LEADING STOCKS SOON RECOVER

Supporting Orders More Substantial; Activity Most Pronounced on Rebound

New York, April 14. — Supporting orders were of a more substantial character than on the previous day. Leading stocks soon recovering to or overfinal prices of that session.

Dealing were on the largest and broadest scale of recent weeks, the first hour's business approximating 300,000 shares. It was regarded as signifiant that activity was most pronounced on the rebound. Rails again displayed more firmness than any other group, but United States Steel also reflected steady absorption. Attention continued to focus on Washington, another severe break in Paris exchange being ignored. Bonds were steady.
