

How To Make the Quickest, Simplest Cough Remedy

Much Better than the Ready-Made. You Save 25¢. Fully Guaranteed.

This home-made cough syrup is now used in more homes than any other cough remedy. Its promptness, ease and certainty in conquering distressing coughs, chest and throat colic, is really remarkable. You can actually feel it take hold. A man's use will usually overcome the ordinary cough—relieving even whooping cough quickly. Splendid, too, for bronchitis, spasmodic croup, bronchial asthma and winter coughs.

Get from any druggist 2 1/2 ounces of Pinex (50 cents worth), pour it in a pint bottle and fill the bottle with plain granulated sugar syrup. This gives you—at a cost of only 50 cents—a full pint of better cough syrup than you could buy for \$2.50. Takes but a few minutes to prepare. Full directions with Pinex. Tastes good and never spoils.

You will be pleasantly surprised how quickly it loosens dry, hoarse or tight coughs, and heals the inflamed membranes in a painful cough. It also stops the formation of phlegm in the throat and bronchial tubes, thus ending the persistent loose cough.

Pinex is a most valuable concentrated extract of genuine Norway pine extract, rich in quinine, which is so healing to the membranes.

To avoid disappointment, be sure and ask your druggist for "2 1/2 ounces Pinex," and don't accept anything else.

A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Ft. Wayne, Ind.

KEEPS KIDNEYS ACTIVE WITH A GLASS OF SALTS

Must flush your Kidneys occasionally if you eat meat regularly.

Noted authority tells what causes Backache and Bladder weakness.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders come from sluggish kidneys. The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate the blood pure, thereby avoiding serious lithia complications. Adv.

Don't Go To Bed With Cold Feet

Says: "Often Brings on Attacks of Acute Rheumatism"

An ounce of prevention is worth a pound of cure, and people who are subject to attacks of rheumatism should never go to bed with cold feet. A whole lot is being said about taking salicylates and salicylic acid, but those who suffer sharp twinges and painful swollen joints need something powerful to overcome their piteous suffering.

Any broad-minded druggist will tell you that one-half teaspoonful of Ithema taken once a day is driving more rheumatism out of afflicted people than all the salicylates and salicylic acid in this neighborhood. H. C. Kennedy and all druggists sell large quantities of it, and it's the surest and most inexpensive remedy—about 50 cents a bottle.

GENTLE RUBBING HELPS VARICOSE VEINS

Rubbing the swollen veins nightly for about two minutes with a gentle upward stroke will improve the circulation and is mighty good advice, says an authority.

The rubbing, which should always be toward the heart, because the blood in the veins flows that way, may be done with a little strength with brush or hand.

Try this simple home treatment for a few days and improvement will be noticed, then continue until veins are reduced to normal. It is very concentrated and penetrating and can be obtained at any modern drug store. It is so powerful that it also reduces Gout and Wens. All druggists have Emerald Oil in the original bottle and will be glad to supply it.—Advertisement.

Today And A Generation Hence

The flight of time makes us think of the future. The baby of today reflects what greatness may be acquired when he grows up. And any mother who brings relief to the expectant mother is the first and greatest of obligations. There is a splendid remedy known as "Mother's Friend" that has been a safeguard, a helpful daily influence, to a host of women. Applied externally to the muscles they become pliant; they stretch without undue pain, there is an absence of distress, the nerves are soothed by taking away the burden of leaving all to just natural conditions.

There is in "Mother's Friend" the direct and immediate help that all expectant mothers require. Used by their own hand, guided by their own minds, they learn at once the blessed relief from morning sickness resulting from undue stretching. They experience daily calm and mighty rest. It is indeed "Mother's Friend." Get a bottle today of any druggist. Then write Bradford Regulator Co., 410 Lamar Bldg., Atlanta, Ga., for one of the most entertaining and valuable little books ever presented. It is worth writing for.

COMES

A NOVEL

GEORGE AGNEW CHAMBERLAIN

COPYRIGHT BY THE CENTURY CO.

SYNOPSIS

CHAPTER I—Alan Wayne is sent away from Red Hill, his home, by his uncle, J. Y., as a moral failure. Clem runs after him in a tangle of short skirts to bid him good-by.

CHAPTER II—Captain Wayne tells Alan of the falling of the Wayne. Alan drinks Alan's health on his birthday.

CHAPTER III—Judge Healey buys a picture for Alan Lansing. The judge defends Alan in his business with his employers.

CHAPTER IV—Alan and Alix meet at the homeward bound, and start a flirtation, which becomes serious.

CHAPTER V—At home, Nancy Sterling asks Alan to go away from Alix. Alix is taken to task by Gerry, her husband, for her conduct with Alan and deities him.

CHAPTER VI—Gerry, as he thinks, sees Alix and Alan. Gerry drops everything, and goes to Pernambuco.

CHAPTER VII—Alix leaves Alan on the train and goes home to find that Gerry has disappeared.

CHAPTER VIII—Gerry leaves Pernambuco and goes to Piranhas. On a canoe trip he meets a native girl.

CHAPTER IX—The judge falls to trace Gerry. A baby is born to Alix.

CHAPTER X—The native girl takes Gerry to her home and shows him the ruined plantation she is mistress of.

CHAPTER XI—At Maple house Collingford tells how he met Alan—"Ten Per Cent. Wayne"—building a bridge in Africa.

CHAPTER XII—Collingford meets Alix and her baby and he gives her encouragement about Gerry.

CHAPTER XIII—Alan comes back to town but does not go home. He makes several calls in the city.

CHAPTER XIV—Gerry begins to improve Margarita's plantation and builds an irrigating ditch.

CHAPTER XV—In Africa Alan reads Clem's letters and dreams of home.

CHAPTER XVI—Gerry pastures Lieber's cattle during the drought. A baby comes to Gerry and Margarita.

CHAPTER XVII—Collingford meets Alix in the city and finds her changed.

CHAPTER XVIII—Alan meets Alix, J. Y., and Clem, grown to beautiful womanhood, in the city and realizes that he has sold his birthright for a mess of pottage.

CHAPTER XIX—Kemp and Gerry become friends.

CHAPTER XX—Kemp and Gerry visit Lieber and the three exiles are drawn together by a common tie.

CHAPTER XXI—Lieber tells his story. "Home is the anchor of a man's soul. I want to go home."

CHAPTER XXII—In South America Alan gets fever and his foreman prepares to send him to the coast.

CHAPTER XXIII—Alan is carried to Lieber's fazenda, almost dead, and Gerry sees him.

Alan opened his eyes and looked at him. "She is waiting. She has always waited for you to come back. She would not believe you were dead, because of the boy."

"The boy?" groaned Gerry. "What boy?"

"Yours," said Alan. "He is a great boy. There is a new Alix since he came. She is as far from me and what she was as the stars. She is a steady star. But it's all right now. You'll go back to her."

"I can't," whispered Gerry hoarsely, more to himself than to Alan. "I've got a wife here. I've got a child here. To me he is my first-born."

Alan's eyes opened, this time in wonder. A twisted smile came to his lips. "You!" he said. "You!" and then the smile changed to a faint disgust. He turned his head on the pillow away from Gerry and slept.

The next morning found Gerry still at Lieber's. Outside the heavenly bowl of blue was virgin of clouds. It stretched and domed in a sphered eternity of emptiness. Through its depressing void the sun swam slowly, pitilessly, as though it were loath to mark the passing minutes. The whole earth baked. Strong trees wilted and turned up the wrong sides of their leaves on the sea of heat like dying fish turning up their white bellies at the last gasp. Not a breath of air stirred. Heat rose from the ground in an unbroken, visible wave. "My God," said Alan, gazing with wistful, far-seeing eyes beyond the familiar, repellent scene, "a homeward fever parches up my tongue." There was such an agony of longing in the words that Gerry was frightened. He looked questioningly at Lieber.

"No," said Lieber, "he's not dying. He was dying, but he's changed his mind. He's going to go home instead."

CHAPTER XXIV

Gerry had never ridden a horse to death before. When True Blue first staggered he put spurs to him and laid on his quiet gait and left.

The roar of the river was so loud that he could not tell if he had really beaten the flood or not, though he could see just before him the long, snaky ridge of the main ditch banks. He must get on.

MIDDLETOWN IS NOW PROSPEROUS

[Continued From First Page.]

dietown Tube Works, which employed more than a thousand men, was absorbed by the United States Steel Corporation and finally was taken away. In many persons the town appeared doomed. Then came a fire which practically wiped out the business district of the borough and no hope seemed to remain. But the town's people stood together and supported moves for town betterment. The industries which remained in the borough began to enlarge their interest and gradually began to add more help. Outputs became larger and the demand for "made in Middletown" goods increased. At the present time every enterprise in the borough is running full time and every plant is willing to employ more help.

Just now there are many men working in Middletown who reside in other towns and are quite anxious to move here but are unable to do so because of the scarcity of houses. To eliminate this condition it is quite likely that during the coming summer quite a number of new homes will be erected.

And the outputs of Middletown industries are known in all parts of the country and South America. Freight cars of all kinds are made here; Middletown is the home of a large stove works and modern foundry, and shoes, hosiery and cigars are other products of the borough.

The Middletown Car Company is the largest concern in the borough and at the present time is employing between 800 and 900 men. Freight cars of all descriptions are manufactured and the great majority are shipped to foreign countries. Many are now in use on the South American railroads and quite a few are being pulled over the worn Europe. At the present time the company is turning out a mammoth order for one of the allied governments of Europe.

The car works were opened a number of years ago and with increased business came the enlarging of the plant. About three years ago there were a few more than 300 men working at the car works but the company has made some rapid strides and during these three years the working force has been greatly increased.

Life here is being improved almost daily, as the plant it is said, and although there is not a scarcity of labor the company is willing to employ all of the help available.

The Middletown Furniture Company conducts another of the borough's industries and at this plant about 25 men are employed. The factory was opened in 1873 and since that time furniture of many patterns has been made. The company specializes in business furniture and many pieces of this are finished and shipped to many parts of the country.

The output includes tables, counters, showcases, wallcases, store shelving, church furniture, bank office fittings, and druggists' prescription cases.

The shoe business in Middletown is one of the borough's most important industries and daily 3,700 pairs of shoes are produced. The factory here is owned by the A. S. Kreider Company, which also operates factories in Anville, Palmyra and Elizabethtown. Another is now under construction in Lebanon. The output of the local

teen years ago the hosiery mill was opened and business has been carried on successfully since. Two hundred people are given employment at the plant and daily 1,425 dozen pairs of men's, women's and children's stockings are produced. The original building of the company was two stories high and about two years ago a third story was added to carry on the business.

THE MOST UNKINDEST CUT

The truest and most devoted friend that man ever had is the little inanimate bundle of nerves that stands guard by his bedside through the dead hours of the night, its palpitating little heart spreading cheer and confidence over the surrounding gloom.

Kreider shoes are sold in almost every part of the country and are distributed by the company's own agencies. The Kreider Company maintains offices in New York, Philadelphia, Pittsburgh, Chicago, and St. Louis.

Middletown is known, too, for its stoves. Wincroft stove manufacturing by the Wincroft Stove Works, are known all over the county for their quality and the 150 men employed at the plant are kept busy turning out the product in all seasons of the year. The business was started in 1856 by Seymour Raymond. The plant at that time was a little one-story blacksmith shop on the site of the present four-story building which is about 200 times the size of the original structure. Joseph Campbell was then taken into the business and work was carried on by this firm for some years. Changes in ownership were made at various times and the plant came to be known as the Wincroft Stove Works. The present officers of the concern are Armour W. Brehnan, of Philadelphia, president; J. G. Balfour, Philadelphia, secretary and treasurer; E. M. Colquhoun, Middletown, vice-president and general manager. Business under the new management is exceptionally good and the output at the present time is 50 per cent. over the output for the same period of last year.

In addition to the stove business, the company maintains a well ventilated and modern foundry and in addition to its own works, castings are made for a gas stove and gas water heating company in Philadelphia.

The stove plant is among the best located in Middletown and sidings of both the Pennsylvania and P. & R. railroads run to the buildings.

Cigars are made in Middletown, also and just now the output of the Middletown Cigar Factory, a branch of the United Cigar Manufacturing Company, is 15,000 daily. All of the cigars are shipped to western States. The business was established in Middletown eleven years ago, and at one time more than 300 girls were employed in the factory. With the opening of other industries in the borough, however, girls left the place and there is now a scarcity of help in the factory as only about 80 people are on the payroll. E. W. Buckwater says he would give \$50 if some person would bring him 100 girls.

Industry in Middletown is completed by a hosiery mill, owned by the H. O. Romberger Manufacturing Company, which maintains plants in Newport, Lykens and Philadelphia. Eight-

Yet man often forgets the debt of gratitude he owes this faithful and tireless little friend for the sleepless, watchful hours it subjects itself to in order that he may slumber in security and comfort, and when it utters its merry morning lay I have seen him, instead of bestowing fond caresses, reach from his warm quilts, grasp it ruthlessly and slam it into the farthest and darkest corner of the room, crushing the dainty hands that seemed uplifted in an attitude of horror and protection, scornfully mauling such unworldly and unworthy reproaches as these: "Damn that blinkety-blank alarm clock anyhow!" then return to his snoring. Zinn in Cartoons Magazine.

What Makes a Woman a Good Cook?—How Steero Cubes Help

A good cook? What does that mean? It means having skill and knowledge of how to impart flavor to the dishes prepared.

If your cooking has flavor, you are a good cook. If it lacks flavor, a few Steero Cubes in your kitchen, used with judgment, will lift your cooking out of the "plain" class into the "good" class.

Steero Cubes are concentrated flavors. They contain the blended essences of beef, vegetables and spices.

You can prove this by drinking one cup of hot Steero, made by pouring boiling water on a Steero Cube.

You'll taste all those flavors and you will like them. Imagine how well they would go in a roast, a gravy, a pot-pie or a sauce. Steero Cubes will improve your cooking like a course in a cooking school.

Get them from your nearest Druggist, Grocer or Delicatessen Dealer in boxes of 12, 50 or 100 Cubes. Be sure to get Steero Cubes. There are imitations.
