At a glance you'll recognize the strength of the fabrics—no starchy stiffness to hide the real quality. Patterns also, are unlike those found in the usual 50c grades—there are bright stripes; others of quiet tone; but altogether they are new and manly. Cut full, and come in a complete range of sizes.

Always the New--But Only The Accepted

In our practice of advancing new millinery creations, a different model could be presented once an hour on the average.

But hats are like novels—either "taken by storm" or forgotten from the start.

Only the creations that find acceptance with high millinery "critics" before being offered by the best of New York shops, may be found here.

—A maline brim; velvet crown; band of fur around top of crown—that's all; but it's the latest; and accepted; and a smarter model you won't find this week.
