Justice Asked to Decide Unique Question in Sale

Carlisle, Pa., April 12.—Justice Hughes, of this place, has been asked to decide a rather unique question, following a dispute among real estate men over the sale of a property here. J. C. Eckels has brought suit against Mrs. Emma Eversman, claiming that she owes him slightly over \$70 in commissions, having a contract with him to sell her property. R. E. Shearer, another agent, actually sold the house and also asks for a commission. Following a hearing the justice reserved his decision in the matter.

Province of Chekiang Declares Independence

Shanghai, April 12.—The independence of the province of Chekiang was declared this morning at Hangchow, the capital of the province. The railway station was occupied by armed forces and troops were dispatched as far as Kashing.

This declaration of independence caused surprise in Shanghai, as it had been understood that the revolutionists intended to announce the independence of the provinces of Fukien and Hunan before that of Chekiang. Action in the case of the last mentioned was probably hastened by the news that 10,000 government troops were approaching Shanghai. These have since been recalled.

It is expected here that the 30,000 soldiers located in Shanghai and surrounding districts will go over peacefully to the revolutionary side, unless some hot heads, under the leadership of Chen Chi-Met, formerly Chinese minister of commerce and now an energetic revolutionist, should attempt to take the arsenal by force.

Deplores Lack of Logical Development in U. S. Navy

Washington, April 12.—Lack of logical method in the development of the American Navy was deplored by Rear Admiral Bradley A. Fiske, U. S. N., in a paper on "Naval Strategy" presented at to-day's session of the annual convention of the Navy League of the United States. The admiral did not appear in person, his paper being read by a delegate.

"In the elementary parts of the naval profession," said the paper, "we do very well. But of the higher branches, particularly of strategy we have a very poor conception. If we compare the strategical methods employed by, say Germany and us, we are forced to admit that the German methods are better adapted to produce economically a navy fitted to contend successfully in war against an enemy. In Germany the development of the navy has been strictly along the lines of a method carefully devised beforehand in our country no method, at least no logical method, whatever is apparent."
