BREAKS A COLD IN A FEW HOURS

"Pape's Cold Compound" is the Surest, Quickest Relief Known—It's Fine!

Relief comes instantly. A dose taken every two hours until three doses are taken will end grippe misery and break up a severe cold, either in the head, chest, body or limbs.

stops nasty discharge or nose running, relieves sick headache, dulness, feverishness, sore throat, sneezing, soreness and stiffness. Don't stay stuffed up! Quit blowing and snuffing! Ease your throbbing head! Nothing else in the world gives such prompt relief as "Pape's Cold Compound" which costs only 25 cents at any drug store.

Albert Long Dies From Pneumonia at Lewistown

Lewistown, Pa., Jan. 25.—After only about eight days' illness with grip and pneumonia, Albert B. Long died at

EYE SPOTS

floating specks, blurred vision, pains in the eyeball, heaviness of the lids, soreness, yellow tinge to white of eyes, all originate in liver or stomach disorder.

SCHENCK'S MANDRAKE PILLS

afford almost instant relief and fortify the system against recurrence of these distressing ailments. They tone the liver, purify the stomach, regulate the bowels, cool the blood.

12 Doses For Headaches 36 Doses

I have tried so many remedies for headaches and none proved as satisfactory as the Caf-a-so Anti-Pain Tablets. I would advise all who suffer with headaches and neuralgia to try them. I think they have no equal.

MRS. W. H. ZEHRING.

Carefully Treat Children's Colds

Neglect of children's colds often lays the foundation of serious lung trouble. On the other hand, it is harmful to continually dose delicate little stomachs with internal medicines or to keep the children always indoors.

TWO POSTMASTERS NAMED

Marietta, Pa., Jan. 25.—Harvey M. Bard, of Denver, and Warren S. Buch, of Litzitz, have been named as postmasters of their respective towns by President Wilson.

VICK'S VAPORUB SALVE

Plenty of fresh air in the bedroom and a good application of Vick's "Vap-O-Rub" Salve over the throat and chest at the first sign of trouble, will keep the little chaps free from colds without injuring their digestions. 25c, 50c, or \$1.00.

Buy GOOD Coal & LESS Coal

The better the coal you buy—the less you have to buy—and the less you have to buy, the lower becomes your aggregate coal expenditure.

WHAT HAPPENED TO JANE

By Virginia Terhune Van de Water

CHAPTER XL

"I will be honest with you, Ruth," Jane began in reply to her companion's challenge. "I have a cold heart, she appreciated that she could not tell her friend the whole truth unless she were to acknowledge her husband's pecuniaries. Well, she must do the best she could by way of explanation.

"I want to be on the same old terms with you and the other girls," Jane mustered up a weak smile. "You know we've gone about together since we were little kiddies. I do want your friendship."

"To be truthful, Ruth, I could not afford to have a regular wedding, with guests, and somehow I did not want any fuss. So I just got married quietly. I hope you understand?"

"I told you just now that was your business, not ours," Ruth reminded her. "And I told you, too, that we girls realized that. But your manner on the train that day, and the way you've kept away from us ever since—well, it's hard to understand."

"As to that day on the train," Jane made another effort to explain. "I was glad to see you, whether I showed it or not. But—Augustus was so full of getting home that he hardly understood how much I wanted you to come to see me, and so when you head! Nothing else in the world gives such prompt relief as 'Pape's Cold Compound' which costs only 25 cents at any drug store."

"Why haven't you had any of the other girls come and see your new home?"

"This was a poser, for Jane must be loyal to the man she had married. 'Why—why—' she stammered. 'You see Augustus has felt that I ought to stay at home and give all my time up to getting used to his house just at first. But now that I've been doing lately.'

"But he has a housekeeper he's had for years," Ruth asserted. "I know," Jane tried to laugh, "but home until I got accustomed to her and to the way he wants things done. So, really, I haven't been anywhere. Why, I haven't been to another's nearly as often as I'd like to go."

"She told me you'd hardly been there at all," Ruth rejoined. "And that seemed queer, too—and not a bit like you, Jane, and in his grasp."

"Well, you understand now, don't you?" Jane urged. "Please say you do!"

"She took Ruth's hand in hers. The familiar handclasp did more to sweep away the barrier between the pair than all their words had done. Ruth determined to give Jane another trial and to persuade the other girls to do the same."

"That's all right, Jane," she assented. "Let's forget our little misunderstandings—shall we? And I'll tell the others that you want them just like they used to be. But you must run in and see us. Of course I suppose it's our place to come first—so if you don't mind I'll start the fashion by coming over to-morrow afternoon, rather late."

"You know I have a new position, in an office in Pattonville, as stenographer and typewriter, but I get half pay. Suppose I come over to-morrow afternoon about five? Will that be all right?"

"You must stay to supper," she said. "I'd love to!" Ruth accepted cordially. "And I'll tell all the rest that you're going to let them know when you can come and see you, and that you must run in often, just that you'll do the same. It's a bargain, isn't it?"

"Yes," Jane agreed.

"The Boys Find Them" The door leading from the church into the gullroom opened, and a stream of light flowed in. Leaning over the choir rail, the girls saw John Ormsby and Dick Guilford peering up at them. Tom was Ruth's most devoted admirer, and Dick was his chum.

"Hello, girls!" Tom greeted them. "The light showed us who you two were. Besides that, I saw you both sneak off in here."

"They came strolling up the stairs to the loft," "Hello, Jane!" Tom said. "Glad to see you in our midst again," Dick added.

"Ruth laughed happily. 'Yes, she's one of us once more,' she said. 'And when she is married she wants to be as good friends with us all as ever.'"

"Indeed I do!" Jane exclaimed. Then, she remembered her husband. "I must be going," she announced.

"The light showed the girls down the stairs to the body of the church. Here it was still so dark that Tom did not relax his hold upon Ruth's hand. Dick Guilford, after the manner of his kind, held Jane's elbow in his grasp as he pitched her through the obscurity towards the gullroom."

"As they approached, the door was suddenly opened from the other side, and Jane, with a start, saw her husband stood in the entrance. The light from the gullroom fell full upon her as she halted, Dick Guilford close to her, his arm in his grasp."

USING CORDUROY FOR HOME GOWNS

Soft and Pliable Material Makes Up as Well as the Lighter Silks

By MAY MANTON

8914 (With Basting Line and Added Seam Allowance) Dressing Gown, Small 34 or 36, Medium 38 or 40, Large 42 or 44 bust.

This is one of the most tempting negligees for winter wear that can be offered. It is made of corduroy in a charming shade of pink and trimmed with white broadcloth while the lining is of silk.

It is one of the most comfortable possible garments to wear. It is so pretty that it is a perpetual temptation to rest and relaxation and withal, it is so graceful and attractive that one need not hesitate to receive an intimate friend while wearing it.

It is very simple and easy to make, also, for the sleeves that are sewed to it at a long shoulder line require no fitting and there are only the shoulder and under-arm seams to be sewed up. The patch pockets near real comfort and convenience. The belt confines the gown at the waist and the folds and lines so formed are extremely attractive.

As a matter of course, other materials can be used. Flannels of various weights are liked for garments of this sort. Cashmere is pretty and the silks are very appropriate, but the corduroy is in the height of fashion and it is much to be commended.

For the medium size will be needed, 8 yards of material 27 inches wide, 6 1/2 yards 36 or 5 1/2 yards 44, with 1 yard 36 inches wide for the collar, cuffs and belt.

The pattern 8914 may be had in three sizes, 32 or 34, 36 or 38, 40 or 42. It will be mailed to any address by the Fashion Department of this paper, on receipt of ten cents.

TRY THIS FAMOUS HAIR TONIC FREE

It Won't Cost You a Cent if It Doesn't Stop Falling Hair and Eradicate all Dandruff, Says H. C. Kennedy

Right away, to-day if possible, we want you to try one of the most delightful, refreshing and invigorating hair tonics the world has ever known.

Understand this is not a hair color or a dye, but a real genuine worth while tonic called Parisian Sage.

If you have dandruff and Parisian Sage doesn't remove every trace of it—money back from your druggist.

If your hair is falling or you have terrible scalp itch, Parisian Sage will stop both or money back.

There isn't any two ways about it; Parisian Sage is one of the finest hair preparations in the world, and nearly every druggist without an axe to grind will tell you so.

It aims to prevent baldness by putting life and nourishment into the hair, and the first application makes your head feel so good that you will at once realize why we are so enthusiastic about Parisian Sage.

THE RISE OF GASOLINE

By Frederic J. Haskin

[Continued from Editorial Page.]

develop several substitutes. As the world's leading gasoline producer, the United States feel the effect of this state of things in a greatly increased export business. The exports have jumped from an annual 100,000,000 gallons before the war, to a figure between 200,000,000 and 400,000,000 gallons a year to-day. These latter figures represent from 20 to 40 per cent of our total production, and alone explain quite a rise in price.

The normal domestic demand for gasoline, also, increases at a surprising rate, as we add daily to our 2,250,000 automobiles, our 700,000 internal combustion engines and our 300,000 motor-boats. Each week the domestic consumption of gasoline is approximately 50,000 gallons greater than it was the week before. Such increased demand at a time of shortage is quite a factor in raising prices, though under ordinary conditions it might only stimulate the search for new wells.

The third cause of the current high price, and perhaps the most important of all, is the falling off in the flow of gasoline-bearing crude oil. This factor is likely to be overlooked because the net production of crude oil for the year 1915 is estimated by the Geological Survey to be slightly greater than that of the record-breaking output of 1914. All crude oil is not alike, however. From some of it a high percentage of gasoline can be extracted, and from other grades practically none. The 257,000,000 barrels of oil produced in 1915 had considerably less gasoline-bearing crude oil in them than the 265,000,000 barrels in 1914.

The most sensational development in the 1915 oil business was the rise and decline of the famous Oklahoma. At its best, Cushing flowed daily 300,000 barrels of high-grade crude oil rich in gasoline. Cushing alone

was largely responsible for the low-priced gasoline obtainable in the latter months of 1915. Now, however, the flow has fallen off rapidly, and Oklahoma is being explored in all the corners for a successor to the Cushing field. Down in Carter county they have developed the so-called Heathton pools until it is fast taking the place of Cushing so far as mere quantity goes; but the Heathton oil is not as good a source of gasoline as was the Cushing. This same objection applies to many of the new oil strikes, both in the West and in the Gulf region. They are fuel oils rather than gasoline oils.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. Dr. EMERICK for these conditions. Valuable after a severe sickness. Price \$1.00, prepared by the Dr. M. L. Emerick Co., Ridgeway, Pa. Sold in Harrisburg at Gorday's Drug Store.

How To Make the Quickest, Simplest Cough Remedy

Much Better than the Ready-Made Kind and You Save \$2. Fully Guaranteed.

This home-made cough syrup is now used in more homes than any other cough remedy. Its promptness, ease and certainty in conquering distressing coughs, chest and throat colds, is really remarkable. You can actually feel it take hold. A day's use will usually overcome ordinary cough—relieves even whooping cough quickly. Splendid, too, for bronchitis, spasmodic croup, bronchial asthma, and winter coughs.

Get from any druggist 2 1/2 ounces of Pinex (50 cents worth), pour it in a pint bottle and fill the bottle with plain granulated sugar syrup. This gives you a cost of only 54 cents—a full pint of better cough syrup than you could buy for \$2.50. Takes but a few minutes to prepare. Full directions with Pinex. Tastes good and never fails.

You will be pleasantly surprised how quickly it loosens dry, hoarse or tight coughs, and heals the inflamed membranes in a painful cough. It also stops the formation of phlegm in the throat and bronchial tubes, thus ending the persistent loose cough.

Pinex is a most valuable concentrated compound of genuine Norway pine extract, rich in quinine, which is so healing to the membranes.

To avoid disappointment, be sure and ask your druggist for "2 1/2 ounces Pinex," and don't accept anything else.

A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Ft. Wayne, Ind.

CLIP THIS COUPON FOR The American Government AND The Panama Canal

BY FREDERIC J. HASKIN. The Books That Show Uncle Sam at Work.

The Harrisburg Telegraph

HOW TO GET THESE TWO BOOKS FOR 98 CENTS—Cut this coupon from this paper, present it at our office with 98 cents, to cover the cost of production and distribution, and the set is yours. Fifteen cents extra by mail.

SOME FACTS ABOUT THESE BOOKS—Both are the same size and bound exactly alike in heavy cloth. Each has about 400 pages, printed on fine book paper. Both are profusely illustrated with official engravings, drawings and maps.

TO OUR READERS—We are distributing these patriotic books solely because of their great educational merit and our belief that they should be in every American home.

Stock Transfer Ledger

The Pennsylvania Stock Transfer Tax Law (Act of June 4, 1915) which is now in effect requires all corporations in the State, no matter how large they may be to keep a Stock Transfer Ledger. We are prepared to supply these Ledgers promptly at a very nominal price.

FOODS

THEY BUILD OR DESTROY

Amazing but Rarely Suspected Truths About the Things You Eat.

(Copyright, 1916, by Alfred W. McCann.)

CHAPTER 12 Self-flattery does not compensate for the annual deaths of nearly 400,000 children under ten years of age die in the homes of our nation in one year, what is to be said about the living, those who still maintain the minimum of vitality necessary to keep them from crossing the line?

When the grim reaper Death holds out his scythe and his attendants—Disease and Pain—do in the field of humanity? The evils that resulted in the deaths of nearly 400,000 children in the United States during one year had some effect, surely, upon those children whose vitality was still a little too vigorous to surrender completely as the occupants of their white caskets had done before them.

What is the effect of those evils? What is the actual condition of the school children of the present day? All over America and in every public school children are being examined by physicians in search of disease. Half the children in a school in the slums of Leeds were found by Dr. Hull to be suffering from rickets as a result of general systemic disorder brought about by insufficient food of the right kind or an abundance of food lacking in nutritive value.

Of such food such may be adequately described as foodless food, there are tons now being consumed by the school children of America. If the consumption of such food is followed by results prejudicial to the health of the little ones we must know what those results are.

Of 10,500 school children the British Dental Association found 8 per cent suffering from defective teeth, the result of a diet lacking in the mineral

elements upon which the bones and teeth depend for their existence. Those who refuse to accept this statement as fact deal with the results of the experiments of Dr. Geis at Columbia University in his analysis of the mineral content of defective teeth.

In the Dundee schools 50 per cent of the children were found to be suffering from defective vision. Dr. Gallivan, chief of the division of child hygiene of the Boston Board of Health.

The school physicians under Dr. Gallivan examined 42,750 children and only 14,957, a little more than one-third, were found to be in a condition that could be called healthy; 27,793 of the children examined were defective in one or more of their teeth, 9,738 cases of diseased tonsils, 3,599 cases of skin diseases, 575 cases of rickets, and 1,611 cases of malocclusion.

The Bureau of Medical Research reports that "in rural as well as in city schools nearly one in three have trouble with the eyes; nearly one in four has defective vision because of abnormal growths in their eye passages, besides many who are obviously predisposed to tuberculosis and nervous debility."

At the annual meeting, June, 1913, of the Second District Dental Society of New York, Dr. A. Freedman Foot reported on the work done by the New Municipal Dental Clinic of New York City, which has been operating since the first of January, 1913.

Up to that time 1,694 children in New York City had been registered in the district, two of which are in Manhattan, three in Brooklyn, and one in the Bronx.

Of these 1,694 school children only 400 were found to possess normal teeth. Dr. Foot's report, which was alarming in the extreme, stated: "The six-year molars of nearly every child were broken down wholly or in part, and in a great many instances the molars were decayed through the gums. Where it was not already too late these molars were drilled and filled with gutta-percha."

"At the lowest estimation more than 60 per cent of all the children examined possessed defective teeth. In many instances the defects were so extensive that the children were in need of a restorative treatment, even if it could have been applied, would have been of little value."

Well, indeed, may this report ask the question, "What will be the future health chances of such children?" Are they to be useful to society or a drag upon the race? How does it look to you?

The American teeth of to-day are among the poorest on earth, in spite of the fact that the diet of the American people is said to contain a greater variety of foods than that found in any other nation of the world. Alas! such flattery does not compensate for the annual deaths of nearly 400,000 children under ten years of age in the United States alone.

Dr. T. Van Winkle, of the Department of Health, examining the teeth of 231,981 New York City children outside the dental clinics, found 131,747 defective. A special examination of the teeth of 500 school children between the ages of fourteen and sixteen selected at random revealed 486 defective cases.

In this respect the discoveries of Dr. Geis concerning the mineral deficiencies of our children will receive attention in their proper place. We are now moving rapidly, but we must not go too fast.

AN OLD PROVERB

It used to be proverbial that every man (and it is certainly no less true of woman) is either a fool or a physician at forty. This means that every intelligent person must learn so much about his own body that he can be useful to society or a drag upon the race? How does it look to you?

Why, then, is there so much talk by doctors against "medication"? A woman can recognize all ordinary ailments without calling on a doctor. If they are ailments distinctive to her sex she generally knows enough to use that greatest of all remedies for such ailments, Lydia E. Pinkham's Vegetable Compound, and likewise she is familiar with the standard remedies for other diseases.—Advertisement.

OLD SORES, ULCERS AND ECZEMA VANISH

Good, Old, Reliable Peterson's Ointment a Favorite Remedy.

"Had 51 ulcers on my legs. Doctors wanted to cut off leg. Peterson's Ointment cured me."—Wm. E. Nichols, 40 Wheeler St., Rochester, N. Y.

Get a large box for 25 cents at any druggist, says Peterson, and money back if it isn't the best you ever used. Always keep Peterson's Ointment in the house. Fine for burns, scalds, bruises, sunburn, and the surest remedy for itching eczema and piles the world has ever known.

"Peterson's Ointment is the best for bleeding and itching piles I ever found."—Major Charles E. Whitney, Vineyard Haven, Mass.

"Peterson's Ointment has given great satisfaction for Salt Rheum."—Mrs. J. L. Wells, Cuylerville, N. Y.

All druggists sell it, recommend it.—Advertisement.
