CARLISLE STANDS HIGH ON INDUSTRIAL LIST

[Continued From First Page.] and with the announcement that spring and summer hats will be carried with ribbons the two silk ribbon industries are producing capacity output. A silk weaving plant, where the silk taken from the cocoon of the silk worm in China is spun into tiny threads to be used in the manufacture of silk goods, is also an important industry in Carlisle. Carpets and rugs are other important outputs, so that the weaving industry here has put Carlisle in the column of weavers. But then, again, there are the shoe factories, noted all over the country for the quality of goods produced, and iron works where the outputs are known far and wide. Many autoists who are compelled to use chains to prevent skidding in this season of the year are indebted to the use of iron works where the outputs are known far and wide. Many autoists who are compelled to use chains to prevent skidding in this season of the year are indebted to the use of iron works where the outputs are known far and wide.

Every section of Carlisle is just as busy as can be and her modern stores and business houses are real places of interest to many persons who have known the town because of its colleges and Indian school, but now the borough has taken its place in the business world and hereafter must be known by its industrial as well as its educational activities.

The Chain Works

The Standard Chain Works, which has been in existence for more than forty years, is another interesting place. Seventy-two fires are in use and about a hundred men are given employment in the plant. Chains of all descriptions and for all kinds of uses are made here. The works are present the big force is busily engaged in the output of automobile chains. Each of the men at the fires turn out their own chains, and the length and weight of the chains are measured by a single chain which will measure more than a mile.

The Cooper Heating Plant

The Cooper heating plant is one of the town's smaller industries, but it is always busy. The plant does welding by various processes and manufactures heating apparatus used in cars.

The Frog and Switch Works

The Frog and Switch Manufacturing Company, with its 240 employees, is working night and day getting out orders from railroad companies in all parts of the country. The war has benefited this plant because many iron and steel concerns have engaged in the manufacture of shrapnel and plants which have not taken up the manufacture of munitions have had much additional work to do. At the present time the company is willing to employ all of the experienced men it can get. These and other concerns are being manufactured for railroad companies in all parts of the country. In addition the company operates its own manganese plant and the product from

FOOD FACTS

What An M. D. Learned. A prominent physician down in Georgia went through a food experience which he makes public: "It was my own experience that first led me to advocate Grape-Nuts food; and I also know from having prescribed it to convalescents and other weak patients that this food is a wonderful restorer and restorer of nerve and brain tissue, as well as muscle. It improves the digestion and patients gain, just as I did in strength and weight, very rapidly. "I was in such a low state that I had to give up my work entirely and go to the mountains, but two months later I was able to resume my work. It was not quite as well as when I left home. My food did not sustain me and it became plain that I must change. "I began to use Grape-Nuts and in two weeks I could walk a mile, and in five weeks returned to my home and practice, taking up hard work again. Since that time I have felt as well and strong as I ever did in my life. "As a physician who seeks to help all sufferers I consider it a duty to mention these facts publicly. "Trial 10 days on Grape-Nuts when the regular food does not seem to sustain the body will work wonders. "There's a Reason." Name given by Postum Co., Battle Creek, Mich. Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Plant is owned by the Indian Rug Company, where twenty men are kept busily engaged turning out rugs woven after the style of those made by Indians. Old carpets are used in the manufacture of the rugs and the product finds sale in all parts of the United States. Two hundred square yards of rugs are considered a fair day's output at this plant. The shoe industry is among the largest of Carlisle's business enterprises and daily thousands of pairs of shoes are shipped to retail dealers in many sections of the United States. The Lindner Shoe Company is the largest in the town and has been in existence for about twenty-five years. The company manufactures women's shoes of the finest grades and about 2,000 pairs are finished daily. Many shoes sold in Harrisburg are the product of this plant. As the company's business grows, additions are built to the factory, and at the present time a new building is being erected. To take care of the present increase there are 750 men, women, boys and girls employed in the factory at the present time and if general business conditions continue for about twenty-five years, the force will likely be increased. The Bedford Shoe Company is another busy plant and the entire force there is engaged in the turning out of a product which is shipped to all parts of the country. The Carlisle Shoe Company employs a force of 25 in the manufacture of women's and men's shoes. The day's production ranges from 700 to 1,000 pairs, according to the season's business. The management of the plant has noted a big increase in business this year over last and the plant's prosperity is attributed to the general business conditions all over the country. The Carlisle shoe industry is one of the troops directly benefited by the war in Europe and of course indirectly the benefit is felt here. The concern at Carlisle is taking all the help it can get. Rubbing Cant Reach RHEUMATISM

YOU MUST GO BACK OF THE PAIN AND CURE THE CAUSE OF IT FIRST.

If you suffer from rheumatism in any of its forms, your first step towards health must be to purify your blood. Start now taking S. S. S. according to directions. Our laboratory is the best equipped of its kind in the world. We have facilities for extracting the medicinal qualities from herbs and roots and ageing them—possessed by no other concern. Rubbing the sore spot with oils or liniments brings a certain amount of temporary relief, but the disease is still in the system—and the pain will come back again. Rheumatism is poison in the blood. That poison must be removed before the disease can be cured. The wonderful successes attending the use of S. S. S. in cases of rheumatism are due to the fact that S. S. S. goes right to the source of the trouble. It acts directly on the blood—purifies the blood and removes the poison that is the cause of rheumatism. Don't be satisfied with anything but the genuine.

S. S. S. is not a drug—it is purely vegetable. It is Nature's own remedy—the blood purifying properties extracted from native roots and herbs. S. S. S. has been known for half a century as a blood purifier, and for diseases arising from impurities in the blood. Druggists all over the Country carry it in stock—and can get it for you without delay.

THE SWIFT SPECIFIC COMPANY :: ATLANTA, GA.

This is used in the manufacture of the frogs and switches. The excess product is sold to other companies in the East. The paper box factory of Zang & Co. is another busy place and the 15 employees there are working steadily turning out about 5,000 boxes daily which are used by shoe factories in Carlisle and hosiery mills located along the main line of the Pennsylvania Railroad Company. The plant has been in operation about twelve years and for the past three years has been under the present management. Business is reported to be much better in this factory than it was a year ago. Carlisle is one of the thriftiest towns in the country and aside from her industries takes great pride in public improvements. During the coming summer North Pitt street, from the Cumberland Valley station to the freight tracks, a distance of about 2,000 feet, will be paved with brick. This in addition to the paving already completed will give Carlisle about three miles of paved streets. Movements are on foot, too, to pave other streets in the borough during the coming summer, but as yet no streets, except North Pitt street, have been decided upon definitely.
