#### SAYS HOT WATER WASHES POISONS FROM THE LIVER

Everyone should drink hot water with phosphate in it, before breakfast.

To feel as fine as the proverbia fiddle, we must keep the liver washed clean, almost every morning, to prevent its sponge-like pores from clogging with indigestible material, sour bile and poisonous toxins, says a noted physician.

If you get headaches, it's your liver. If you catch cold easily, it's your liver. If you wake up with a bad taste, furred tongue, nasty breath or stomach becomes rancid, it's your liver. Sallow skin, muddy complexion, watery eyes, all denote liver uncleanliness Your liver is the most important, also the most abused and neglected organ of the body. Few know its function or how to release the dammed-up body waste, bile and toxins. Most folks resort to violent calomel, which is a dan-erous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks

accumulates in the tissues, also attacks the bones.

Every man and woman, sick or well, should drink each morning before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

stomach.

Limestone phosphate does not restrict the diet like calomel, because it can not salivate, for it is harmless and you can eat anything afterwards. It is inexpensive and almost tasteless, and any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshers the liver keeping your feel freshens the liver, keeping you fee ing fit day in and day out.—Adv.

Congressman William S. Vare, of South Philadelphia, last night launched a Newspaper dispatches from Philadelphia yesterday declared that it has been definitely learned that the Pennsylvania Steel Company is not to be in the big \$25,000,000 merger now said table in the making.

The stories probably started when it was learned that the options now held on a controlling interest of the Cambria Steel company options now the control of three men being mentioned for the committee.

Interest in this year's appointment is more than usual because of the number of candidates; the names of three men being mentioned for the chieftaincy. Apparently there is no contest on for the places as assistants. John E. Shupp, Jr., the present chief of the department, is a candidate for reappointment and is understood to have the backing of a number of councilmen. Shupp is a member of the Baldwin Hose Company and was a former vice-president of the State Firemen's Association.

In O. A. B. Malehorn, president of the Hygienic Hose Company, Shupp will have a strong opponent, so at least it has been intimated in municipal circles. statement is the opening gun of a fight for control of the Republican State committee.

Mr. Vare said in his statement:

"The Republican party is confronted by a situation which must be squarely met and dealt with for good or for bad when the Republican National Convention assembles in Chicago next June. In my judgment the paramount consideration which the delegates to that convention must keep in mind is the nomination of a candidate for President and the adoption of a platform which will not only meet with the approval of those Republicans who have remained steadfast in the party ranks, but of the Progressives who have returned to the party as well as those who are still outside the breastworks.

"Republican victory, so vital to the welfare of the country, depends upon Republican unity and that unity can be accomplished through the nomination for President of a man whose record is in harmony with the kind of platform which will satisfy Republicans and all fair-minded progressives.
