MARSHALL URGES STUDY OF CATTLE

Thinks State Should Raise More Animals to Supply Meat Markets Now

"Animals may be considered as machines for manufacturing the vegetable matter on the farm into more marketable products," writes Dr. C. J. Marshall, State Veterinarian of the Department of Agriculture who is in Europe.

"A sufficient variety of livestock should be kept on every farm to utilize as nearly as possible all forms of vegetable matter that it is possible to raise. Cattle manufacture roughage into beef, milk and butter. The hogs also do their share in converting waste material into pork, and the farmer who manufactures his vegetable matter into wool, mutton, pork, beef, milk and butter, has a commodity that is seven times as easy to market so far as hauling is concerned, and in manufacturing these various products there is left on the farm and most valuable fertilizer that it is possible to get.

"The farmer who hauls his vegetable matter to market and then hauls the fertilizer home to make the next crop, is wearing his horse power out on the road, and is using all his profits for feed for plants that is exhausted with each crop. Would it not be better to keep the vegetable material on the farm and manufacture it into the more desirable products?"

"Many farmers are now keeping one hog where they should keep twenty; no sheep where they should have from ten to fifty; are raising no colts where they should raise one, two or three a year; keep three or four cows where they should have twenty, and raise one or two heifer calves a year of an inferior breed and quality where it might be possible to raise ten to fifteen of better grade." The possibilities for improvement are great. We should take advantage of every opportunity to raise better stock and more of it."

Farmer to Pay Upkeep of Hired Hand's Auto

Danville, Ill. — A contract has been signed between Patrick Green, a farmer of Grant township, and Milt Brady, in which Green agrees to pay Brady \$30 a month for his services as a farm workman and to pay in addition for the upkeep of the latter's automobile. Green is to provide gasoline and oil for the machine throughout the season.

It has been the custom for the farmers of this vicinity to provide a horse and buggy to an employe when needed or to permit the employe to keep a horse and buggy on the farm, the farmer supplying the feed for the horse. This is the first instance, however, that has come to light of a farmer's paying for the upkeep of an employe's automobile.

AMERICAN FLYER MARRIES

Serving With Allies, Will Bring His Belgian Bride Home

London, April 14. — Lieutenant Theodore Marburg, Jr., of the Royal British Flying Corps, his bride, who was Baroness Gesselle De Vavario, a refugee from Lisle, Belgium, and his father, Theodore Marburg, Sr., formerly American Minister at Brussels, will sail for America Saturday, Lieutenant Marburg, whose home is in Baltimore, and the Baroness, of an ancient Belgian family, were married on Monday at the Church of St. Edward the Confessor in Netley, near Southampton, England. The bridegroom was an undergraduate at Oxford until last summer, when he became a pilot in the aviation corps of the British army.

Early last December he "met with an accident" while flying over northern France. He was in a military hospital for months, at times in a precarious condition. To save his life it was necessary to amputate one of his legs. His father joined Lieutenant

Marburg soon after he was injured and has been with him since. The young flyer is on furlough. When he returns here he will resume his duties as pilot, after providing himself with an artificial leg.

2 CENTS A GALLON RUNS CAR

Chemist Demonstrates Cheap Substitute for Gasoline

Huntington, N. Y., April 14. — The Standard Oil Company has met its Waterloo. This is the opinion of Dr. William B. Gibson, of Huntington; Counselor Le Roy Ackery and a number of others who witnessed the demonstration Tuesday of the use of a compound invented by Louis E. Richt, a German chemist of Farmingdale, which he asserts will revolutionize automobiling and make gasoline bills a thing of the past.

The compound will cost less than two cents for the equivalent of a gallon of gasoline, which now sells for

from 25 to 30 cents a gallon. The chemist declares he has operated his two automobiles regularly for the last two months with his new invention exclusively.

BIRTHDAY SURPRISE

Special to the Telegraph

Halifax, Pa., April 14. — A birthday surprise party was held at the home of Mr. and Mrs. George Cooper in honor of their daughter Edna's birthday last evening. Games and music combined to make the evening long to be remembered and refreshments were served to the following: Esther Wagner, Marie Grim, Edna Cooper, Edna Zeigler, Florence Sheesley, Catherine Sweigard and Hannah Sheesley; Clark Nace, Harry Rutter, Cletus Sweigard, Stanley Brannan, Byron and Charles Wolfgang, Dewey Cooper, E. M. Sweigard and Mr. and Mrs. George Cooper.

Youths More Reluctant to Marry Than Formerly

Milwaukee, Wis. — That Milwaukee youths are far more reluctant to marry before they are 25 years old than were the young men of ten and fifteen years ago is shown by statistics compiled by George F. Adams, deputy registrar of the city bureau of vital statistics.

Within the last two decades the average age at which Milwaukee men marry has jumped from 23 years to 26 years. Whether the increased cost of living makes the men hesitate, whether they are too bashful or whether the modern Milwaukee girl is more exacting than was her mother in the matter of her prospective husband's salary is not disclosed in the report.

Soulful Violinist Wins Then Loses Widow's Heart

Chicago, Ill. — Tony Dvoreck, of Rockford, by his soulful playing of the violin won the heart of Mrs. Jennie Malek, 1542 Haddon avenue, and she wrote to him to come and marry her, according to his statement to Judge Planagan, when arraigned on complaint of Mrs. Malek.

The woman had him arrested when he appeared at her home and kicked the door when he found another calling on her.

"I don't care anything about his old fiddling," Mrs. Malek told the court, "and never sent for him."

The judge advised Dvoreck to return to Rockford and dismissed the charge against him.

APPOINTED QUARTERMASTER

Special to the Telegraph

Sunbury, Pa., April 14.—Dr. Walter E. Drumheller has been appointed second lieutenant and squadron quartermaster of the National Guard of Pennsylvania. He will be attached to the Third Squadron, First Regiment of Cavalry.

CAN'T FIND DANDRUFF

Every bit of dandruff disappears after one or two applications of Danderine rubbed well into the scalp with the finger tips. Get a 25-cent bottle of Danderine at any drug store and save your hair. After a few applications you can't find a particle of dandruff or any falling hair, and the scalp will never itch.

SIMPLE APPLICATION THAT DISSOLVES BLACKHEADS

No more squeezing and pinching to get rid of those unsightly blemishes, blackheads. There is one simple, safe and sure way to get them out and that is to dissolve them. To do this just get about two ounces of powdered norexin from your druggist—sprinkle a little on a hot, wet sponge—rub briskly over the blackheads for a few seconds—wash the parts and every blackhead will be gone.

Pinching and squeezing out blackheads make large pores and you can't get all of the blackheads out this way—while this simple application of powdered norexin and water dissolves every particle of them and leaves the skin and pores in their natural condition. Any druggist will sell you the powdered norexin and about two ounces will be all you will ever need.—Advertisement.
