EVERY HOUR YOU ARE OPEN TO ATTACKS OF COUNTLESS GERMS

CHAPTER 67 Immunity - Disease Germs Are Bad Only Because They Are Permitted to Live in Surroundings Where They Do Not Belong - Horses Are Useful Creatures But if We Invite Them Into the Parlor We Can Blame Only Ourselves for the Rumpus and General Destruction of Valuable Things That Will Be Sure to Follow - Yet Who Will Say Horses Are Bad? Charles Clyde Sutter referring to the natural defense of the body against disease, says: "We are continually in the presence of disease germs; almost daily we are exposed to contagious or infectious diseases, yet the body in health is able to protect itself and ward off the casual agents of disease. Any disturbance of perfect equilibrium in the functions of the body may be described as disease. The severity of the disease is determined by the intensity of the cause and by the state of the organism and its power of defense. The first general biological law or general attribute of living matter is that of self-preservation. The first biological acts of living protoplasm are therefore nutritional. For perfect health there must be complete appropriation, assimilation, and elimination. "It is impossible to prevent the entrance of bacteria into the digestive tract with our food. Against this invasion the normal human individual is protected by the acidity of the secretions of the stomach. The body is protected against the poisonous substances formed in the intestinal tract by the secretions, the influence of the lining membrane of the intestines, the liver, which alone destroys two-thirds of the poison, and by the various glands throughout the body which have the power of destroying toxic substances, and also by the organs which aid in their elimination. "It will thus be seen, in accordance with natural law, that the organism is supplied with powers of nutrition which induce resistance, which enable it to protect itself by the destruction, by the counteraction, and by the elimination of deleterious agents, and thus, by adaptation, provide for the re-establishment of the disturbed equilibrium." Notwithstanding the certitude of these frequently demonstrated truths the school teachers of the United States, who are also the victims of confusion in high places, make no attempt to influence the young to a proper understanding of the laws of nutrition. Most of them are familiar with the erroneous but popular doctrines of Hutchinson and Lusk, but few, if any of them, know that refined foods of high caloric value, containing all the so-called scientific proportions of proteins, carbohydrates and fats, but robbed of the mineral salts, colloids and vitamins natural to unrefined food, cause a disturbance of the functions of assimilation and elimination. They do not know that the most common of these disturbances of elimination is constipation. They do not know that constipation, which seriously interferes with the body's power to resist disease usually yields to dietetic treatment in which the salts, colloids and vitamins are permitted to remain in an undisturbed state in the food. They do not know that the creation of immunity as the greatest defense of the organism against infection depends largely upon food of a proper kind. They do not know that the creation of defensive acts of the organism can in no manner be said to rest upon any scientific formula yet devised of carbohydrates, proteins and fats, minus the mineral constituents of natural food. They do not know, for instance that calcium salts, so wantonly removed from most natural foods, act upon the blood and blood vessels by tightening the muddy permeable vascular wall, thus promoting coagulation and stopping exudation. They do not know, as summed up by Kayser in his review of the importance of calcium salts for the therapy of internal affections, that these salts influence the excitability of the nervous system by depressing the latter, especially the vegetative and autonomous, and are therefore indicated in internal medicine especially for tetany, epilepsy, hay fever, and asthma, in all of which they are used with success. They do not know that through their ability to increase the phagocytic power of the blood, calcium salts appear to come into question for the therapy of infectious diseases, like pneumonia and tuberculosis, and that they also prevent oxalic acid poisoning. Not knowing the importance of calcium in the diet, they can have no suspicion of the importance of phosphorus, potassium, manganese, iron, or any of the other mineral salts, colloids, and vitamins so indispensable to the normal physical and mental developments of their pupils. In consequence of their ignorance of these fundamental truths they are unable, while learnedly discussing many of the ornamentalisms and dogmas of the classroom, to direct the growing child in matters that have a greater bearing upon its future life than all botany, geology, geometry, geography, and astronomy combined. The missing link in our modern system of education is to be found in the darkness which thus separates teacher from child.

Diseases That Show In Your Face?

It matters not how little confidence we may have in our ability as mind readers, all of us by lifelong practice are face-readers. A considerable part of our attitude toward our fellows is determined by what we see in their faces. Most of us have become surprisingly accurate face-readers in regard to moral and emotional tendencies. And we also read just as well when the face indicates either internal or external disease. The tense, drawn features indicating continued pain from some internal ailment, or the breaking out of one of the many skin diseases, which speak only too plainly for themselves, because most, if not all skin diseases show on the face sooner or later. Impure, impoverished or impaired blood are the prime causes of disease. Therefore the blood should be nourished, as well as purified. One of the striking changes in modern medication is the way the use of iron for blood troubles has decreased. It was discovered that iron was not a blood food. When people are suffering from poisoned blood, or impure or impoverished blood they need a remedy that will not only drive out the impurities but that will nourish the blood at the same time. S. S. S., the standard blood purifier for 50 years, is purely vegetable and will absolutely drive out the impurities and nourish and tone up the entire system, both physical and nervous. Purify and nourish your blood by taking S. S. S. If you need special advice, write Medical Department, Room 18, Swift Specific Company, Atlanta, Ga.

WILLIAM B. SCHEETZ BURIED Special to the Telegraph Dauphin, Pa., June 5. - Funeral services for William B. Scheetz, a Civil War Veteran who died on Memorial Day, were held Saturday morning, at his former home, in North Erie street. The Rev. J. K. Robb, pastor of Zion Lutheran Church, was in charge and burial was made in the Dauphin cemetery. The pallbearers were John Q. Ferris, William Poffenberger, Frank Pitt, Samuel Maurey, Emanuel Feaser and Daniel Seiler. The funeral was attended by many people, some of the out-of-town ones being the order of Masons from Marysville.

ADAMS CITIZENS APPEAL Special to the Telegraph Gettysburg, Pa., June 4. - Eleven citizens of Adams county filed an appeal to the county auditors' report yesterday afternoon in the Prothonotary's office objecting to various items, claiming that the expenses connected with them were excessive.

SEWING CLASS PICNIC Special to the Telegraph Dauphin, Pa., June 5. - The sewing class, taught by Miss Margaret Brooks, closed their meeting on Saturday afternoon with a picnic at the home of their teacher.

HONOR WINNERS ANNOUNCED Special to the Telegraph Carlisle, Pa., June 5. - Announcement of the honor winners of the Carlisle High School Senior class was made to-day. The class this year numbers 59 and is next to the largest in the history of the school. Miss Eva K. Reitzel of Carlisle is valedictorian. The commencement exercises for the school will be held on Thursday, June 15.

Resinol the easy way to heal sick skins. Resinol Ointment, with Resinol Soap, usually stops itching instantly. Unless the trouble is due to some serious internal disorder, it quickly and easily heals most cases of eczema, rash, or similar tormenting skin or scalp eruption, even when other treatments have given little relief. Physicians have prescribed Resinol for over twenty years. Resinol Ointment, with the help of Resinol Soap, clears away pimples and dandruff. Sold by all druggists. For trial size free, write to Dept. 11-R, Resinol, Baltimore, Md.
