Lower Price Offset Increase

14

<text><text><text><text><text>

# line cost which has developed or may develop. "The automobile buyer would ense his mind 'materially about gasoline prices by taking into consideration other features involved in the pur-chase of the modern car," said John N. Willys, president of the Willys-Overland Comany receptly. Every automobile owner is getting more value for his money in the automobile market to-day than ever before. "From the standpoint of economy in purchase price and upkeep, we can use our Model 75 as an excellent ex-ample of greater value for less money than any previous offering of its kind in automobile history. It is true that gasoline costs a few cents more this year than last year, but a comparison of those few cents with the dollars saved in purchase price almost makes the gasoline costs a mall, light car, equipped as fully and extensively as the heavier and more expensive ma-chines, at a price within the reach of everyone. Just think of the decrease in price of a completely equipped car during the last two years. For \$615, the price of our Model 75, you can now buy a car which would have been cheap at ten or tweive hundred dol-lars but a short time ago. Here we have an automobile, the accessories of which alone would cost quite a sum of money, on the market at a price so amazingly low that the saving in first purchase price vould almost cover the entire cost of gasoline dur-ing the first few years' driving. And this saving is the more remark-able when you consider that Model 75 is a high quality automobile in every as to the proper handling of the brook

ing the first few years' driving. And this saving is the more remark-able when you consider that Model 75 is a high quality automobile in every sense of the word. It is the highest attainment in the manufacture of has all the equipment so attractive in the expensive cars, ranging from the electric starting and lighting system, full streamline body with sweeping curves and crowned fenders of heavy sheet metal, two big, roomy seats and deep, luxurious cushions. "Another point to be given serious consideration is the fact that this small, light car consumes so much less gasoline in its daily use that the cost per mile for running is even less than if gas were lower and consump-tion greater. "It would take a long time to re-late all the features of this one model, without considering the other models, which are practically just as revolu-tionary in quality and price. But with a touring car of this description avail-able at such a low figure, do youtwon-der that we smile a little when some-one says he hesitates to buy just be-cause gasoline has gone up in price? The increased cost of gasoline is more than offset by the decreased price of the car and its upkcep." **Fifteen More Indiane** 

**Fifteen More Indians** For the U. S. Army

In the titanic struggle now raging in Europe, the motorcycle has proven over and over again that it is to-day an Indispensable part of the modern equipment of war. War to-day with all its mathematical exactness, with all its prodigious demands upon me-chanical genius requires steeds and messengers of greater stamina than has ever been demanded hitherto. A steed that never tires, a steed to which distance is as nothing, one that is not felled by a single shot, one that does not require food and shelter, one that has speed in its highest develop-ment—those are the requirements of modern warfare. The horse meets none of these requirements, the motorcycle

Overland Official Says Effi- Dr. Rittman Says Synthetic ciency of Modern Car and Process Will Make Five **Times More Available** 

LOWER GASOLINE

PRICES COMING

"Synthetic gasoline will catch up with the demand in the next six montha. You can look for higher prices, but in the course of a year or so most certainly we will have an avail-able supply of gasoline. We will catch up with the demand. "There is no cause for anxiety over the price of gasoline," says L. H. Hag-erling, Hudson distributor in this ter-ritory, who, in substantiation of this comforting assurance, dies the recent talk of Dr. Rittman, government expert. Defore the Dayton Engineers Club. "Dr. Rittman," says Mr. Hagerling, "Dr. Rittman," says Mr. Hagerling, "D. Rittman," says Mr. Hagerling, whethed of getting gasoline from crude oil. Being in the employ of the gov-ernment he devoted years of research work to the gasoline subject and his views at Dayton have the stamp of authority. Dr. Rittman's talk was as follows: "Expenditures of gasoline are great-"The cost of gasoline is one of the less important items to the prospec-tive purchaser of an automobile whose aim is economy." This is the opinion of one of the most prominent manu-facturers of automobiles in the world. He bases his argument on the declara-tion that the modern car of to-day is so complete in its equipment and so so complete in its equipment and so reduced in its price that these features entirely offset any increase in gaso-line cost which has developed or may develop.

"The automobile buyer would ease mind materially about gasoline

auths, i.e., Dr. Rittman's talk was as "Expenditures of gasoline are great-er to-day than ever before. One thing that has knocked the bottom out of the gasoline market is the failing off of Okiahoma crude oil. Less than a year ago, Cushing field produced 300,-000 barrels of crude oil. Mich ana-lyzed from 25 per cent to 30 per cent. of gasoline, in other words, 130,000 bar-rels per day. Now that source of sup-ply has fallen off until it is below one-thind that amount. "That means that despite this dis-govery, which was brought out eight by which was brought out eight by which was brought out eight by the second schedule \$5,000,000, and is new beg exceeding \$5,000,000, and is new beg remed an cen at-ditional plants, with twend in ten at-ing it, but we simply cannot take care of them — it means that despite this progress we cannot cope with the prob-lem, and it will be some time before our curce catches up with the demand curve. "No two crude oils are the same. As

The term gasoline term which be done to a curve a solution of the same of the same and the same of the same set of the same set of the same of the same set of the same se

orated; that is they are digging deep-er in the bowels of the earth — that same grade to-day is producing 25 per cent. "The heat containing oils, exempli-fied by the Oklahoma oils, are also very variable for gasoline production. Some of the oils as found in Texas, in the Hemble field, which has been opened up recently and is producing 100,000 barrels per day, contains practically no gasoline but contains kerosene to the extent of about 70 per cent. Califor-nia oils and Mexican oils contain prac-tically no gasoline. The average con-tained in California oils for about 100,000,000 gallons produced per annum. Is about 25, per cent. But we can pro-duce gasoline from these oils by the 'cracking process." "Now, then can we look forward to the solution of this problem by ma-terials such as alcohol and other com-bustibles? That is not probable for a log time to come. Purely as a matter 'or as, alco dees not become a fac-tor as, alcohol dees not become a fac-tor as forty cents per galla. "If you figure the number of acress required for raising the corn and po-tatoes to furnish alcohol for the inter-nal combustion engines, you will find that we would use a good big part of the United States to do it. "There are to-day two and a half million automobiles, or say, two and a quarter. Figuring conservatively, es-timated 25 horsepower each, we have the figures 60,000 horsepower. The combined horsepower of all the steam motives in America is less than 50 per cent. of that. "We four the solong per machine per cont. Of that. "We four the solong per machine per annum. There is considerably more

hoist being used on 90 per cent. of the large trucks throughout the United States. In selecting the new truck records were gone into by the Highway De-partment and when they found that 7,700 miles had been done in the past ten months by the Reo now in service with a minimum outlay for upkeep and operation expenses the contract was at once placed for another truck of the same caliber. The new truck is a model J and was sold at regular list price. Columbus Affair "With a couple of machine guns mounted on motorcycle sidecars the United States troops at Columbus, N. M., could have made that town so hot for the Villa bandits that mighty few of them would have ever gotten

# **DUTCH MAY CALL 1917** CLASS By Associated Press London, April 8. — A bill has been submitted to 'the chamber of the Dutch Parliament to authorize the government, in view of the prevailing extraordinary circumstances to call up, if necessary the recruits of the 1917 class, says a Reuter dispatch from The Hague.

few of them would have ever gotten back across the border to Mexico again." said Heay Bros., 1200 North Third street, to-day. "The United States government has awakened to an appreciation of the value of the motorcycle and I predict that the time will not be far distant when motorcycles will be in general use by machine gun companies. "For fast work in close quarters under conditions such as existed at Columbus or out in the open country in operating against cavalry, the mo-torcycle by reason of its speed, power and flexibility has a great advantage. But two men are required—one to run the motorcycle and the other to op-erate the gun. "The short radius in which a ma-chine gun mounted on a sidecar chassis can be unread eround makes it est

**Motorcycle Machine Guns** 

Would Have Prevented

charter begins and the other to op-erate the gun. "The short radius in which a ma-chine gun mounted on a sidecar chassis can be turned around makes it es-pecially adaptable for quelling a riot or stopping a raid in a city. Just imagine for a moment what a couple of such outfits could have done to Villa's bandits that night in Columbus. They could have poured a stream of lead down every street in such rapid succession that the Mexican outlaws who escaped the first fire would have had no alternative but to fae to the open country. "And before they could have made a start on the three miles they had to go to reach the border they could have been overtaken by the motorcycles and completely annihilated with the ma-chine guns. With Villa back in the region with which he is familiar-one hundred and sixty square miles of wild, mountainous country—it will be a hard job to put an end to the depre-dations of his outlaws. General Funs-ton is the man for the job, all right, but had there been a couple of motor-cycle machine guns available at Co-lumbus that particular night there would have been a quick ending of the so-called Mexican problem."

#### Another Reo Truck For

#### **City Highway Department**

The City Highway Department has just awarded a contract to the Harris-burg Auto Company for abother Reo truck of two to three ton capacity for service on the city's streets. This will be the second Reo truck in the City Highway Department, the other hav-ing proved its worth in the service of the past ten months. The new truck will be equipped with the Wood hydraulic holst, the same Deposits. Savings,

of Them All"	Harrisburg
· · · · · · · · · · · · · · · · · · ·	

Did you ever stop to consider how much money you've got laying loose around the house? No, I don't mean so much in actual currency, but in inactive furniture carpets, stoves, dishes, and the like. Too good to throw away, and for which you have no further use except to shift from one corner to another each housecleaning time. Sell it! That's the answer

Take that old stove, for instance. That's good for \$5 to \$15 if you knew who needed a stove like it. I'll tell you-just insert an ad like this in the TELEGRAPH:

FOR SALE -- Large stove; good as new. Double heater; burns coal or wood. Reason for selling, owner has no further use for it. Call 1027 Hill

An ad like that will cost you 25c for one time, or three times for 50c, and there's mighty little doubt about your selling it. Among the twenty-one thousand readers of the TELEGRAPH there are plenty of folks who are looking for just those articles for which you have no further use.

Better try it out and give us a chance to prove our assertion that there's a buyer for anything under the sun among the TELEGRAPH'S readers. Just call Bell 4100 and a courteous clerk will help you word your ad.

### **Three Months' Production**

Three Months' Production Equals Year of 1914 It was disclosed in a report sub-mitted by officials of the company to John N. Willys, president of the Willys-Overland Company, on Satur-day, that all previous production rec-ords had been broken at the close of business March 31. This three months' statement shows a total of 47,465 cars manufactured and shipped. The month of March just passed leads with a total of nearly 20,000 cars—19,780 to be exact. This com-pared with the March, 1915, produc-tion of 7,005 cars and shows a gain of 12,775 cars in the single month. Still more remarkable is the fact that the number of cars shipped in the three months' time, with in cars of equalling the entire yearly pro-duction of 1914. In twelve months' time, with in crassed manufacturing facilities, pro-duction figures are nearly trebled, a manufacturing and marketing achieve-ment that has yet to be equaled in any industry. The report of the first quarter shows ATLANTIC CITY. J. ... The Ideal Resort Hotel.
