MAXWELL RECORD CAR IN SERVICE

Mileage Now Surpasses Circumference of Globe; U. S. Soldiers Make It Favorite

The famous nonstop Maxwell, the car that started the automobile world last January, when it piled up a mileage of more than 22,000 in forty-four days without a stop of the motor, has been making more fame for itself. The car is back in its garage at the Lord Motor Car Co., in Los Angeles, after an extended tour of Southern California, the Mexican border and Arizona. Its speedometer now registers a total mileage of 30,635 miles, a distance surpassing the world's circumference by more than 5,000 miles.

Immediately following the record run, Charles C. Miller, Jr., district salesman of the Maxwell motor car, with headquarters in Los Angeles, was ordered to the wheel of the Champion. He pointed its nose southward and the trip through Southern California, Mr. Miller drove the car into Arizona and down to the Mexican border. The nonstop car was a favorite with the troops along the border. It rendered valuable service and the soldiers vied with one another in taking turns at the wheel.

Miller circled the entire State of Arizona, networked the interior. He climbed every mountain, plunged through every sand pull, forded every river and entered every city and village in the State, so that every citizen in Arizona had the opportunity to view the title holder.

As a rule, the roads were of the most discouraging sort. Practically all of Miller's driving was done at night, the heat of the day during the day being unbearable.

Although encountering the hardest going in the west, when the Maxwell returned to Los Angeles, it was in perfect condition. Not even a slight mechanical replacement was necessary. "No car was ever given a harder pounding," said Miller. "In spite of the rough roads, the Maxwell covered mountain paths, swollen streams, and blinding blasts of sizzling desert sand, not once did the nonstop champion falter. Just to show what is in her, I let her run on the desert for the last 307 miles, over poor roads for the most part, were negotiated in just fifteen hours. San Bernardino to Los Angeles, sixty-eight miles, we made in just an hour and a half."

Maxwell Has Veteran in Europe
Christian Lee, a veteran in the motorcar business, has been appointed general manager of the Pullman Motor Car Company, of Detroit, as general European representative for continental Europe. Mr. Lee has led a picturesque career in Europe. He is a licensed aviator. His French license, but in spite of this handicap, Mr. Lee has never had an accident. When the war started, Mr. Lee served with the American Expeditionary Force in close touch with the situation in Europe and says it will be a considerable time before the factories will be ready to manufacture motorcars. This is the reason that their machinery is in bad shape.

Bell Motor Increases Capital and Buys Plot

The Bell Motor Company, York, Pa., organized a year ago, has been quietly preparing for important activities in both commercial and pleasure car fields, and yesterday announced ambitious plans for a big new factory at York. The company has increased its capital stock that will enable them to market their cars in the quantities necessary to place the Bell name in the forefront of their class.

The capital of this company is now \$1,000,000, largely held by outside interests drawn to the Bell company during the first year of operation. A fifteen-acre site for a model factory has been secured at Rockburn Station, East York, building to be completed and through the cooperation of the employment of a thousand operatives during this year.

Two models will be produced in this factory—a light truck and a high-class pleasure car. The commercial model will be a straight 1,000-pound truck, equipped with electric lights and starter, a strictly commercial car and in no wise related to the pleasure car. The company declares that in both design and service it is second to none in its price class.

The Bell cars—both classes—have become a reality ever since the factory became a reality going concern, less than a year ago, and this great extension of working room and capital will give the company the opportunity to meet the insistent demand for the trade for much wider representation. Very early national distribution of the Bell output is assured by the optimistic expressions of the dealers who have handled these cars or unsuccessfully sought stock to meet the demand for both extraordinary service and moderate price.

LUBRICANTS USED BY RACE DRIVERS

Resta, O'Donnell, Rickenbacker, Mumford, Oldfield, Christianse, are some of the famous names in automobile racing circles. Usually one or the other of these six speed kings comes out on top in the big racing events. Dixon's Graphite Automobile Lubricants are the winners every time. Every one of these famous drivers uses and heartily endorses Dixon's and practically all the other boys, who lead them a merry chase in all the big races and sometimes slip into the "charmed circle" of winners, are disciples of Dixon. As sure as the clock ticks, Dixon's monopolize all the places in the big races and instances of an outsider creeping into the front ranks in the big races are about as rare as the proverbial snakes in Ireland.

LARGE ORDERS FOR BALDWIN
Dampier, Pa., June 24.—Steel trade circles yesterday that the Baldwin Locomotive Works has received an order to build 400 of the 1000 locomotives which the Russian Government intends to purchase in this country. The American Locomotive Company is to build a like amount while the Lima Locomotive Company will build 100 each. The order for 35,000 tons of 7 1/2 percent rails given by the Russian Government is expected to be divided as follows: Steel Corporation, 175,000 tons; Bethlehem Steel, including Pennsylvania and Maryland Steel, 30,000 tons; Cambria Steel, 4,000; and Lackawanna Steel 40,000 tons. The report could not be confirmed at the Baldwin office yesterday.

TO SHOOT DOGS IN CAPITOL PARK
Samuel E. Rambo, Superintendent of Public Grounds and Buildings issued an order to the owners of dogs and cats to the effect that all dogs and cats destroying plants and flowers in Capitol Park will be shot.

PULLMAN MOTOR DELIVERY CAR

Latest Product Expected to Duplicate Success of This Season's Pleasure Car

Encouraged by the instantaneous success which attended the introduction of the 1916 pleasure car model, the Pullman Motor Car Company has just made formal announcement of the completion of gigantic plans for the production of the Pullman light delivery car, embodying the many sterling features of the Pullman touring car, combined with all of the latest improvements to be found in light truck construction.

The results of this insistent pressure on the company is the announcement of its plans for the building of a light delivery car. When they were advised a few days ago that the company had acquiesced to their pleas, there was an immediate and almost universal call for the new light delivery car.

Many of the dealers in urging the Pullman company to manufacture a light delivery car have cited instances of hundreds of merchants owning Pullman pleasure cars who want the same for their delivery service. The principal reason for this satisfaction is pointed out, is the positive proof of the low up-keep owing to the remarkable gasoline-mileage records which the Pullman cars have made.

The Pullman light delivery car is brought out on a special chassis, sturdy for maximum loads but light enough for plenty of snap and ample room for the driver. The chassis is exceptionally long for a delivery car of its class. The normal load capacity is 1,000 pounds, filling all the requirements of a hundred different forms of business.

An important mechanical advance, usually found only on cars of much higher price, is the independent master-slave system of the disk water-proof high tension type, wholly independent of the starting and lighting system. This double electric system is recognized as the standard of high-class construction and its superiority over the single unit system is now generally admitted by leading automobile engineers, as it insures ignition at all times.

The special full 50-inch cantilever rear springs, too, are unique in a light delivery car of this class, being heretofore confined mainly only to cars of much higher price. Their adoption by the Pullman car has made it an evidence of the manufacturer's progressive ideas and plans. The cantilever springs are especially heavy and made of highgrade spring steel. They are swung from underneath the full floating rear axle, and extend to the center of the car body. This gives a long fulcrum and affords spring resiliency where it is most needed, with center control, with emergency brake lever forward of center and out of the way. A 9 1/2-gallon gasoline tank is carried in the bowl.

ROADS IN SHAPE FOR MOTOR TOUR

Harrisburg Autoists Will Find Highway Good All the Way to Johnstown

With the past few days of pleasant weather and assurances from highway officials that the roads will be in good condition, renewed interest has been taken in the scenic tour of the Motor Club of Harrisburg next Tuesday and Wednesday.

Secretary J. Clyde Myton yesterday received word from the State Highway Department officials that the William Penn Highway and the Lincoln Highway, which will be traversed on the trip from Harrisburg to Johnstown and return, will be in good shape by next Tuesday and that large gangs of men are at work on sections which had been damaged by the recent rains.

A number of new entries have been received from last week and Secretary Myton has decided to keep the entry list open until next Monday night so that all members of the club can make last-minute preparations to attend what promises to be one of the most delightful events ever conducted by the local motoring organization.

At Johnstown on Tuesday night arrangements are being made to give the Harrisburgers a big evening. The Johnstown Chamber of Commerce will have a theater party for the ladies on the tour and the men will be entertained at an informal smoker which is going to bring forth some features in the fun line.

There is a keen interest being taken in the big picnic arrangements for lunch at Alfrata Park, near Huntingdon, on Tuesday. Many of the members will take lunch along and coffee and sandwiches will be served at the park for those who desire them.

The first car will leave Market Square on Tuesday morning at 6.31 o'clock and there will be several checking stations for ten-minute stops en route. On the second day the first car leaves Johnstown at 7.01 o'clock and after a three-hour stop for lunch and sightseeing at Bedford Springs the motorists are scheduled to return to Harrisburg about 5 o'clock Wednesday afternoon.

PLAYS AND PLAYERS
In this column, under date of June 15 an item appeared which had to do with a statement that Nat Goodwin had attached the plant and property of the Mirror Films, Incorporated, for \$13,000, alleged to be for salary. This statement was incorrect. Investigation has shown that on June 7 Mr. Goodwin filed a suit against Mirror Films, Incorporated, for breach of contract and obtained a warrant of attachment, which

was later vacated. The point is that neither Mr. Goodwin nor others, as was reported, have obtained judgment against the corporation.

Famous Players Film Co. have announced a scenario offer which they claim is the most remarkable of any yet made. They offer \$1,000 each for 100 plays they accept. The announcements are appearing in large national magazines.

J. G. Hawks, of the Triangle-Ince staff of photoplay authors, this week completed the working manuscript of "Somewhere in France," the last story of the late Richard Harding Davis. It will soon be produced for release through Triangle.

If you have not already seen the vaudeville performance at the Paxtang Park Theater this week, you have overlooked what is said to be one of the best entertainments of season. The bill offers as a feature attraction Evelyn May and company in a one-act comedy play, entitled "The Live Wire." Nor does the act in any way belie its title. It is a

strictly "live wire" performance in every respect. Other acts on the park bill are of real big time caliber and support the headliner in a way that makes the park show one of those well-balanced performances that everyone enjoys.

This is the last opportunity to witness the Majestic's show. The bill made up of a delightful "girl" act, entitled "Mr. Ince's Quisitive," featuring the clever comedian, Earl Cavanaugh; Doc O'Neil, the clever "nut" comedian; Norton, two clever men, who entertain with several songs new to Harrisburg, and who also hand out a lot of non-sense; Henry and Adelaide, pleasing young couple, who offer a singing and dancing act that is out of the ordinary; and Pete and His Pals, two men and a funny mule. The chief attraction for the first half of next week is "The Devil's Daughter," a musical comedy with nine people. Other acts include: Brocius and Brown, two men in a comedy bicycle act; Mr. and Mrs. McCann, in a comedy sketch, "Who Said Peace?" together with two other acts.

The Colonial has succeeded in booking "Fatty" Arbuckle for to-day in a new five-reel comedy which was shown at the Colonial also, called "Bright Lights." The picture features H. B. Warner, who has been seen in several other features to good advantage. A clever drama which hits at an evil of society, which is marriage with nine people. Other acts include: "Comedy Sketch," "The Come-Back," and Tom Moore and Alice Nilson in another "Who's Guilty" story.
