What the Doctor Asked

One of the questions the examining physician for life insurance is apt to ask the applicant whose heart is skipping beats or is fluttery is— "Do you use coffee?"

The reason coffee is suspected is because the physician knows that the drug, caffeine, in coffee disturbs the nervous system, races the heart, and is responsible besides for conditions which often become serious.

It's a good thing to stop when one reaches the danger zone. It is better still, to safeguard health and avoid trouble by quitting coffee and using the famous pure food-drink

POSTUM

This delightful beverage is made of finest wheat, roasted with a little wholesome molasses, and while it tastes much like mild Java coffee, it contains only the nourishing goodness of the grain—no coffee—no drug—no harmful ingredient whatever.

There are two forms of Postum. The original Postum Cereal must be boiled. Instant Postum—a soluble powder—is made in the cup with hot water—instantly! Both forms are equal in flavor, and cost about the same per cup.

Thousands of people have found the way to renewed health by a change from coffee to Postum. There are no coffee "questions" in Postum.
