Foreign Holdings of U. S. Steel Show Decrease

Special to the Telegraph
New York, April 18.—When stockholders of the United States Steel Corporation examined the stock record books at the annual meeting in Hoboken yesterday, they found one significant development that has come out of the European war.

Foreign holdings of Steel common, as of March 31, the books showed, aggregated 624,469 shares, compared with 1,285,636 shares on March 31, 1914. This meant that the selling from Europe and Asia in two years had cut foreign investment in the junior Steel issue almost exactly in half.

TARKINGTON ON THE HYPHEN

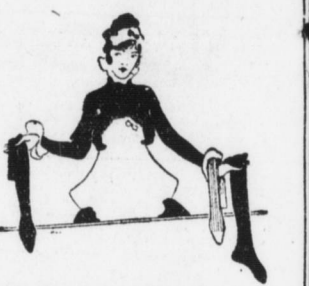

Booth Tarkington, whose new novel, "Seventeen," is being hailed by the reviewers as a realistic picture of American life as well as a humorous study of youth, made a speech a short time ago at a banquet, he remarked, that we may go even further in this direction, that we shall differentiate between "Buckeye Americans," "Kentucko-Americans," "Hoosiero-Americans."

Foreign Holdings of U. S. Steel Show Decrease

Another development since the preceding annual meeting was the shrinkage in the number of stockholders. At the end of March the books contained the names of 41,910 holders of Steel common, compared with 56,825 a year before the decrease being 26 per cent. The change was in line with past history of the corporation's stock, as the records show that on several occasions the number of share owners decreased on a rising market.
