CATTLE TESTS ARE INVALUABLE NOW

Reports Show the Extent to Which They Are Carried Out in the State

Some rather remarkable results regarding the testing of cattle for tuberculosis under the auspices of the State Livestock Sanitary Board's work are announced in the new State Department of Agriculture's bulletin and it is declared that it is now regarded as a valuable "safety first" move on the part of the cattle owner.

During the past twenty years there were 108,242 dairy cattle tested for tuberculosis in Pennsylvania and out of this number 23,835 cattle were found to be affected and destroyed, according to the records of the State Livestock Sanitary Board.

In 1915, out of 13,117 cattle tested only 6.7 per cent. reacted. When the work was started in 1896 the number of reactors comprised approximately 22 per cent. of the total number of cattle tested and since that time there has been a decided decrease in the number of tuberculous cattle in the State.

The Bulletin says: "It is estimated that the annual loss in livestock on account of tuberculosis in the United States is over \$14,000,000. Considering that the vast livestock industry has a greater earning capacity annually than have all the railroads of our country this is a startling statement to consider, coming as it does from an eminent New Jersey breeder of Guernsey cattle, E. T. Gill, who recently read a paper before the Certified Milk Product Association at Atlantic City, on the value of the tuberculin test. Mr. Gill said that since 1894 he has tested annually under the supervision of Dr. C. J. Marshall, State Veterinarian of the Department of Agriculture, from fifty to one hundred cattle and during that time no injurious effects have resulted from the use of tuberculin. He has brought no animal into his herd without at least one test and that of over 1,500 animals tested on his farm only 7 reacted. Mr. Gill declared that the low percentage was due to the work being done carefully and honestly, proper sanitation and all new members of the herd being isolated and given one or two tests before they were admitted with the rest of the herd. He said that without the test he could not have continued so free from the disease. By the use of the tuberculin test great animals have been protected and saved to perpetuate their blood, thus raising the standard of stock breeding. Mr. Gill further said that the use of the test is an economic safeguard to producers and consumers of dairy products and any responsible breeder who neglects or ignores the test overlooks this greatest dairy asset."

Gen. Diaz, With 25,000 Men Said to Be Heading New Mexican Revolt

GEN. FELIX DIAZ

According to dispatches from Mexico, General Felix Diaz, nephew of the late President Porfirio Diaz, is attempting to start another revolution against the Carranza Government using his native State, Oaxaca, as a base for operations. It is thought that Diaz can muster 25,000 troops, but they will be poorly equipped.

Makes Stubborn Coughs Vanish in a Hurry

Surprisingly Good Cough Syrup Easily and Cheaply Made at Home

If some one in your family has an obstinate cough or a bad throat or chest cold that has been hanging on and refuses to yield to treatment, get from any drug store 2 1/2 ounces of Pinex and make it into a pint of cough syrup, and watch that cough vanish.

Four the 2 1/2 ounces of Pinex (50 cents worth) into a pint bottle and fill the bottle with plain granulated sugar syrup. The total cost is about 54 cents, and gives you a full pint—a family supply—of a most effective remedy, at a saving of \$2. A day's use will usually overcome a hard cough. Easily prepared in 5 minutes—full directions with Pinex. Keeps perfectly and has a pleasant taste. Children like it.

It's really remarkable how promptly and easily it loosens the dry, hoarse or tight cough and heals the inflamed membranes in a painful cough. It also stops the formation of phlegm in the throat and bronchial tubes, thus ending the persistent loose cough. A splendid remedy for bronchitis, winter coughs, bronchial asthma and whooping cough.

Pinex is a special and highly concentrated compound of genuine Norway pine extract, rich in guaiaicol, which is so healing to the membranes.

Avoid disappointment by asking your druggist for "2 1/2 ounces of Pinex," and do not accept anything else. A guarantee of absolute satisfaction goes with this preparation or money promptly refunded. The Pinex Co., Ft. Wayne, Ind.

AUDITORS PROBE POOR ACCOUNTS

Finances of Steward at Cumberland County Home Under Investigation

Special to the Telegraph
Carlisle, Pa., March 2.—Yesterday the Board of County Auditors began a thorough investigation of the accounts of John H. Westfall, former steward of the Cumberland County Home, and heard many witnesses to ascertain the amounts of receipts and expenditures during 1915, the former official claiming to have no books and the only written records being partial ones in the hands of J. E. Shettle, erstwhile treasurer.

No specific charges of guilt are made, the hearing being only, it is stated, to find out about the sums involved. Special counsel has been retained by the board in Joseph P. McKeenan, of the Dickinson Law School, and E. M. Biddle represents the former steward.

ELLIOTT-FISHER EMPLOYEES TO SEE SAFETY MOVIES TO-MORROW

The first moving picture safety-entertainment to be given Friday night, March 3, at the Technical High school Auditorium, will be reserved exclusively for Elliott-Fisher employees. The total seating capacity numbering nearly a thousand will be filled with the employees from the big Cameron street plant and general office. These safety entertainments are being given by the State Department of Labor and Industry.

FACTS SHOWING THE POWER OF 42-CENTIMETER MORTAR

Herewith are presented for the first time detailed facts relative to the famous German 42-centimeter (16.5-inch) howitzer, used to batter the forts of Verdun.

Weight of the gun proper	97 4-5 tons
Weight of the platform	41 1/4 tons
Length of the barrel	16 ft. 5 in.
Weight of the shell	885 pounds
Length of the shell	4 ft. 2 in.
Number of parts in the gun	172
Railroad cars needed to transport it	12
Foundation must be sunk to a depth of	26 feet
Liege was shelled from a distance of	14 miles
Casualties caused by first shot	1,700
Casualties caused by second shot	2,300
Namur and Maubeuge held out, each	2 shots
Fort Speer, Huy, held out	1 shot
Putting up gun takes	25-26 hours
Adjustment of range by other guns lasted	6 hours
Gun discharged from a distance of	300 yards
All windows broken within radius of	2 1/2 miles
Each shot costs	\$2,618
To serve the gun it takes	200 men

The gun crew proper wear protectors over their mouths, eyes and ears and lie on their stomachs to keep from being injured by the shock of the discharge.

The entire gun emplacement is mined and the engineer in charge is sworn to blow up the gun if it is in any danger of capture.

The Household Remedy

for the ailments from which almost everyone sometimes suffers—sick headache, constipation, disturbed sleep, muddy complexion, lassitude, backache, depression and other results of a disordered digestive system—is

BEECHAM'S PILLS

They have achieved the distinction of being the most widely used medicine in the world, because millions of people have found them dependable, speedy and sure in their action on stomach, liver, kidneys and bowels.

Compounded from vegetable products, Beecham's Pills are free from harmful minerals and dangerous drugs. They do not promote the physic habit—do not irritate the bowels. Should be taken by every member of the family at the first sign of illness—so mild and effective that they are good for the aged, and for the ills of childhood, are

To Drill 300 Oil Wells

Fifty-two locations have been made during the past week, and actual work is under way at fourteen of them.

The Company desires soon to have the balance of forty drills in operation and keep them going until our production is over ten thousand barrels per day.

We have three refineries, over ten thousand acres of lands and leases in the real oil belt, and have the larger percentage of this big property connected by our own pipe line, now in operation for over 165 miles. We already have over 120 oil and gas wells. While our properties have increased in value about 10 times during the past year, we are still letting the stock go on a very low basis, because we want the cash to drive the drills on our proven properties forthwith—while oil is high and the demand increasing—which may mean \$3.00 crude by early summer. An oil company can be managed just as honestly as a bank or any other business institution. We need new capital to drill these new wells and to acquire new properties to be drilled for the future.

There is about one-sixth of the stock unissued. This stock is allotted among the present stockholders on a conditional stock dividend basis and hundreds of the stockholders are continually paying in new capital. The Company reserves the right to approve or reject any subscription to, or transfer of its stock.

The Company is now owned by over seventeen thousand stockholders, representing every congressional district, who would not consider a sale of our combined properties, including established trade and good will, at less than Twenty Million Dollars, or nearly eight times all the present stockholders have paid in.

The large majority of our new wells will be drilled in the high grade oil district where oil is now selling at from \$1.70 to \$2.95 per barrel for the crude, and may soon advance to \$3.00 per barrel.

You can secure this stock now at less than its book value, and after you are a stockholder, now increase your holdings on a capitalization basis of one million dollars. The stock is non-assessable.

We have one rich new property that is entirely surrounded by oil wells on which we will drill 27 to 30 wells during the next four months. A 100-barrel well is reported 135 feet west of this property and a 150-barrel well 200 feet north of it, with 35 feet of rich pay sand. On this property 4 wells are started. At small cost can drill them in 21 days. Also at work on 5 wells in Cushing district.

We are starting three new wells on our big lease in Pawnee County. A reported 55 million gas well sparring oil was just drilled in the quarter section on the northeast and a reported fifteen million gas well on the section south. This lease is nearly six and one-half miles long, and we have already developed the deep high grade oil on this property. The next location may be a 2,000-barrel well, and this oil is now worth over \$2.00 per barrel.

We have several properties that by just a little good luck should produce more oil than all the stock when issued will total at the price offered you. We are just completing a good well near the center of a 1,400-acre lease in the Ranch Creek district of Pawnee County and will drill at once three to five new wells in that district.

A ten million gas well was drilled a few days ago right in between a good block of our leases in Rogers County—we promptly closed a contract to sell the gas at 35¢ per thousand—made seven locations and have already started drilling.

In another ninety days our oil and gas sales should be nearly three thousand dollars per day—while half that sum will pay good dividends on all the stock when issued.

The Uncle Sam Oil Company is doing things—and if you want a good block of real oil stock in a company before the price is boomed fifty times, act quickly—by writing for full particulars at once. Send four cents in stamps—write your name and address very plainly and we will be glad to send you by return mail complete information.

Kindly remember that our drills go deeper every hour, and that while you can secure the stock now at the old price—conditions may occur any day that will cause an advance of from 5 to 20 times. You should write for full particulars forthwith.

Respectfully submitted,
THE UNCLE SAM OIL CO.
