Evening Chat

Announcement of the discovery of manganese iron ore along the Blue Ridge mountains in Cumberland county and that some traces have been found in Franklin, Fulton and Adams counties has attracted some attention.

An attorney who was defending a client in an assault and battery case objected to the admission of the testimony of a witness in a certain quarter sessions the other day because she wouldn't tell her reasons for advancing her theory as stated on the witness stand. The judge declared she had seen the act as she was passing an open door and happened to "look in."

Some folks have good memories. They remember both names and faces. Others recall faces and know where they have met before but forget names. Among the delegates to the William Penn Highway Conference was a representative from Newport. He gets into Harrisburg quite often, and he speaks of the city as "Newport every time he comes to the city."

H. E. Bodine, of Clearfield, formerly connected with the Bureau of Industrial Statistics and who has done studies of Harrisburg and other Pennsylvania cities, was here to-day. He is connected with several progressive commercial organizations up the State.

Whether it is because so many cattle have been bought up by dealers owning the best of the demand for beef not only in this country but from abroad there is a noticeable lack of cows in the vicinity of Harrisburg. For years this section, notably the Cumberland-Lebanon valleys, raised a fair number of steers for market, but there are not nearly as many as in years gone by.

Ex-Senator George M. Wertz, of Cambria county, who was here yesterday on business at the Capitol, served as president pro tem of the Senate in 1912 and during that time he controlled the Cambria. He is well known to many residents of this city.
