WOMEN'S INTERESTS

WHAT HAPPENED TO JANE

By Virginia Terhune Van de Water

CHAPTER LXIII.

(Copyright, 1916, Star Co.)

The physician of the soul and the physician of the body often have occasion to hold secret consultations in a country village. Thus it happened that after trying in vain to sleep on the night of Mary Baird's death, Mr. Evans arose in the early morning, and without waiting for his breakfast, walked across the fields that lay between his home and that of Dr. Monroe, the Milton physician. He chose this short-cut not only because he was in a hurry, but because he wished to avoid meeting any curious parishioners, although at this early hour few people would be abroad.

He had no compunctions about arousing his old friend the doctor. Had not Monroe called the clergyman out of bed on numerous occasions to administer comfort to someone who was ill or dying? That was the business of each. And this tragedy was the most important thing that had ever come into the pastoral experience of the Rev. Henry Evans.

Early as it was the blinds of Dr. Monroe's bedroom windows were open. He was an old bachelor, yet his habits were as regular as his profession permitted. "Come in! Come in!" a voice from above called as Mr. Evans entered the front gate. "The door's unlocked. Go on into the office and make yourself comfortable. I'll be down in a minute."

He was as good as his word and was in his office almost as soon as his visitor. "I'm up early this morning—having had a good sleep," he remarked. "Jane's almost out of danger, so I was not listening all night for a message from there."

"I understand she's better," rejoined the clergyman. "It's about her, in a way, that I want to talk to you. Can we be absolutely alone and free from interruption for a few minutes? I've something to tell you and some papers for you to read."

"Let's have a cup of coffee first. Katie has it ready, I guess," the doctor suggested.

Like other physicians, he was able to postpone professional matters until he had fortified the inner man. If doctors did not do this they would die even earlier than they do. But to the uninitiated, the habit is exasperating.

In spite of the good cup of coffee

which Mr. Evans drank, he found it hard to possess his soul in patience until his companion had deliberately sipped his steaming beverage and eaten an egg and two hot muffins.

"Now," he announced at last. "I'm ready for you, Evans. Come in to the inner office. Katie," to the maid who had served the repast, "see that I am not called for the next half hour. Take any messages that come, please, but don't disturb me unless it's a matter of life and death. Understand?"

"Yes, sir," said meekly. "Now, what's up?"

"Now, what's up?" the doctor demanded as soon as he was seated in his office as one of the table with Evans on the other side. "I shall look as if you had a batch of legal papers there. What are they?"

"First hear my story," Mr. Evans replied. "Then we'll look at the papers."

He told of Mary Baird's visit, interrupted only by the muttered exclamation of his listener. The narration consumed only a few minutes. The reading of the papers in the long envelope that Mr. Evans had brought took longer.

Mary Baird, with merciless detail, had written the sordid, brutal facts. She had spared neither herself nor the man who had betrayed her. And if feeling on the other side might not be believed, she had enclosed receipts for the money she had sent to the Home for Feeble-minded Children.

She had also enclosed the telegram that had informed her that Thomas Baird had died in convulsions on May 7th, and asking what disposition was to be made of the body.

After the documents had been carefully inspected, the physician asked a single question. "How old did you say the boy was?"

"Seven," replied the minister. "Then he had been living with Reeves for at least three years or more—when it was born. It was undoubtedly his child."

A sudden idea smote the clergyman. "But you must have known that she was ill or—"

"The Doctor Explains. Dr. Monroe raised his hand to protest. 'Not so fast, not so fast, my dear friend! I know that Mrs. Baird went away for a visit, that she came back looking pale and thin, that she said she had been ill while staying with friends. I asked for no further information.'

"But did you suspect nothing? Did it ever occur to you that I have—well—I have been remembering back and wondering—"

There was a hurried knock at the door. "Come in," Monroe called crossly. "Katie," as the girl's face appeared in the entrance, "didn't I tell you not to disturb me?"

"Oh, Doctor," the girl stammered, "you said unless it was a matter of life and death. And it is! At least it's a matter of death, for Jake from Mr. Reeves' place is here, and he says that they've just found Mrs. Baird's body in the river down by the dam, dead, drowned! And he wants you and Mr. Evans to come right away. He says she must have been drowned, fell off the bridge hours ago. For she's stone dead!"

(To Be Continued.)

McVEY TOWN BACKING WM. PENN PROJECT

(Continued From First Page)

route that McVeytown folks are interesting themselves to the extent that they demand the highway through their town. Then, too, they would be assured of good roads to Newton Hamilton, Mt. Union and Lewistown and it must be said that the fact that the highway is in the best condition just now. Residents point out that over this course there is sufficient material at hand for good road building, inasmuch as for many miles along the old route there are large deposits of limestone. The tentative route of the William Penn Highway, as outlined by the Huntingdon Chamber of Commerce takes in McVeytown. The permanent route will be decided at the meeting in Harrisburg and it is the fear that the Kishacoquillas Valley route may be selected instead of the turnpike route in this territory that has stirred the McVeytown residents to action and that the tentative route be made permanent. Lewistown enthusiasts want the highway through their town, too, and then again, another point on which McVeytown men base their hopes is that Governor Brumbaugh favors the Juniata Valley route. In a letter to James Macklin, chairman of the borough council and a prominent businessman, the Governor expressed himself as being heartily in favor of the Juniata route. Certainly, the final adoption of the route through here would mean that some road building would have to be done, but the William Penn Highway advocates here explain that with the great mass of limestone at hand, it would be an easy matter to build a most excellent road.

Discuss Advantages. A few nights ago representative citizens of McVeytown, Oliver and Bratten townships met here and discussed the advantages of the William Penn Highway. Bratten township is across the highway through McVeytown and road would not pass through that section, but nevertheless the residents are showing great interest because of the adoption of the route through here they would have better roads in getting to Mt. Union or Lewistown. James Macklin was chairman of the meeting and Andrew S. McKee was chosen secretary. Petitions were drawn up for circulation in the borough and in the two townships. The local petitions are in charge of John S. Lefard. Mr. Lefard will also go to Ryde, Pa., to meet the signers in Bratten township will be gotten by Frank Harshbarger and Ira Miller. The men who have the petitions have arranged to attend all of the public sales in the neighborhood and in this way secure hundreds of names. All signatures must be attached to the petitions by March 18 and on or about that date another meeting will be

Rengo Belt

Reducing Corsets

Are Fashion's Latest Mould for Medium and Full Figures

A medium or full figure, seeking to mould the waist-line shown in the spring fashions, will find corsets of ordinary strength absolutely inadequate to stand the strain. Such garments will break down or stretch hopelessly out of shape very quickly. And if a fleshy abdomen must also be reduced, the task is hopeless without garments made specially for the purpose.

Rengo Belt Reducing Corsets are made for just such figures and just such purposes—sleNDER women do not need them. They have the latest figure lines and no amount of wearing pressure can change them. The change will be yours when these extra strong corsets with the well-known Rengo Belt reducing feature have imparted to your figure every bit of the mould of present fashion which they possess.

Boned with double watch-spring steels, guaranteed not to rust.

Static Electricity in Man Sets Factory on Fire

Special to the Telegraph. Stamford, Conn., March 7. — The static electricity in the arm of Samuel Rocco, of Springdale, a suburb of Stamford, cost him his life, and caused the death of Peter Sautalguto, of 4 Alden street, this city, as well as starting a fire that damaged the British-American Raincoat Cloth factory here considerably.

dropped the blazing can and it set his own clothing and that of Sautalguto, who stood near him, on fire and set fire to the building.

TO "SOMEWHERE IN FRANCE" Harrisburg's biggest box of supplies for the men in the trenches "somewhere in France," started on its way last evening to the American Relief Clearing House, Paris. Its contents consisted of supplies that had been packed by the Harrisburg Branch of the Red Cross committee, and among the articles were the following: One hundred and sixty-eight rolled bandages, 26 ordinary bandages, 9 pounds abstract cotton, 312 gauze compressors, 29 fracture pillows, a bag of gauze drains, 21 sling bandages, etc.

When You Want to be Hungry

When meal-time approaches and you have no appetite, it's a simple matter to make yourself hungry. Drink a cup of Steero. Drop a Steero Cube into a cup, pour on boiling water, and drink it when the Cube is dissolved, which is almost instantly. The flavor of Steero and the stimulus of its heat start the digestive juices flowing. It prepares your stomach to receive food. Your appetite wakes up.

Steero Cubes are sold by Druggists, Grocers and Delicatessen Dealers in boxes of 12, 50 and 100 Cubes. Look for the name "Steero" on the box and accept no other.

PLAID MATERIALS MOST ATTRACTIVE

Cottons or Woolens Will Make Up Prettily in This Simple Style

By MAY MANTON

8977 (With Basting Line and Added Seam Allowance) Girl's Dress, 8 to 14 years.

The plaid materials are very attractive this season and the washable ones are perhaps especially so. This frock shows one printed to give a bias effect and is trimmed with plain color. It is a very practical little dress as well as a smart one and it can be finished with a sailor collar, as it is on the figure, or with a round collar and higher neck. Also, if liked trimming portions may be arranged over the lower edge of the blouse as shown in the small view. The straight skirt is laid in plaits. Linen, pique, gingham and materials of such sort seem to suggest themselves at once for such a frock but it also can be made of challis and of other wool materials with success. Dark blue French serge or challis with the trimming portion on the blouse, the round collar and the cuffs of plaid taffeta would make a very pretty effect.

For the 12 year size will be needed, 6 1/2 yards of material 27 inches wide, 4 1/2 yards 36 or 3 1/2 yards 44 with 1 1/2 yard 36 inches wide for the collar, cuffs and belt and 3/4 of a yard for the trimming portion.

The pattern 8977 is cut in sizes for girls from 8 to 14 years. It will be mailed to any address by the Fashion Department of this paper, on receipt of ten cents.

Carefully Treat Children's Colds

Neglect of children's colds often lays the foundation of serious lung trouble. On the other hand, it is harmful to continually dose delicate little stomachs with internal medicines or to keep the children always indoors. Plenty of fresh air in the bedroom and a good application of Vick's Vapo-Rub will make over the throat and chest at the first sign of trouble, will keep the little chaps free from colds without injuring their digestions. 25c, 50c, or \$1.00.

The Anthracite Coal Situation

seems to be very much up in the air.

At a recent meeting between the operators and miners; the operators were very courteous to the miners.

They treated them as one man would treat another who is not a mortal enemy. In a word, the anthracite operators conducted themselves as gentlemen.

This has been mistaken as a sign of weakness. The assumption seems to be that a man must be firm to turn down a demand and must be something of a brute.

As a matter of fact, the attitude of the operators means nothing.

They may conceal behind their action a decision to give the men something or they may mean to pay nothing.

In view of all the circumstances in the coal regions we are advising our customers to have coal enough on hand to last until warm weather.

Thin Men and Women Can Put on Flesh by Getting 100% Efficiency from Their Food

Failure To Absorb Flesh Making Materials In Daily Meals Keeps Weight Down. How To Make the Food Work and Stick. Most thin people eat from four to six pounds of good solid fat-making food every day and still do not increase in weight one ounce, while on the other hand many of the plump, chunky folks eat very lightly and gain all the time. It seems all bosh to say that this is the nature of the individual. It isn't Nature's way at all. Most thin people stay thin because their powers of assimilation are defective. They eat just enough of the food they eat to maintain life and a semblance of health and strength. Stuffing won't help them. A dozen meals a day won't make them gain a single "stay there" pound. A great part of the fat-producing elements of their food just stay there in the intestines until they pass from the body as waste. What such people seemingly need is something that will so act upon these fatty food elements that their blood can absorb them and deposit them again in the body—something, too, that will multiply their red blood corpuscles and increase their blood-carrying power. There is a preparation known to reliable druggists almost everywhere which was designed to aid in supplying the missing elements needed by the digestive organs to help them convert food into rich, fat-laden blood. This modern treatment is called Sargol and it aims through regenerative, re-constructive powers to coax the stomach and intestines to literally soak up the fattening elements of your food and pass them into the blood, where they are carried to the starved, broken-down cells and tissues of your body. You can readily picture what result this amazing transformation should produce as with increased weight, the cheeks fill out, hollows about neck, shoulders and bust disappear and from 10 to 20 pounds of solid, healthy flesh is added to the body. Sargol is absolutely harmless, inexpensive, efficient. G. A. Gorgas and other leading druggists of this vicinity have it and will refund your money if you are not satisfied, as per the guarantee found in every large package. Why not make this test. First weigh yourself. Then take Sargol—just one tablet at every meal and before you go to bed—for two weeks—then weigh again and note the difference. Let the scales tell the story. The tablets are small, easily swallowed, produce no disagreeable effect, contain no habit drugs, and are not as all expensive as compared with results obtained.

Just Five Days!

Clip This Coupon for The American Government AND The Panama Canal By Frederic J. Haskin The Books That Show Uncle Sam at Work The Harrisburg Telegraph

SOME FACTS ABOUT THESE BOOKS—Both are the same size and bound exactly alike in heavy cloth. Each has about 400 pages printed on fine book paper. Both are profusely illustrated with official etchings, drawings and maps.

TO OUR READERS—We are distributing these patriotic books solely because of their great educational merit and our belief that they should be in every American home.

Five days from to-day the distribution of "The American Government" and "The Panama Canal" by the Telegraph will be discontinued. The supply of books is limited, the time is limited, the opportunity is limited. You are warned, so do not procrastinate. This is the last chance to get the books that show Uncle Sam at Work. It takes only ninety-eight cents. Fifteen cents extra, if sent by mail.

ONLY ONE COUPON REQUIRED

How's This?

We offer One Hundred Dollars Reward for any catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.
