General Pershing's Camp at Front

General Pershine's Camp at Front, April 12. (Via Aeroplane to Chihuahua April 13, via El Paso Junction. April 14.) — About forty mounted men believed to be Villa soldiers of General Tarango's command attacked last night an automobile supply train and were driven off after a short fight. There were no American casualties. One Villa bandit was killed.

General Pershing moved his camp south yesterday, penetrating far into Villa territory where he found numerous de facto government detachments under General Garza who gave the Americans a friendly greeting and co-operation. Aeroplanes were first to reach this new front. General Pershing traveled here in an automobile train of supply trucks, which made a record-breaking trip.

The fight, which occurred about 9 o'clock, was several miles in the rear of the automobiles carrying General Pershing and his escort. It lasted about twenty minutes. When the bandits who tried to capture one truck came up, the Americans poured in five volleys which ended the fight completely. There were two attacks, the first a slight one and directed against a forward truck. The last attack was a rush against the rear trucks during which bullets flew against the automobiles. The American soldiers thought they hit some of the bandits.

Made Record Flight in Mexico in This Aeroplane

LIEUTENANT EDGAR S. GORRELL LIEUTENANT HERBERT A. DARGUE.

Lieutenant Edgar S. Gorrell and Herbert A. Dargue, now with General Pershing's troops in Mexico, made a record flight the other day when they went from San Antonio, in Chihuahua, to Columbia, N. M., a distance of more than 350 miles in less than four hours. They made a single stop, that at Casas Grandes, where they heard reports that Villa had died of his wounds.

Lieutenant Dargue said: "There seems to be no doubt that Villa was wounded; conversations with natives and with physicians having convinced me that he was shot through both lexs and one of them being broken by a builet, while another shot lodged in his stomach. A man in that condition without medical attention could scarcely live long."

Swiss Towns

No city in Pennsylvania-nor in the -has greater opportunities for beautifying itself than Harris burg on the Susquehanna. We leave it to J. Horace McFarland to tell us how to do it, but we want humbly to plead a word for a little thing which could make our city fairly riot in the charm and beauty of color—window boxes. The cities of Switzerland especially Berne—are, by this one small device of window boxes, made so ravishingly beautiful that to stroll through the streets of those quaint old towns is to have the heart almost

ache with the joy of it.
In spite of her exceptional location on the picturesque Susquehanna, Haron the picturesque Susquehanna, Har-risburg has never, until recently, when stirred up a bit by the campaign of Mr. McFarland, made the least use of her opportunities. But now that the city government has begun to take
