Misery in Back, Headache and Pain in Limbs.

Dear Mr. Editor—For more than a year I suffered with misery in the back, dull headache, pain in the limbs, was somewhat constipated and slept poorly at night until I was about ready to give up. Seeing an account of the wonderful qualities of "Anuric," prepared by Doctor Pierce, of Buffalo, N. Y., I sent for a box, and before using the whole box I felt and still feel improved. My sleep is refreshing, misery reduced, and life is not the drag it was before. I most cheerfully recommend this remedy to sufferers from like ailments. Yours truly, W. A. ROBERTS.

All cigarettes are pure, but— purity alone doesn't make a cigarette SENSIBLE. We don't know of a single one of our competitors who doesn't make his cigarettes of pure tobacco. But a pure cigarette that didn't taste just right wouldn't do for you, would it? And to be really sensible a cigarette must give you more than purity and a good taste. It must be cool and friendly to your throat and tongue. And it must leave you feeling fine after smoking all day. Fatimas are not the only cigarette that measure up to all these requirements. There are other sensible ones. But Fatimas seem to have a big margin in their favor on their good taste. Otherwise they could not outsell all other cigarettes costing over 5c. You can't tell whether they will just suit your taste until you try them. At the same time, you can easily prove how sensible they are by these two tests. Most men who try Fatimas say "Good Bye!" to all other cigarettes right away. That's why Fatimas sell so fast. Why don't you try Fatimas today? TWO TESTS FOR ANY CIGARETTE The taste of the cigarette—according to a leading tobacco journal—is up to the test. But there are other qualities that you are going to look for in the cigarette. Here are a couple of tests that may help the average smoker to choose more wisely between different brands. The first test is for coolness, which means more comfort to the throat and lungs. Light any cigarette. Draw in a cloud of smoke—a small, ordinary puff is not sufficient to make this test. Hold it in your mouth for a few seconds. Hold it in your mouth for a few seconds. Let the cigarette contain a high grade of mild tobacco leaves, combined in just the right proportion, it will always feel cool and smooth both to your throat and to your tongue. If the proportions are not right and if the cigarette contains inferior grades of tobacco or hidden strands of raw, dry leaf, you will feel a hot, "sandpaper" tinkle in your throat. Test number two—How do you feel after smoking all day? If the tobacco in the cigarette includes a correct proportion of mild grades—mildly mellowed by age—and if the proportions are so blended as to give the best qualities in each of the different types of tobacco, you will be able to smoke practically whenever you feel like it through the day without feeling any effect from it. But with another cigarette in which the blend is less skillful, even though the tobacco are of the highest grade, you will find alone towards the end of the day of having "smoked too much." FATIMA was the Only Cigarette Awarded the Grand Prize at the Panama-Pacific International Exposition.
