WEEK MORE IN JAIL TO THINK

Father Still Isn't in Proper Frame of Mind to Come to Court

One week's stay in prison hadn't improved James K. Richwine's frame of mind in the opinion of the Dauphin county court, so Richwine today was given another week in his cell to think it over. Richwine was haled into court a week ago for failing to obey an order to pay \$4 weekly for the support of his two children. The prisoner was rather defiant about it and Judge Kunkel sent him back to jail. To-day Richwine appeared again and his counsel, W. J. Carter, had practically convinced the court to permit his client to leave jail under bail and get a job. Richwine said he would get a job either in Steelton or in Middletown. "I'm liable to stop over and get a job at the steel works, or then again I'm liable to go on to Middletown and get work," said he. "Just liable to, are you?" inquired President Judge Kunkel. "Seems to me there should be some insurance on this liability. Even yet," went on the court, "you don't seem to be in quite the proper frame of mind to come in here and ask for leniency. So well send you back to jail again until next Monday. In the meantime you can think the matter over."

KEYSTONE STATE SENT 12,704 MEN

Fourth Infantry Had the Majority Honors of the Mobilization Camp

Official mustering reports show that 12,704 National Guardsmen were dispatched from the Pennsylvania mobilization camp to El Paso under the call of President Wilson. This is not far from the total number furnished by the Keystone Commonwealth during the whole of the Spanish war. Only one other State has furnished more and that is New York. The official figures obtained from the camp last night when the Eighth regiment and the hospital troops left the camp showed 648 officers and 12,056 men entrained for the border. According to ex-Governor Samuel W. Pennypacker's history of Pennsylvania this State furnished 692 officers and 12,268 men under the first call of the President in 1898 and supplied 6,870 more to fill up regiments. A number of the first men called failed to pass the physical test, which was not so stringent, however, as that through which the Keystone State men now on the border have undergone. At Camp Brumbaugh, it is estimated that 14,700 men were at the mobilization camp so that approximately a seventh failed to pass the surgeons or declined to enlist. The latter class was very small. The mobilization has been highly commended by authorities for its speed, but the delays due to the unfamiliarity with government methods in mustering and the severe physical examinations caused the division to be slow in starting for the border. The men furnished by organizations is as follows:

Organization	Officers	Men	Total
First infantry	53	876	929
Second infantry	54	984	1034
Third infantry	51	872	923
Fourth infantry	56	1285	1341

PARALYSIS CAUSE NOT DETERMINED

Dr. Dixon Gives Important Advice on How to Prevent the Infantile Disease

State Commissioner of Health Samuel G. Dixon in a week-end health talk gives some valuable suggestions about the way to avoid conditions likely to cause infantile paralysis. The commissioner says frankly that the cause of the disease is not yet known.

Dr. Dixon says: Infantile paralysis is a disease that affects the nervous system. It often causes death, and again the acute stage frequently subsides and leaves paralysis of one or more of the limbs that heretofore has often lasted through life.

To-day we do not know what causes the disease, therefore preventive measures must be broad. You must keep the children away from insect life, such as flies, mosquitoes, fleas, bed bugs, ticks, ants, lice, etc. You should see that all rats and mice around the building are killed. Pet cats and dogs should be washed with a two per cent. carbolic acid solution to destroy insect life. Everything should be kept clean about the home, including the children's bodies and clothing.

Children should be fed well but not indulged in large quantities of water, ice cream or other frozen dishes on a full stomach, as that will often cause acute indigestion and render them susceptible to other diseases. In other words, the digestion should be guarded carefully.

Children should have plenty of sleep. They should not associate with other children that are sick. Their homes should be well ventilated—but screened from flies, etc., and any flies that happen to enter the building should be killed. All foodstuffs should be protected from flies, dust, etc. Fruit and vegetables eaten raw should be thoroughly washed in clean water. Children's mouths should be rinsed out and their throats gargled with Dobell's solution after each meal. If the children are too young to rinse or gargle, wash the mouth with a piece of fabric, muslin or linen, that has been dipped in Dobell's solution.

Children should be kept out of crowded places and be denied the frequent access to crowded halls of entertainment during our present threat with epidemic.

The youngsters should not be permitted to sit on the damp ground nor have their bodies thoroughly chilled, day or night. They should not bathe in cold water until their circulation is interfered with and they become chilly and blue.
