HARRISBURG

## LYKENS MINES PRODUCE **300,000 TONS YEARLY** [Continued From First Page.]

tory here and workmen, besides help-ing to supply the needs of the country, are engaged in manufacturing tools used in the production of munitions in Italy.

### Noted For Coal Deposits

in Italy. Noted For Coal Deposits Lykens is noted for its coal depos-its and although "black diamonds" have been recovered from beneath the earth's surface for a hundred years busy for thirty-five years. Early in the nineteenth century men living in this vicinity discovered coal in Short mountain, and it was then that the in-porting of a wooden tracked railroad to Millersburg the field for distribution was widened. Coal was hauled in tast Steam locomotives came into being here in that year and the prod-uct of the mine was continued until 1848. Steam locomotives came into being here in that year and the prod-uct of the mine was conveyed in cars have twas broken at the Short mountain breaker. This continued in the agreater capacity was constructed an the swas broken at the Short mountain breaker. This continued in use until 1888 when a new breaker with a greater capacity was constructed d. These buildings and machinery were used until March, 1913, when a new substantial concrete structure, with steel pockets and modern ma-chinery, wes finished. Great Shaft Sunk

### Great Shaft Sunk

Great Shaft Sunk During 1912 a great four-compart-ment shaft, descending to a depth of 1650 feet, was started and two months ago the work was finished. This will, in the future, take the place of the four slopes used for many years in bringing coal to the surface and taking the miners to their work on the various levels. Already one of the slopes has been abandoned and as the tunnels can be built to meet the new shaft the others will not be used. 900 Fort Below See Level

900 Feet Below Sea Level

Miners in the Short mountain col-liery working at the highest point in the mines, are 1,200 feet above sea level. Those at the lowest levels are 900 feet below the level of the sea, there being a difference of 2,100 feet between the top and bottom of the mines. between the top and bottom of the

there being a difference of 2,100 feet between the top and bottom of the mines. Eeach years approximately 200,000 tons of coai are produced in this one colliery for use all over the United States. Prior to 1873 no records of the productions are obtainable but since that time more than 10,215,000 tons have been mined, and these fig-ures do not include the 65,000 tons mined annually for use in and about the colliery. **Mules That Work in the Dark** In moving coal cars from one point to another in the various tunnels and levels, mules are used and there are some of these animals which have not seen daylight for ten and twelve years. However, they are given every comfort possible and hundreds of feet below the earth's surface concrete stables, absolutely fireproof, have been built for them. D. V. Randall, who for a number of placed William Auman on January 1. The latter was promoted to the super-intendency of the minersvile, is the kin district. The laster was promoted to the super-intendency of the miners in the Shaving re-placed William Auman on January 1. The laster was promoted to the super-intendency of the Short mountain kin district. The laster was promoted to the super-intendency of the Short mountain col-liery, are taking every precaution to king district. The laster was promoted to the super-intendency of the susquehanna Coal Company op-erators of the Short mountain col-liery, are taking every precaution to liery, are taking every precaution to the susquehanna Coal Company op-

intendency of the mines in the Shamo-kin district. The Susquehanna Coal Company op-erators of the Short mountain col-liery, are taking every precaution to protect the workmen in their employ. Years ago heavy timbers were used in the construction of the various tun-nels, but now these are rapidly giving way to structural iron which is con-sidered much stronger.

### The Eagle Iron Works

The Eagle Iron Works An industry closely affiliated with the mines, is that of the Eagle Iron works, established in 1888. At this plant gray iron castings are made for the mines and are used in the pumps, holsts, boilers and all the machinery. In connection with the plant there is a well-equipped machine and repair shop. Eight men are kept busy turn-ing out work for the colliery. At the Lykens Knitting and Manu-facturing Company's plant, which ad-joins the iron works, 110 girls are em-ployed and they turn out in one day more than 550 dozen pairs of women's and men's hose of all sizes and colors. The plant is equipped with 136 knit-ting machines. Although much of the output is spinned to tablers in the

are in use besides the other necessary machinery. The machinery in the Robert P. Fisher looping factory sew shut the toes in stockings which are shipped to the plant from manufacturers in all parts of the country. Between 4550 and 500 dozen pairs are finished daily by the 20 girls in the establishment. Mr. Fisher's machinery is imported, and his desire to enlarge the plant must be an accomplishment of the future because just now he cannot get any more machinery because of the war. The concern is so busy now that many orders have to be turned down. It would have to be triple its present size to handle all the orders. The H. A. Romberger looping fac-tory employs five girls at present and takes care of the over-abundance of work in the Romberger hosiery mills in Newport, Middletown and Phila-delphia. Two hundred and sixty dozen pairs of half and infants' hose are inished daily on the dozen machines. Boxes For the Hosiery, Too

**EXPLAINS WHY MEN ARE GROWING BALD** 

ARE GROWING BALD Thousands of men are growing hald every day and don't know the reasor why. Many of them never expect to ave even what hair is left. This indeed a pity, says a her-specialist who claims that baldne? ways have an abundance of good healthy hair. Dust and dirt help to cause baldness by clogging the pores in the scalp and giving the germs of dandruf fertile ground for prolife. The dust and dirt with any pure-soap at least once in ten days and de-stroy the dandruff germs by applying every other night Parisian Suge, a de-fughtfully efficient preparation that the dust and dirt mith any pure-soap at least once in ten days and to re-trest, and invigorate the hair roots. Of course, like all successful discor-ries, Parisian Suge has been greatly fattered by imitations which makes it necessary to ask for it by name. The cost of a generous bothe is very lift. Mandation and the steady demand H.C. Kennedy always has an abundant sup-ply on hand.

> Use O'Cedar Polish One of the best things about O-Cedar is the ease with which it produces a high, lasting luster. Use it accord-ing to directions. Very little rubbing is necessary. This advantage appeals strongly to housewives, as it saves their strength in applying.

Where you have used gummy, greasy furniture pol-ishes, the proper way to treat your furniture before using O-Cedar is to wash the same with Ivory soap and lukwarm water. This reduces grease and then allows the varnish to absorb the O-Cedar Polish.

## How to Prevent Acid Stomachs and Food Fermentation

You may complain of stomach troub nd yet your stomach may be absolute ormal and healthy. The real trouble he trouble that nearly everybody ha times-is probably excessive acid stomach. You may be quite su

at times—is probably excessive acid in the stomach. You may be quite sure that this is your trouble if your food ferments, turns sour, causes beich-ing, distress after eating, etc. Excessive acid irritates the delicate lining of the stomach abnormally, causing that full bloated feeling. Thus both acid and fermentation interfere with and retard the process of digestion. The stomach wall is usually healthy and normal, but irritated almost past endurance by these foreign elements—acid and wind. In all such cases—and they comprise a great majority of any some mices culties—the first hind on a full wall is culties—the first hind in a full water form one to two tenspoonfulls of Bisur-ted Magnesia which is a remarkably effective antacid and food corrective. The excess acid will be neutralized and the food fermentation stopped limmedi-ately so that your stomach may they proceed to digest the food in a healthy, normal manner. Be sure to ask you druggist for Bisurated Magnesia rathes than Magnesia in any other form.—Ad-vertisement.

Are You Weak, Nervous **Exhausted**?

Don't feel like working, everything go-ing wrong? Digestion poor, blood im-poverished, cannot sleep? Dr. Emerick's Body Builder a Reconstructive Tonic, is prescribed by the famous Dr. EMERICK for these conditions. Valuable after a severe sickness. Price \$1.00, prepared by the Dr. M. L. Emerick Co., Ridgway. Pa Sold in Harrisburg at Gorgas' Drug Store.
