When it came to creating Kaulton the company found the housing problem to be more than the scattering of some shacks, as the company, like many others, had done in the past; the problem was found to be one of town planning, and most of the principles of city planning applied, although in a minia-Therefore, just as the company would study various arrangements and details of its plant, employ skilled designers to determine exactly what it wished accomplished, would make plans and do all figuring on before one cent would be ually expended on construction, so also with the housing it employed the also with the housing to those who had made a life's traction company study of the work, determined the advantages to be gained and how best to

In building its town the Kaul com pany was not restricted or directed by There are as yet practically no national or State laws regulating the planning of proprietary towns; it is still a matter of individual license. The day in the Messiah Lutheran Church Kaul company approached its problem under the law that unselfishness is generally far-sightedness. It directed greatest energy in securing a scientific and beneficent physical town plan, realizing that a physical foundation was essential to an efficient system of cial and financial town management. The employes are enjoying the benefits of wholesale co-operative methods, the prize system and thoughtful supervision are stimulating best social life, and these are made possible and effective by the scientific and attractive physical foundation laid down. The result has been a tow nof pleasant and sanitary houses, good to look at, well civic centers, playgrounds and all else that goes to make life pleasant in a municipal way.

is bound to show itself in the national No home life can thrive under poor housing conditions. The man who rents an unsanitary, ill-ventilated, badly-lighted house as a dwelling place is an offender not only against the more or less helpless poor, but against the very life of the nation itself. The desire to make small investments yield big incomes is responsible for the slum district of every town that has one, and that it is responsible also for sickness, high death rates and the breeding of criminals we know; but it is not generally understood that the slum, with its low assessment and high rentals, is robbing the thrifty taxpayer, for the reason that the owner of the shanties that go by the name of dwell-

A great peril due to improper hous ng conditions is the nomadic family life engendered by apartment house conditions. Less than 11 of every 100 not encumbered by mortgages. Families are packed away in bandbox-like apartments; houses that resemble

and sunlight in proportion. Every step that the City Planning commission takes in the way of enouraging proper real estate develop-nent is a step toward a better city Every effort looking toward better living conditions in Harrisburg is one for the betterment of family life, and as family life is the strength or weakness regard the work of our planning com mission and others like it as of far more than local importance—in short, as a part in the program of national "preparedness" on which so much stress is being laid at this time.

A proper staking of the width to be west side of Front street would facilitate the parking of that section during the winter and early Spring. If the Department of Parks is to avoid some mistakes of the past, when dumping of earth was permitted at the foot of sev eral streets far beyond the width finally adopted for the walk along the western side, lines must be given now so that the city can have this filling done at It is a reflection on the fathers little or no expense when the dirt is

CHURCH ADVERTISING

JNDER the caption, "United Church Advertising," there appeared the following last Sun-

All members of Messiah Lutheran Church are urged to not only watch the united church advertisements appearing every Saturday evening on the church page of the Harrisburg Telegraph, but that they recommend them to their friends, especially those whom they know are not affiliated with any church of the city. These advertisements are in nature non-denominational and non-sectarian and have exerted a mighty influence in the city. It is one more very definite instance of the forward work of the church in winning more people.

The Telegraph has long believed in church advertising. It is happy to have been the medium through which the experiment has been tried out in Harrisburg and it is pleased to have this acknowledgment from so high a source.

"What is the best new book?" he inquired.

Not having written one myself, I couldn't guarantee a correct answer. But did that discourage him? Oh, no! "I find," said he, "that rereading those favorite tales of one's boyhood—Scott, Cooper, Defoe, Irving—brings just about as many thrills as it used to do. That must be why they are really great books and good literature."
