Camparating Vanor Plug

Compensating Vapor Plug Saves 50 Per Cent. in

Gasoline Consumption

One of the very latest inventions for the automobile that is really worth while is the automatic compensating vapor plug. This is a lit-tle instrument attached to the intle instrument attached to the intake manifold of the engine, and works automatically, allowing an amount of fresh air into the fuel mixture under certain conditions; which results in more power and speed, with less gas consumption.

This instrument is sure to become widely used, as the price of gasoline is soaring and the motorist is looking for relief, which this plug will furnish as it is guaranteed to save at least 50 per cent of the gasoline.
