Sluiceway in Dam

Sluiceway in Dam

While slush ice is still running freeity, in the Susquehanna, rivermen in
this section are making preparations
for early Spring work and if
stream clears sufficiently by the end
of the week some of the coal fleets
will be on the river. Among the big
fleets which are being prepared for an
early start is the Harrisburg Light and
Power Company's flotila. Thoughout
the winter months its three steamers,
four steam-pumps and "sand suckers"
and thirty-two coal flats have been
docked in winter quarters in
mouth of Paxton creek just below the
Central Iron and Steel works. Incidentally the job of bringing the big
fleet northward across the river dam
at Dock street is some job.

If the water rises sufficiently to cover
the dam the towing of the barges and
steamers to the expanse of
water
above the dam will be comparatively
easy. If the water doesn't rise sufficiently, the whole fleet will have to be
brought through the swiftly-running
sluiceway along the river front wall.

In order to accomplish this, according to Superintendent L. L. Ferree, a
steamer will be anchored near the
dam and by means of a steam-winch
it will pull the flats and other craft
through the opening by means of a
block and tackle.

Coffee Facts

Read what the 19th edition United States Dispensatory (page 253), the guiding authority for chemists, druggists, and physicians, says about the drug, caffeine, of which there is about 21/2 grains in the average cup of coffee:

> "Given in large dose to the lower animals, caffeine produces hurried respiration, restlessness, slightly lowered, followed by a markedly elevated temperature, tetanic and clonic convulsions, progressive paralysis, and finally death from paralytic arrest of respiration.'

Although man is stronger and more resistant, it is a well-known scientific fact that caffeine, in coffee, is a frequent cause of headache, nervousness, biliousness, heart flutter and many other ills.

Not at one large dose, but by little doses repeated regularly does this subtle, habit-forming drug get in its work, and, sooner or later, many coffee drinkers
