Special Nemo Demonstration This Week

An expert on Nemo Hygienic Corsetry is at our Corset Department this week in the interest of women who want to know more about the corsets they wear. Hygienic service will be a feature of tomorrow's talk, and in all likelihood the Nemo self-reducing strap will be explained. This is a patented invention having the exclusive function of reducing and supporting the abdomen. The gentle friction between the straps and the body softens the excess flesh, which gradually disappears, permanently reducing the size and weight of the figure.

Two old favorites are announced at \$3.00; now reconstructed along latest fashion lines; proportioned to fit three distinct types of stout figures. No. 318—For short, stocky figures, with heavy abdomen and large back. Semi-elastic in-curve back confines and reduces hips and back. White coutil; sizes 24 to 36. No. 319—Same construction as 318, but proportioned for stout figures of medium height. White coutil or batiste; sizes 22 to 36.

A Mountain Playground For the Whole Family

Play golf, tennis, ride, drive, motor, fish or camp out—do any or all of these or do none of them—it doesn't matter in Rocky Mountain National—Estes Park, Colorado. You go there to have a good time, and you have it. If you want to climb mountains, gigantic Long's Peak, out-towering them all, invites you; or if you want to just downright "loaf"—there is no better place in the country in which to do it. If you are fond of long walks, Rocky Mountain National—Estes Park furnishes you with 100,000 pine-scented acres. If you would rather fish, the two million native and rainbow trout that are put into the streams each year insure lively sport in that direction. If you would like to drop in at my office and let me tell you about the wonders of this Park, the accommodations, the hotels, the boarding places, ranch houses, the cost of living out there, the daylight trip to and from the park, if you go via the BLUE RIVER Route, and the good times the kiddies can have with the Park burros. If it will be more convenient for you to send me your name on a postal, I will answer by sending you some mighty interesting pictures, maps, and reading matter.

Yet their case is not hopeless. A recently discovered combination of assimilative agents has made a great advance in the treatment of this condition, and for strengthening the nerves. This remarkable preparation is called Sargol. Six strength-giving, fat-producing, assimilative elements of acknowledged merit have been combined in this preparation, which is endorsed and used by prominent people everywhere. It is absolutely harmless, inexpensive and efficient.

A FEARLESS PHYSICIAN

Such a physician recently remarked: "The wonderful power of Lydia E. Pinkham's Vegetable Compound over diseases of women is not because it is a stimulant, nor because it is a palliative, but simply because it contains the very elements needed to tone up the female system and strengthen the depleted organism." Of course that is so, otherwise it could not succeed as it has.—Advertisement.
