Cockill's bunch did roam
Down to York and won the day—
Brought the bacon home.
Here's a hope they'll have a streak,
Winning day by day.
Till they get a lead that none
For can snatch away.

But they've got to have some help, Many games to win, Great, big crowds a-rootin', bo, With a noisy din.

E'er can snatch away.

None can play to empty stands-So, come be a sport. Blow two bits whene'er you can, Give 'em your support.

The recent payment of a time-worn warrant by Auditor General Powell in favor of John Gilpin suggests the possibility that it may have been partly to compensate the poor man for his uncomfortable horseback ride so interestingly recounted by the poet Cowper.

Harrisburgers who have traveled through Canada have often remarked the difference between English and American public buildings and how the official residence of the head of a province, and, in case of some of the old cities, of the mayor, is so far ahead of what we have here in the Union. Ottawa furnishes an excellent idea of how the official home of the titular head of a country, if not the actual governing officer, can be made most attractive. The residences of the provincial governors are far and away ahead of the homes of the governors of many of our own States and as for city buildings they compare very favorably with those of cities of the same size in this country. The Year Book of the Toronto Board of Trade, which has just reached this city, contains a striking illustration of the difference in official homes. The residence of the lieutenant governor of Ontario is shown in a handsome picture. It looks more like the Newport residence of a multimilitonaire than anything else and the contrast between it and the mansion of the Governor of the Imperial Commonwealth of Pennsylvania is a bit disconcerting. The Canadian official has a palace. The Governor of Pennsylvania has two remodeled dwellings thrown into one. The homes of the Governors of New York, New Jersey, Ohio and Massachusetts are nothing to brag of. The Ontario residence purs them all in the shade. It strikes home to us with force just now because the State is clearing the way for adequate Capitol Park property. ture. It looks more like the Newport

Pedestrians who cross the Mulberry street viaduct to the center of the city witness a pleasing sight. Where the bridge crosses Paxton creek the pigeons by the score congregate for a morning bath. The concrete bottom of the creek permits the pigeons to slip daintily into the water to the depth desired, where they flutter and splash like so many beauties along the beach at a seaside resort.
