James H. Brenner UNDER PRICED STORE 16 SOUTH FOURTH ST.

SELL BANK STOCK Thirty shares of Security Trust Company stock were sold at \$32 per share and ten shares of Harrisburg National Bank stock were disposed at \$62 apiece at an auction yesterday on the Courthouse steps. Three shares of Peoples' Bridge and a number of First National stock were not sold because the bids were insufficient and the sale adjourned until a later day.

Saved Her Life The unqualified endorsement of Fruitola and Traxo in a recent letter from Mrs. S. Grindle, 5215 Mizouette St., Pittsburgh, Pa., will be of interest to other sufferers from stomach and intestinal troubles. Mrs. Grindle says: "The doctors had given me up, saying the only hope left was an operation. I tried Fruitola and passed hundreds of gall-stones with the first two bottles. Am now feeling better than I have for years past. I will be glad to tell any sufferer how it has helped me, for I owe my life to it."

Want a Rosy, Peachy Complexion? Drink Hot Water Every Morning!

Sparkling and vivacious—merry, bright, alert—a good, clear skin and a natural, rosy, healthy complexion are assured only by pure blood. If only every woman could be induced to adopt the morning inside bath, what a gratifying change would take place. Instead of the thousands of sickly, anaemic-looking women and girls, with pasty, sallow, lifeless or muddy complexions; instead of the multitudes of "nerve wrecks," "rundowns," "brain fags" and pessimists we should see a virile, optimistic throng of rosy-cheeked people everywhere.

OF INTEREST TO THE WOMEN

WHAT HAPPENED TO JANE

By Virginia Terhune Van de Water

CHAPTER LXI (Copyright, 1916, Star Co.) Mary Baird remained in the desolate Reeves home. She had returned here after the funeral as if it were the natural thing for her to do. She must have strong nerves, declared her neighbors, or she would never have gone back to that dreadful place. Yet, what else was there for her to do? It was her home at least until matters were settled about the estate. Mary Baird's manner was not such as to encourage questions. It was not strange that she should appear grave and stern. She had lost her best friend, the villagers said. Nobody knew what would happen to her in the future—unless Augustus Reeves had left something to her in his will. It would have been a kind thing for him to do.

MATERIALS USED IN COMBINATIONS

Figured Crepe Over a Plain Harmonizing Shape Is Most Attractive

By MAY MANTON

This is a very smart little frock, also it is a simple one. Mothers who are making dresses in readiness for the warm weather will find it a real boon for while it is quite appropriate for the wool materials it is really ideal for those of the summer. In the picture, a plain blue crepe is combined with figured crepe, but one could use a figured linen with a plain and for the frock of immediate wear challis would make a pretty effect with taffeta. The two materials combine satisfactorily and are much in vogue.

DELVE IN DUSTY TOWNSHIP FILES

Rush-East Hanover Boundary Commission Adjourns Until March 18

After delving into dusty files, poring over yellowed maps and papers, the commission recently appointed by the Dauphin County Court to rearrange the boundary lines between Rush and East Hanover townships yesterday adjourned until March 18, when testimony will be heard. The commissioners are Warren Daniels, John A. Gies, and Lev Miller and they put in most all day in the prothonotary's office and record vaults.

James G. Miles in New Job.—James G. Miles, formerly clerk in the city treasury, yesterday began his new duties as deputy register of wills, succeeding Charles W. Rubendall. No successor has been chosen by City Treasurer Oves for Mr. Miles.

Soft Coal Miners and Operators Near Agreement

New York, March 1.—Soft coal miners and operators from the Middle West were close to an agreement today on the principal points in dispute in arranging a new wage scale to go into effect the end of this month. Only a cent or less per ton stands in the way of arriving at a settlement of the mine run and tonnage increase demands.

CIVIL WAR CLAIMS PRESSED

House Authorizes Consideration of Demands Aggregating \$500,000 Washington, March 2.—After a series of hot exchanges among a half dozen representatives over principles involved in reimbursement of citizens of the Southern States for property seized by the Union troops during the Civil War, the House yesterday passed a bill to restore the right of the Court to consider claims of such reimbursement aggregating \$500,000. An amendment adopted would require claimants to show proof of loyalty to the Union.

STATE'S FORESTS EARNING MONEY

Result of the Forestry Department Program Is Favorable to the Schools

The Department of Forestry issued today a summary of work accomplished on the State Forests to date, tabulated from reports made by its foresters. The summary gives an outline of the huge amount of improvement work actually done on the land, but also points out the need for increased effort if the forests are to be brought up to standard in a reasonable length of time.

With these sums, almost 4,000 miles of roads, trails, fire lanes, and boundary lines have been opened; 2,700 miles of boundary line have been surveyed; 2,327 per acre, 10 observation towers have been built for the purpose of locating forest fires, and 250 miles of telephone line constructed to connect the towers with foresters' headquarters. Twenty hundred barns, houses and other buildings have been erected for the department's field force; 1,200 springs have been cleaned, walled and made accessible for camp sites; 800 traps and 850,000 fish have been planted in streams which originate in the forests; chestnut blight has been eradicated from 40,000 acres; handbills have been posted to guide campers, hunters, and the general public in the woods. Over 100,000 acres have been surveyed for topography and wood lands, which, when completed, will show all details of topography and give an inventory of all tree growth the State owns.

The department's work in reforestation and in the planting of trees has been attempted ever made by any State to cover its waste places. Exact figures are not yet available, but from 16,000,000 to 20,000,000 seedling trees have been planted on the State, less than 8,000 acres. This branch of the work is growing rapidly as improvements are introduced in the nursery and the efficiency of the working force increases. Production of 10,000,000 to 20,000,000 seedlings a year is expected within the next few years, which will make possible the reforestation of 5,000 to 10,000 acres each year. It is estimated that 350,000 acres of the million now in the State forests will have to be reforested artificially. At the rate of planting now being made, it would take over a century to complete the work. In that time the action of the elements would reduce the bare soil to such condition that it is doubtful if it would be able to support tree growth. Examples of erosion which has completely removed the soil in less than half that time can be found in almost any county of the State. The total income from the State forests to date is over \$125,000, all of which has been turned over to the State school fund. Most of the revenue comes from the sale of fire-wood or otherwise damaged material which was rapidly decreasing in value, or was retarding the growth of other timber, and from the sale of stone.

Schoolmasters to Hold 10th Annual Conference

The Central Pennsylvania Schoolmasters' Association will hold its tenth annual conference in the library of the Technical High school Saturday. There will be a morning session at 9.30, and an afternoon session at 2 o'clock.

DWIGHT F. MALLORY'S BODY IS RECOVERED

Baltimore, Md., March 2.—The body of Dwight F. Mallory, a prominent resident of this city, who has been missing since last November, was found floating off Swan Creek bar, near Rock Hall, yesterday morning. Identification was made by a pen-knife and watch which bore his name. The body was found about ten miles from the vicinity where Mallory was last seen, the day that he started out on his duck-hunting expedition.

SAVES HER HOME FROM FLAMES

Ellendale, Del., March 2.—Mrs. John Emmons crawled from a sick bed to extinguish a fire that started in the kitchen. When her husband discovered the fire he was stricken with heart trouble and became unconscious.

BLISTERS ON ARMS AND BODY

Skin Inflamed, Burned and Itched All the Time. Could Not Do Work Nor Rest at Night.

HEALED BY CUTICURA SOAP AND OINTMENT

"My trouble began on my arms and body in blisters. The skin was red and inflamed and when I put my hands and arms in water, blood would come out. They burned and itched all the time and I could not keep from scratching. I could not do my work and I couldn't wear any shoes or stockings, nor rest at night. I had the trouble for three months and it distressed my arms and whole body. I tried everything, but they did no good. Then I got Cuticura Soap and Ointment and after I used them for about a month I was healed." (Signed) Miss Mary Zimmerman, Water St., Inglenook, Pa., July 24, 1915. Sample Each Free by Mail With 32-p. Skin Book on request. Address post-card Cuticura, Dept. T, Boston. Sold throughout the world.

STECKLEY'S 404 Broad St. Open Evenings

ENDEAVOR WORKERS MEET A special business meeting of Christian Endeavor workers was held at the headquarters of the State Christian Endeavor Committee to make further plans for the State convention to be held July 11 to 14. Speakers were J. Frank Palmer and A. C. Dean. Short committee reports were made, showing progress in the plans for the convention.

DR. ANGELL SERIOUSLY ILL By Associated Press Ann Arbor, Mich., March 1.—The condition of Dr. James B. Angell, aged president emeritus of the University of Michigan, who has been ill for several weeks, was precarious to-day. His physicians practically abandon hopes of his recovery. He is said to be almost blind.

Iron is Greatest of All Strength Builder, Says Doctor

A Secret of the Great Endurance and Power of Athletes

Ordinary Nuxated Iron Will Make Dull, Nervous, Rundown People 200 per Cent. Stronger in Two Weeks' Time in Many Cases NEW YORK, N. Y.—Most people foolishly seem to think they are going to get renewed health and strength from some stimulating medicine, secret nostrum or narcotic drug, said Dr. Sauer, a specialist of this city, when, as a matter of fact, real and true strength can only come from the food you eat. But people often fail to get the strength out of their food because they haven't enough iron in their blood to enable it to change food into living matter. From their weakened, nervous condition they know something is wrong but they can't do what, so they generally commence doctoring for stomach, liver or kidney trouble or symptoms of some other ailment caused by the lack of iron in the blood. This thing may go on for years, while the patient suffers untold agony. If you are not strong or well, you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Then take two five-grain tablets of ordinary nuxated iron three times per day after meals for two weeks. Then test your strength again and see for yourself how much you have gained. I have seen dozens of nervous, run-down people who were ailing all the while, double their strength and endurance and entirely get rid of all symptoms of dyspepsia, liver and other troubles in from ten to fourteen days' time simply by taking iron in the proper form. And this after they had in some cases been doctoring for months without obtaining any benefit. But don't take the old forms of reduced iron, iron acetate or tincture of iron simply to save a few cents. You must take iron in a form that can be easily absorbed and assimilated like nuxated iron if you want it to do any good, otherwise it may prove worse than useless. Many an athlete or prize-fighter has won the day simply because he knew the secret of great strength and endurance and filled his blood with iron before he went into the fray, while many another has gone down to inglorious defeat simply for the lack of iron.

There's a Difference in Coal A vast difference. You may be burning more coal than is necessary, because you are not burning the kind especially adapted to your requirements. Talk the matter over with us—we'll steer you right on the particular kind of coal you ought to be using—and supply you with the best heat-giving fuel you can buy. Costs the same—and goes further. J. B. MONTGOMERY 600—either phone 3rd and Chestnut Streets

The New Labor Law The new Workmen's Compensation Act is now in effect. If you are an employer of labor you should be familiar with every phrase of this most important piece of legislation. We are prepared to supply this act in pamphlet form with side headings for easy reference. Single copies 25c with very special prices on larger quantities. The Telegraph Printing Co. PRINTING—BINDING—DESIGNING PHOTO-ENGRAVING HARRISBURG, PENNA.
