"Wear-Ever" Demonstration Closes To-morrow

The demonstration will end, but the aluminum will Wear-Ever.

And that is the story in a nut shell as told by a cooking expert.

Wear-Ever Aluminum Stew Pan, 45c
—An Anniversary special. Deep style; 2-qt. capacity.
BOWMAN'S—Basement.

Consult Miss Cox, a pattern expert, regarding your sewing problems. She knows patterns from an idea to the finished dress. She will tell you some new facts about Ladies' Home Journal patterns

A PORTABLE DARK-ROOM FOR PHOTOGRAPHERS
A portable dark-cabinet has been invented, which does away with many inconveniences encountered by photographers in developing their negatives without the advantage of a suitable dark-room. A metal framework supports a table or shelf adjustable to any desired height. Extending above the table are two rods supporting a square frame to which is attached a large hood. This hood completely envelops the table and affords enough room for the upper portion of the photographer's body behind the table. A hole in one side of the covering is used for introducing the materials in the cabinet. Another hole in its lower part is provided with a strap of elastic band, which passes around the waist of the operator as he enters the hood. The cabinet is lighted by a window of ruby glass directly over the table and opposite the photographer. Fresh air is supplied by means of a mask with a rubber tube leading to the outside. Tourists who take many pictures can make good use of this cabinet.—Popular Science Monthly for June.

A WHIPPING MACHINE TO CURE NERVOUSNESS
It is considered beneficial to be whipped or "spanked," provided it is done mechanically, says the Popular Science Monthly for June. In the mechano-therapy departments of up-to-date institutions, the "whipping post," a mechanical device for therapeutic padding, is an accredited healing-machine.

You are whipped by straps of heavy cloth or leather attached to two rapidly revolving posts. When you take the treatment you step backward into the flying whips and receive their blows upon your legs, back, abdomen or chest, depending upon the malady from which you are suffering. The impact of the straps is just sufficient to set the blood in free circulation. There is no smarting, stinging sensation, because the straps are broad enough to eliminate any possibility of a cutting blow. You are padded rather than lashed. The "whipping post" is valuable in many types of nervousness.

MOTOR HORSE-AMBULANCE
Differing from other previous types of motor ambulances for sick or disabled horses in that it is a truck and trailer principle and not a self-contained vehicle, the latest unit in horse ambulance has a low platform trailer into which the horse may walk with ease or be hauled in on a special device if unable to stand up.

The new equipment consists of a one-ton motor truck and a trailer, the forward end of which is supported on the truck. The trailer has a specially low platform and a tail gate which may be swung down to form a bridge to enable the sick horse to walk into the trailer with ease. A second independent floor on rollers is provided in the trailer. When the horse is so disabled that he cannot stand up this platform is rolled out of the trailer and down the lowered tail gate to the street, where the animal is securely bound to it with his head on a pillow to prevent injury. The platform is then hauled into the trailer by means of a steel cable wrapped around a drum carried in the gooseneck of the trailer-frame and revolved by a hand-crank.

Two stanchions are provided at the center of the trailer at each side to support the ends of a canvas sling passed under the stomach of the horse to take the weight off his feet when one of his legs is injured.—Popular Science Monthly for June.
