Only a limited number at 17cof our competitors for Saturday Specials---KENNEDY'S----321 Market Street normal pancreas, one of the vital or-sans of the body, according to the investigations of Zulzar, Pfluger, Cohnheim, Minkowski, Norten, Do-minicis, Kleiner and Meitzer, seems to set up an impenetrable barrier. Well indeed may the scientist who is looking for strange reasons to ex-plain the origin of diabetes be asked these questions: How, even in health, can the human body profit by the consumption of enormous non-utiliz-able quantities of starch, glucose or sugar? How long can the body tolerate this overload or excess? To what does this excess lead? Can it lead to disease call that dis-some other name? In diseased conditions of the con-trolling organ the excess or wate glucose is eliminated through the kid-neys, yet all America is encouraged to use refined sugars, starches and glucose, in glucose is neormous quantities, not-withstanding the fact that in order to pass into the circuiation at all, be-yond the fixed limit of 0.1 per cent., a vital organ, the pancreas, must first break down and become diseased, or in other words, permit diabetes to de-velop. It is well known that the body in the set man to fixed base to de-sore of the fixed limit of 0.1 per cent., a vital words, permit diabetes to de-velop. **OODS** THEY BUILD OR DESTROY F AMAZING BUT RARELY SUSPECTED TRUTHS ABOUT THE THINGS YOU EAT

CHAPTER 86

(Copyright, 1916, by Alfred W. McCann.)

By ALFRED W. McCANN

CHAPTER 86. There is a limit to all physical en-durance, including the endurance of vital organs and glands burden-are to be found which indicate that it is the bombardment of refined sugars which finally causes the pancreas to break down, destroy-ing the body's natural defense against diabetes. From the increased tolerance of the hiabetic for honey, which contains the nineral salts and colloids natural to flucose and other refined and demin-ralized sugars, observed by Davidoff, we can draw no other conclusion than he one which has been running
