which, according to Navy officials, make it superior to any other. The hydroplanes along its sides, which enable it to sink vertically and instantly, instead of doing the "Porpoise dive," are a Lake patent. So is the water-tight superstructure on top of the main hull, which gives the boat a covered deck when traveling on the surface, but is filled with water by means of valves when it submerges.

The type of submarine now being built by the Lake Torpedoboot Company has a cruising radius of 5,500 miles, at 11 knots, and a full speed of 14 knots. They are also prepared to build a sea-going submarine capable of cruising 6,000 miles, and of attaining a speed of 20 knots, which
