and Why.

THEN you take your Shoes off tonight do this: —Bear your weight on your right Foot and, with-out lifting it off the floor, press it forward and back-

Then observe that only the bony and muscular Structure of your Foot moves forward and backward, while its Sole stays fixed on the

That demonstrates the rolling motion of flesh and muscle, the elastic Cushion quality which reduces friction in walking, and prevents slipping (backward, forward, or sideways). It supplies that CLING quality, which gives Traction without

and Tear of action, as a lubricant protects Metal moving parts, while providing the wonderful "Barefoot" hold on slippery surfaces. That ROLLING MOTION, then, is the ideal aimedat in this Clingy, Springy, and Stretchy black "Barefoot" Rubber of 1916 Goodrich Tires.

CONSIDER now the means by which many Tires have been given maximum Traction, —i.e., by means of a "sand-papery" texture in the Rubber of their Anti-Skid Treads. Every time the Brakes are put on, to make such Tires grip the road, the relatively hard, unyielding, and comparatively brittle, texture of the Rubber in their Treads causes these Treads to grind away on the pavement, to WEAR OUT fast at the point of contact. The sudden efficiency of their grinding-Traction also tugs so sharply on the Rubber Adhesive between the layers of Fabric in Tire as

sharply on the Rubber Adhesive between the layers of Fabric in Tire as to separate these layers. There is little "give" to them - just as there is little "slide" to

So, they gain Traction at the expense of *Mileage*. Naturally such Tires require a great *BULK* of such Rubber in order to deliver reasonable Mileage before worn out. And, therein they differ radically from GOODRICH "Barefoot"

Because, —the Safety-Tread on Goodrich Tires is made of "Bare-foot-Rubber," a new, and exclusive compound which discards all un-necessary whitish "frictional" ingredients that are heaviest and inert, as proved by its lighter weight.

٠

. .

H ERE is how it acts in Automobiling,— —When the weight of the Car bears on this comging "Barefoot-Rubber" Tread, and the power is applied to go ahead or reverse, the wonderful stretch in the "Barefoot" Rubber Sole (or Tread) of the Goodrich Tire acts as a sort of Lubricant between the Fabric Structure of the Tire and the Road. Then, the Barefoot-Rubber "Toes," of the Goodrich Safety-Tread Tire, CLING to the pavement (instead of grinding against it), in such manner as your Bare Foot would cling to a slippery surface—without Grind, and so, with the minimum of Frictional Heat or Wear for maxi-mum Traction.

mum Traction. Goodrich "Barefoot-Rubber" is now made into Goodrich FABRIC Tires, — Goodrich Silvertown Cord Tires, — Goodrich Inner Tubes, — Goodrich Truck Tires, —Goodrich Motor Cycle, and Bicycle, Tires, as well as into Goodrich Rubber Boots, Over-Shoes, Soles and Heels. Get a Sliver of it from your nearest Goodrich Branch, or Dealer. Stretch it thousands of times, but break it you can't. That's the Stuff that GOODRICH Black-Tread Tires are made of.

It protects the Bones and Sinews of the Foot against the Wear

American Citizen, New Publication, Issues First Number Today

The American Citizen, Steelton's latest newspaper, issued its first num-ber this morning. Published by the American Citizen Publishing Company, 50 North Front street, of which M. J. Horvath is pro-prietor, the new paper will be issued every other Saturday. It is printed in the Croatian and Slavonian languages with a few articles in English. The Citizen is a four-page, five-col-umn paper and is neatly printed. It is independent in politics and declares that its policy "will be to merge the cosmopolitan elements of Steeiton's citizenry into good American citizens."

MRS. ROSELILA STEINBERG

Mrs. Rosella Steinberg, aged 78, died at the home of her son, S. B. Stein-berg, 1017 Hemlock street, Harris-burg, yesterday afternoon from heart trouble. Funeral arrangements are in-complete complete. SHAFFER FUNERAL TO-MORROW

Blow in Second Stack at Lebanon Furnaces

No. 2 blast furnace at the Lebanon plant of the Pennsylvania Steel Com-pany was blown in this morrning on speigel, a brand of Iron different from the pig fron turned out at this fur-nace heretofore.

Steelton Snapshots

Meeting Called Off.—A mass meet-ing for men to be held in the First Re-formed Church to-morrow has been indefinitely postponed. Water Board Meets.—The borough water board met yesterday afternoon. Only routine business was transacted. Install Officers.—Officers of Steel-ton Lodge, No. 184, Independent Or-der of Odd Fellows, were installed at last evening's meeting.

at any time. The secretary plans to 3rd see the President to-night.

Germans Gain Foothold in Small Field Works

By Associated Press

By Associated Press Parls, April 8.—The Germans re-newed their attack south of Haucouri in the Verdun region last night and gained a footing in two small field works between Haucouri and hill No. 287 the War Office announced to-day. Fighting with grenades between Bethincourt and Chattancourt turned to the advantage of the French. East of the Meuse there was inter-mittent bombardment of French posi-tions. Near Fort Vaux the Germans made an attack with grenades and were repulsed. The state of the State o

LIEBNECHT ONLY SPEAKER By Associated Press

By Associated Press London, April 8.—A dispatch from Amsterdam dated April 7 says that Dr. Karl Liebnecht, Socialist, was the only speaker when the naval budget was presented yesterday in the Reich-stag for second reading. He tried re-peatedly to discuss the motive for ad-miral Von Tirpitz's resignation as naval minister and also the question of Germany's submarine warfare, but was called to order and finally or-dered to desist.

SAUERKRAUT STATES

SAUERKRAUT STATES Farm and Fireside tells us that the Government crop report for the year gives some interesting facts about cab-bage-raising. "New York State had 5,068 acres of cabbage grown last year for manufacture into kraut. Indiana was second with 2,755 acres, and Ohio third with 2,013 acres. Danish ball-head is apparently the most popular cabbage grown, though in Wisconsin, Minnesota, Iowa, and Colorado, Holland cabbage is somewhat more popular."

ENGINEERS HEAR LECTURE

Members of the Engineers' Society of Pennsylvania were treated to an inter-esting lecture last evening on the pro-cesses used in the manufacture of iron and steel wire rope. Messrs. Boynion and Underland, of the J. A. Roebling's Sons Company, Trenton, N. J., spoke on the subject.
