SHOES FOR THE WOODS Shoes that may be comfortable for ordinary walking are apt to be too small for use when carrying any weight. Twenty-five pounds carried all day will make a tremendous differ-ence to the feet. The shoe should be big enough to allow the foot to spread somewhat, but not so big as to let the foot move around in it as this means chafing and blisters. The Navy drill book says of the marching shoe: "A common defect in shoes is that they are too tight over the instep is too slack, wrinkles will form. . . . The nmer edge of the shole thick and wide, projecting be-yond the upper leather. The heel should be low and broad, and the too of soul length that there will be no pressure on the ends of the toes or toe-nails." The army marching shoe is built on these lines and is an excen-tion. 9059 (With Basting Line and Added Seam Allowance) Girl's Coat 8 to 14 years.

Every girl needs such a coat as this ora It completely covers and protects the frock, it is easy to slip on and off and it is available for many different uses. Here, it is made of a light weight wool material and without a lining. The cloth shows black and white checks and the trimming is pale green linen. The combination of materials is a much liked one and it is smart and attractive. If the coat were wanted for the automobile, it would be well to use a little heavier material or perhaps to line with something warmer, for motoring is a cool sport whatever the
