

OF INTEREST TO THE WOMEN

"THEIR MARRIED LIFE"

Copyright by International News Service

The meeting of the Current Events Club occurred on one of the rainiest days of the season. Everything oozed dampness, but nevertheless there was a goodly number of women present. Helen was determined to make them see matters as she had seen them ever since she had called on Mrs. Mapes.

Helen told simply of her call and the manner in which she was received. "It's a wonder she let you in at all," Mrs. Dalton said quickly. "She opened the door on a crack the day I was there, and I had to talk to her that way for the few minutes she gave me," but in another woman.

SOFT DRAPERIES FOR THE EVENING

Beautiful Design of Lace and Silk Caught at Belt With a Rose

By MAY MANTON

9136 (With Basting Line and Added Seam Allowance) Evening Bodice, 34 to 44 bust.

9099 (With Basting Line and Added Seam Allowance) Gathered Skirt with or without Over-Portion, 24 to 30 waist.

Both the smartness and grace of this gown are apparent at a glance. The tunic completely covers the back of the skirt while it is short at the front and forms jabot-like folds at the sides. The straight skirt beneath is joined to the straight yoke. The bodice is all of the lace with the over-portion matching the tunic. It is a very fascinating costume and at the same time it is one that comes easily within the scope of the home dressmaker.

FOODS THEY BUILD OR DESTROY

AMAZING BUT RARELY SUSPECTED TRUTHS ABOUT THE THINGS YOU EAT

By ALFRED W. McCANN

CHAPTER 92 The Facts Concerning the Manufacture of Molasses, Involving the Use of Sulphurous Acid, Are Sufficient in Themselves to Inspire a Nation-Wide Demand For the Old-Fashioned, Openettle Product That Used to Be Labeled "New Orleans," but Which Is Now Unobtainable in the Wholesale Markets of the United States.

played become greater and greater until the final yield is a thick, viscous mass which no longer crystallizes. This thick viscous mass is the molasses until a demand is made for the tasty maker, the baker, the confectioner, and the home pantry.

Good molasses would be cheap at this present price. Old-fashioned home-made molasses, produced on farms by corporations with sufficient vision to appreciate the value of the old-fashioned product, will be put on sale in this country as soon as the people demand it with sincerity and persistency, but no sooner.

Escape TOOTH Troubles

—by keeping your teeth REALLY CLEAN. "But," you say, "I brush my teeth regularly, yet they decay." Yes, you brush them, but do you REALLY CLEAN them? Tonight, after brushing your teeth, examine them closely. You will likely find an accumulation of tartar on the enamel and bits of food deposit hiding in the crevices.

W.B. CORSETS

give style, comfort and superbly fitting gown; are economical because long-wearing, and assure the utmost in a corset at a most moderate price.

THE HOME WEDDING

Wedding customs are very simple things, but some of my readers are a little worried about the proprieties of the wedding day and wedding ceremony, and I am going to try to talk to them all in this article.

Every one turned to look at Helen, who blushed at being the first to speak, but who responded sincerely and truthfully with what she had to say. "You called on Mrs. Mapes, didn't you? I wonder if you had any success. She is a very difficult woman."

LET BABIES RUN NAKED

Child Hygiene Expert Says It's More Healthful in Summer New York, Aug. 9.—Dr. S. Josephine Baker, director of the Bureau of Child Hygiene, to-day put the official stamp of approval on permitting babies to run about the house naked during the hot summer months.

GIRL THROWN FROM MOTORCYCLE

Elizabeth Carson, 210 Chestnut street, while riding on a motorcycle yesterday afternoon was thrown from the machine. She sustained a fractured shoulder and a badly lacerated left arm. She was taken to the Harrisburg hospital for treatment.

MOTHER OF FOUR CHILDREN

How Lydia E. Pinkham's Vegetable Compound Kept Her Well and Strong.

Lincoln, Illinois.—"I have used Lydia E. Pinkham's Vegetable Compound for ten years with good results and I have four healthy children. This summer I was in a very run down condition and the very hot weather seemed more than I could stand, but I commenced taking your Compound in June and from then until September 25th, when my last baby was born, I got along much better than I had before. My baby was a girl and weighed 14 pounds at birth, and I recovered very rapidly which I am sure was due to your medicine. I am well and strong now, and my baby and do all my work."

My mother has taken your medicine with equal satisfaction. She had her last child when nearly 44 years old and feels confident she never would have carried him through without your help, as her health was very poor. Mrs. I. F. CLOYD, 1855 North Gulick Ave., Decatur, Ill.

BOILERS MUST BE UNDER STATE RULE

Department of Labor and Industry Getting Them Under Inspection Plan Now

All steam boilers and appurtenances in all sections of Pennsylvania carrying pressure greater than fifteen pounds per square inch are to be thoroughly inspected every year, both internally and externally and under operating conditions, according to rules made recently by the Industrial Board of the Department of Labor and Industry.

The boiler code adopted recently by the Industrial Board applies to boilers contracted for on or after July 1, 1916, and to boilers contracted for before that date and to be delivered after January 1, 1917. This code deals specifically with the details of construction and approval of steam boilers.

The rules and regulations adopted by the board for the administration of the boiler code set forth that no person shall be authorized to act as an inspector unless he has passed an examination described and approved by the board. At recent examinations held at Harrisburg, the Department of Labor and Industry in various sections of the State 118 inspectors passed examinations entitling them to receive commissions as boiler inspectors.

Persons applying for examination as boiler inspectors must obtain blank forms from the Division of Boiler Inspection of the Department of Labor and Industry and any applicant desiring to pass an examination may be accorded another test at the expiration of ninety days.

Qualified inspectors, finding boilers unsafe from any cause, must notify the owners or persons in charge and make a report to the Bureau of Inspection of the Department of Labor and Industry and the boiler may not be operated until a proper certificate is granted that the boiler is in safe condition.

Any owner or user who moves a stationary boiler requires to be reported to the Bureau of Inspection of the Department of Labor and Industry, giving the new location of the boiler, and it must be inspected before it may again be operated.

Certificates issued by inspectors must be placed where they may be easily read in the engine room or boiler room of the boiler. The boiler must be kept in a safe condition and a certificate of inspection for a portable boiler must be kept near the boiler and accessible at all times.

Inspectors shall give at least fourteen days' notice to owners or users prior to the boiler inspection, and the owner or user must prepare the boiler for the inspection at the designated time by drawing water from the boiler, removing the manhole and handhole plates and thoroughly cleaning the boiler and its settings. No notice need be given for inspection of operating conditions. All boilers contracted for after July 1 must be distinctly stamped as conforming with the safety standards of the Industrial Board. Inspectors no stamping boilers may not be directly or indirectly interested in their manufacture or sale nor an employe of an owner or user of such boiler.

Complete copies of the boiler code and the rules and regulations for its administration may be obtained upon application to the Industrial Board of the Department of Labor and Industry. The Industrial Board includes Commissioner John Price Jackson, chairman; C. T. Malley, Mrs. Samuel Semple and William Young.

AMUSEMENTS

A new feature picture entitled "Hypocrisy," released by the Fox studios, and featuring the Virginia, will be shown at the Victoria today and tomorrow. The first chapter of a new serial, "The Grip of Evil," which will be shown each Tuesday and Thursday for a fortnight, is the first chapter of a sensational story of love, hate, romance and suspense.

"Comrade John" Ruth Roland and William Elliot is the attraction at the Victoria today. The drama is taken from the novel of the same name and is a sensational story of love, hate, romance and suspense.

"Silks and Satins" at the Regent today. The story opens on the day previous to Fellicite Cameron's marriage to F. Breton, a conceited dandy. The young man, in the choice of her father, but not of her liking, for love lies in the heart of Jack Desford, who is a poor fellow, but a true one. She finds a diary in an old table. Fellicite quickly picks them up and runs to her boudoir to explore the secrets of her long departed relative. The diary, which was written by one of Fellicite's progenitors when she found herself in such a predicament as this, is a thrilling story of sword play and swash-buckling, with the doughty hero coming to the aid of the fair maiden, and in it little Fellicite finds the key to her own happiness.

WE DELIVER IT PROMPTLY—BOTH PHONES

Walter S. Schell QUALITY SEEDS 1307-1309 MARKET STREET

Puget Sound Country Combines the attractions of mountain and sea

Scenically beautiful—commercially prosperous—an ideal pleasure ground for tourists. From Seattle and Tacoma many delightful short journeys can be made by boat through the beautiful sheltered waters of the Sound, within constant sight of rugged snow-capped mountains.

Scattered through the Sound are the picturesque San Juan Islands—then, but a short trip away is the mountain wonderland—Rainier National Park. On the way to the Puget Sound Country is the big attraction—electrification—that stupendous achievement that has turned the eyes of electricians and scientists the world over toward America.

You will be absorbed in this, the realization of the dreams of ages, as you smoothly ride behind a powerful electric locomotive over the Rocky Mountains. No trailing smoke to mar the vision—no cinders or gas fumes to annoy.
