

WILL ORGANIZE GOOD ROADS FUND

Pennsylvania Gets \$239,050 in First Year of Federal Aid

Washington, July 30.—As the first step in the federal government's part of spending \$150,000,000 on good roads during the next five years...

The \$150,000,000 is to be paid half by the government and half by the several States, apportioned among the latter according to their respective area, population and rural route mileage.

Rules and regulations to put the federal aid law as it is popularly known, into prompt operation are now being drafted by the Secretary of Agriculture...

Approximate apportionments of this year's \$5,000,000 appropriation, less 3 per cent. for administrative expenses with those of other years in proportion, are as follows:

Table with 2 columns: State Name and Amount. Lists states from Alabama to Wyoming with their respective apportionments.

Must Be Approved. Routes and construction materials of the new roads are to be finally determined by the Secretary of Agriculture.

Whether the law shall be main-traveled trunk lines, connecting inter-State highways, or merely small sections scattered throughout the State is also left to the discretion of the Secretary of Agriculture.

Machinery For Action. The machinery for co-operative action is substantially as follows: State desiring to secure their share of the federal funds will, through their highway commissions or departments, file formal applications...

upon completion of the roads, and is also authorized to make partial payments as construction proceeds.

The construction work and labor in each State is to be done in accordance with State laws under immediate supervision of the State Highway Department, subject to inspection and approval of government engineers.

Selection of road routes, as well as their type and structural composition, is also left primarily to the State officials, subject to approval or rejection by the Secretary of Agriculture.

Must Equal Allotments. To secure a share of the federal funds, State legislation or court must appropriate sums equal to the

federal allotments. The act also requires formation of State highway commissions, or a similar State agency, to have charge of the States' part of the work.

Four States, Indiana, South Carolina, Georgia and Texas, have no such commissions or corresponding organizations, but to secure federal funds they must be organized.

Where States, like Illinois, are prohibited by their constitutions or otherwise prevented from acting under the proposed contributory plan, the act provides that the federal appropriation may become available to separate counties when they shall match the govern-

ment's contributions, such roads, of course, being built only within the contributing counties.

To give the States ample time to build roads and to guard against hasty or extravagant construction, the law also provides that unexpended federal appropriations each year shall be available during the succeeding year, while this year's allotments to States which have no highway departments shall be available for three years, to give State legislatures time to create such departments.

For enforcement of the provision requiring the States to maintain the new roads without federal assistance, the Secretary of Agriculture is authorized to disapprove of further roads projects from such States or their civil subdivisions and deny further government

aid if roads are not put in proper condition after four months' notice.

Development of a federal corps of highway engineers is one of the results expected from the new law. Civil service examinations will be held August 8 for many more highway engineers needed by the government.

BREWSTER SALAD

Cut small, crisp lettuce leaves of uniform size in halves lengthwise, using the scissors, and arrange in two parallel rows, overlapping one another, on an oblong silver dish. Place a bunch of cold, cooked asparagus in the center and arrange a band (at originally tied) of the following mixture: finely chopped white of one hard-boiled egg, one tablespoonful of chopped pickle, one-half tablespoonful

of finely chopped parsley and one and one-half tablespoonfuls of chopped, canned pimento. Pour generously over all a French dressing made of mixing one-half teaspoonful of salt, one-eighth teaspoonful of pepper, five tablespoonfuls of olive oil, two tablespoonfuls of vinegar and a few drops of onion or lemon juice if liked. Shake thoroughly before using.

SUMMER DRINK

A delicious hot weather drink may be made by boiling together for a few minutes three pints of water and two pounds of sugar, juice of two lemons and two ounces of tartaric acid. Set it away to cool. Beat the whites of three eggs to a stiff froth, slowly sift in half a cup of flour and stir until smooth. Then flavor with half an ounce of wintergreen essence if liked, or, better still, mint. When syrup is nearly cool

stir in the eggs. When cold put it in a stone jug which has been scalded until perfectly sweet. Cork tightly; keep in a cool place. For a drink use two tablespoonfuls of this syrup in one glass of water, and just before drinking add a quarter teaspoonful of soda and stir well.

SPICED EGGS

Boil one dozen eggs hard, then drop them in a pan of cold water before removing their shells. Heat a quart (or more if necessary) of good white vinegar, into which introduce one ounce of raw ginger, two or three blades of sweet mace, one ounce of allspice, half an ounce each of whole black peppers, salt and mustard seed. After it has simmered half an hour pour over the eggs placed in a jar. When cold cover it tightly. They will be ready for use in three or four weeks.
