Whiskey? No.
Not For Rheumatics

Don't drink whiskey if you have rheumatism, and be sure and keep your feet warm and dry, and drink plenty of lemonade.

This advice, says an authority, is helping, but as all know who have suffered, rheumatism is a stubbond disease and yields only to a remedy mighty enough to conquer it.

Many dectors have prescribed and hundreds of helpful druggists have advised a half teasp onful of Rheuma once a day, because they know that powerful Rheuma, harmless as it is, acts with speed and overcomes in a few days the most torturing case of rheumatism or sclatica.

Try Rheuma; H. C. Kennedy and all druggists sell lots of it and will return your money if two 50-cent bottles do not stop all rheumatic misery.
