"How Hot Is the Sun?"

wrote a hot weather enthusiast to the editor of a well-known paper.

On the surface the sun is 10,000 to 15,000 degrees, he was told — quite hot you'll agree; but until its rays strike the earth, the heat is reduced to 75 to 100 degrees during the summer.

Even 75 degrees will make your butter run in gutters, and cause food stuffs to spoil.

Why not consider a new refrigerator now, and none other than a Notaseme, which will save you considerable ice in a season because of its heat-proof walls.

And Notaseme refrigerators are stone lined; having rounded corners, and not a seam in which germs could lodge and breed; easily cleaned; sanitary.

Easter Preparedness Is On In Earnest Now, With Our Suit Section the Center of Interest

WHAT a wonderful store this is, some of our good friends say, and yet it is not a ruling that we boast of looking for months ahead in order to be ready—for the pleasure of wearing a bright new suit is not to be over-estimated.

It kindles a new joy of living, and is no more than our pride should wish. The apparel we are showing these pre-Easter days is essentially for late Spring and Summer wear, as well. Calling particular attention to:

\$19.50—Among which are flare models showing the popular side pleats; shown in gabardines; serges; checks, and other favorites.

\$22.50—Semi-tailored model of fine serge; pleated and belted. At this price are also a host of other equally smart styles.

\$25.00—A truly wonderful assortment, featuring a straight line model of serge with novelty belt and pockets; pleated below belt.

\$27.50—Tailored model patterned after the Norfolk tendency with neatly tailored pockets and wide skirt. Popular shades.

\$29.50—Novelty belted front and back suit; in fact the entire suit possesses that novel style which many insist upon having.

We have not attempted to cover the entire assortment at these popular prices—there's much to be learned about the splendid linings, the favored fabrics, shades, trimmings and other details. Recent admiration centers upon braid bindings, especially smart on checks.

DIME IN HORSE'S SHOULDER Owner Placed It There Twenty-three Years Ago as a "Cure" Special to the Telegraph

Ravenna, Neb., April 14. — One of the old-time cures for "sweeney" shoulders on horses was brought to mind here by the death of Ernest Skochecopole's faithful old driving horse.

Twenty-three years ago the shoulder of this horse was lanced and a new dime placed in the wound to cause the flesh to grow back in natural form. A small lump on the shoulder always remained and after the horse had died this lump was cut open. Aside from being black in color the coin was not disfigured. The date, 1892, is as plain as on a new coin.

The party had been in this vicinity for nearly a week. Following the inspection of the McCall's Ferry dam, the collegians will leave for Philadelphia and New York. Elton D. Walker, dean of the school of engineering and professor of hydraulics, is in charge of the party.

SUFFRAGISTS WILL GO A-MAYING IN COUNTRY AND TOWN ON MAY 1

Halt "For the Nonce" Their Strenuous Election Plans to Twine Garlands and Scatter Flowers by the Way

Spring flowers, as the result of a State-wide plan adopted by the Pennsylvania Woman Suffrage Association's Executive Board and now being amplified by its county organizations, will be distributed in greater profusion, May Day, than ever has been their custom, previously, in Pennsylvania.

Halting, for the nonce, their primary election plans, the suffragists will revive the old custom of gathering May flowers and giving them to their neighbors and others early the morning of May 1.

In the smaller towns and hamlets, where it is possible, Maying parties will be formed and blossoms will be gathered in the woods and from along roadsides. In the cities, small blossoming plants will be purchased in large numbers, or secured by contribution. These will be potted or put with their nourishing earth in baskets and taken to the districts where the children seldom see flowers, except for the possession of others, and left on door steps.

The giving will be anonymous. In the towns, the groups will speed from house to house, ring the door bells, leave the flowers and hasten away. In the cities the districts where the workers live will be visited and the flowers in their bright red pots or woven baskets will be left on window sills, or hung on the door knobs to be found by wondering tots or grateful mothers. Urchins found along the routes will receive their share of the blooms to carry to their homes, there to be cared for in window boxes or small yards where they may bloom and bloom again.
