that it was a strictly cash proposition.

"The purchase price of a car," said Mr. Cosgrove," is the smallest end of the deal as concerns the purchaser. The big cost is the cost of operation, repairs, housing and insurance. All this cost starts when the buyer gets the car. At the same time he must commence paying the monthly instalments. If he has the money it is cheaper for him to pay cash. If he has not the money, then he must depend on his income to meet both the instalment payment and the owning expense of the car—a real hardship for a poor man."
