## STRIKE TO HIT LOCAL PLANTS

[Continued From First Page]

The past few days will insure continued operation of practically all local manufacturing plants for a period of from one to five weeks at least, even should the strike tie up the railroads. In case the strike should last longer than six weeks, none of the managers would say that plant operations should be continued. Already the embargo placed upon heavy freight shipments has struck local plants who have been notified that no outgoing shipments will be accepted after Saturday night. At Central Iron and Steel Works this crisis will be met partly by the operation of motor trucks which furnish transportation for about 50 miles, should an adequate supply of gasoline be available continuously.

### May Lay Big Number Off

Should the strike tie things up for a week, managers fear that several thousand men, at least, would be laid off in Harrisburg and Steelton. Eray, E. Tracy, president of the Harrisburg Pipe & Pipe Bending Company, declared this plant is in a position to continue operations, despite the strike, for a week or two, at least. "I don't see how we can be reached if freight shipments to and from our plant should be impaired. We have a fair supply of material and fuel on hand and can keep the plant in full operation for at least a week."

Should the strike continue longer than a week, however, Mr. Tracy said, operations would have to be curtailed and probably 500 to 700 men would have to be laid off. General Manager Quincy Bent, of the Steelton plant of the Bethlehem Steel Company, could not be reached this morning. It is the general impression at Steelton, however, that the Bethlehem company would be hard hit by the strike. About 7,000 men are employed at Steelton and the daily shipments to and from the big plant run into many trainloads.

It is the impression among steel men that should the strike last three days, operations in many departments at Steelton would have to be curtailed and many units would probably be taken out of operation entirely. This would mean that a large per cent. of employees would likely be placed on short time or laid off entirely.

### Plant Will Be Congested

The freight embargo has already been placed upon shipments from the plant, effective at midnight. On Monday morning, transportation men say outgoing shipments will have the yards so congested that movement of materials to various parts of the big plant will be a serious problem. Robert H. Irons, general manager of the Central Iron and Steel Works, declared that sufficient supplies are now on hand to insure partial operation of the plant for at least two weeks. The most serious problem to be met, Mr. Irons declared, is to obtain an adequate supply of coal. Should the strike last a week, Mr. Irons said, it would be necessary to close down the plate mills and conserve the coal supply for the open hearth, or steel making department. Such a step would necessitate laying off of about 700 men, he said.

Operation of the open hearths for an indefinite period will be insured by placing most of the material used in haul Dolomite—the mineral used to line the furnaces—from the quarries near Bainbridge.

### Tin Mill Can Work Three Weeks

General Manager Gray, of the Lorraine-Groesbeck Manufacturing Co., declared present supplies would insure operation of the tin plate mills for three weeks after which the plant will probably close down. This would throw 250 men out of work. Smaller manufacturing plants will be even harder hit and conservative estimates by businessmen place the number of men, aside from steel mill railroads, who will be forced to quit work in Harrisburg and Steelton at between four and five thousand, should the tieup last more than a week.

## FOOD ENOUGH TO LAST MONTH

[Continued From First Page]

this method should the railroads walk out.

### Meat Supply Limited

The meat supply, however, is limited, but with the help of the county there will probably be no shortage. Groceries on hand will last, it is estimated, for several weeks, and fresh butter and eggs, although scarce, can be furnished by farmers near the city, many of whom attend the markets each week.

Big bakery managers announce that the present flour supply will last a short time, but that a large order is on the way, and should this arrive before Monday the local supply can be continued for several weeks. As a large amount of bread is shipped from the city, this supply also would be turned back if the railroads cannot handle the shipments.

### Produce Market Tightens

If the railroad employees strike, food prices may soar, even though the supply is sufficient. This will apply particularly to vegetables, potatoes and fruit, as the produce market has already tightened.

The gasoline supply, however, is not assured. Automobile owners are advised by wholesale dealers to save as much as possible, as the orders to regular retailers are being cut almost in half so that the present supply will not be exhausted too soon. To-day will be the last day that gasoline will be hauled on the railroads, according to the embargo, and wholesalers stated that it is necessary to cut down standing orders. Retail dealers have been advised also to save as much as possible.

A large shipment of hogs was received here this afternoon by Swift & Company. These are to be killed immediately and kept in storage, it was said. In case of a strike, this will probably be the last shipment of the kind to be received for an indefinite period.

## Law Reigns at Lima After Mob Tries to Hang Sheriff For Shielding Negro

[By Associated Press]

Lima, O., Aug. 31.—After a night of violence resulting from the attempt of a mob to lynch Charles Daniels, a negro, accused of assaulting Mrs. John Baber, wife of a farmer, the spitting away of the prisoner by Sheriff Sherman Eley and the torture of the sheriff until he consented to lead the mob in motors to Ottawa, where he had taken the man, the law apparently reigned again to-day.

Daniels, the prisoner whose life was saved by the quick action of the sheriff, is in jail at Toledo, it is understood, and J. P. Laser, prosecutor of Allen county, is taking the preliminary steps of investigation into the affair.

### NO REQUEST FOR TRUOPS

[By Associated Press]

Columbus, Ohio, Aug. 31.—No request has been made to the Adjutant General for troops to be sent to Lima, where a mob late last night assaulted the sheriff and entered the jail in an effort to take a negro prisoner, who was said to have assaulted a woman near that city. The sheriff is now in Ottawa, where he is being kept a secret by the officers.

## ICE CREAM CONFISCATED BY DR. RAUNICK

[Continued From First Page]

been sold which contained disease germs is the belief of city health authorities who look for more cases of typhoid. Six cases were reported to-day with several more suspected victims. One of these is Florence Crowell, aged 10, daughter of Clarence Crowell, of New Cumberland. There are now 40 cases in the city.

Tests of other cream shipped into the city from Cumberland county dairies are being made to-day and other ice cream, made from this supply, if found to be contaminated, will be confiscated at once by health officials.

So far three creameries in Cumberland county have received orders not to ship any cream into Harrisburg. Should this order be violated according to Dr. Raunick, city food inspectors, who will be at the railroad station, are under orders to take over the cream before it reaches the manufacturers.

No trace of typhoid has been found so far in the milk supply, according to Dr. Raunick, and many of the dairies shipping in this supply, are in good condition.

The city health official has not decided what other stringent measures may be enforced, but said that there

may be prosecutions. Special tests are made daily of the city milk and cream supply and a close watch is being kept on all dairymen and dealers handling these commodities.

### Boll Discarded Cream

The ice cream which was confiscated this morning by the health officers was treated in the afternoon with disinfectants, and taken to the plant of the Pennsylvania Reduction company, where it was boiled and discarded. All cream, which the auaranteed, which will be treated in the same manner to prevent any possible means of contagion.

## ANOTHER STEP IN SOLVING PROBLEM

[Continued From First Page]

tee a plan for relief along the lines suggested by Dr. Van Sickle. In brief this calls for three junior high schools a girls' high school and additions and extensions to Technical High school sufficient to permitting the turning over of that institution into a boys' high school. The high school committee had approved of these recommendations and before the report is submitted to the school board for final approval, the high school committee will confer with the citizens body.

The personnel of the citizens committee comprises William M. Donaldson, Francis Jordan Hall, William Jennings and Arthur D. Bacon. E. A. Heffner had also been asked to serve but he has been unable to accept. Whether or not the fifth place on the committee should be filled was another question that was considered this afternoon.

## Cotton Jumps \$1.80 a Bale After Report Shows Decrease

[By Associated Press]

New York, Aug. 31.—The government cotton report indicating a condition of 51.2 per cent, or the lowest on record for August 25, and a lint crop of 11,800,000 bales, was followed by a violent advance in the cotton market this morning.

Owing to uncertainties regarding transportation facilities and the comparatively high level of prices reached on recent advances, many holders of long contracts had taken profits before the report was issued. A further reduction in crop estimated, however, was followed by a heavy rebuying demand from trade and speculative sources, which sent prices into new high ground for the reason.

December contracts sold up to 16.10 shortly after the report was issued, or about \$1.80 a bale above yesterday's closing price.

## H. W. Gough Is Re-elected Treasurer by State Elks

[By Associated Press]  
Reading, Pa., Aug. 31.—Oliver K. Cowell, of Sunbury, was elected president by the State convention of Elks at noon to-day. J. Frank Trangle, of Reading, was chosen vice-president. Next year's meeting will be held in Shamokin.

Secretary W. S. Gould, of Scranton, and Treasurer Henry W. Gough, of Harrisburg, were re-elected.  
The grand parade took place this afternoon. Over 4,500 people were in line. There were many magnificent floats. Edward O. Rightor, of New Orleans, the grand exalted ruler, was among the participants.

## "Look Pa, How 'Gets-It' Works!"

Lifts Your Corn Right Off. Never Fails.

"Ever in your life see a corn come out like that? Look at the true skin underneath—smooth as the palm of your hand!"

Well Now, Look at That! Off Comes That Pesky Corn as Quick as a Whistle

The earth is blessed with the one, simple, painless, never-failing remedy that makes millions of corn-pestered people happy, and that's "GETS-IT". Apply it in 3 seconds. It dries. Some people jab and dig at their corns with knives and razors—wrap their toes in packages with bandages or sticky tape, make them red and raw with salves. Nothing like this with "GETS-IT". Your corn loosens — you lift it off. There's nothing to press on the corn, or hurt. Angels couldn't ask for more. Try it to-night on any corn, callus or wart. "GETS-IT" is sold and recommended by druggists everywhere, 25c a bottle, or sent on receipt of price by E. Lawrence & Co., Chicago, Ill.

## EYES

THE treatment of Eyes and how to remedy the result of their abuse has been our life study. To be efficient in home or business life requires the assistance of good eyesight.

Dull headaches and dizziness caused nine times out of ten by Eye Strain, impairs one's efficiency. No doubt rest-glasses worn for a time will remedy the trouble. At any rate, consult a skilled Optician or Optometrist where service is paramount. If you don't need glasses, we'll tell you so.

## Car Supply Running Short

"If there was ever a time that a dealer or consumer of coal should protect themselves, it is our opinion that this is the time. Last summer we were getting a full car supply to run the mines every day in the month, but this year the greatest number of days we were able to work, was fourteen and three-quarters days, and most of the time we held down to eleven and twelve days per month, on account of car supply. We see no prospects for an improvement in either transportation or labor situation."

"With this condition existing, any buyer of coal should be able to determine the best course to pursue."—E. F. Bardin, Cincinnati, Ohio.

The above information from a man who knows the situation, gives the reasons why your coal supply should be purchased early.

## Acid Stomachs Are Dangerous

Common Sense Advice by a Distinguished Specialist  
"Acid" stomachs are dangerous because acid irritates and inflames the delicate lining of the stomach, thus hindering and preventing the proper action of the stomach, and leading to stomach trouble from which people suffer. Ordinary medicines and medicinal treatments are useless in such cases, for they leave the source of the trouble, the acid in the stomach, as dangerous as ever. The acid must be neutralized, and its formation prevented, and the best thing for this purpose is a teaspoonful of bisulphated magnesia, a simple antacid, taken in a little warm or cold water after eating, which not only neutralizes the acid, but also prevents the fermentation from which acidity is developed. Foods which ordinarily cause distress may be eaten with impunity if the meal is followed with a little bisulphated magnesia, which can be obtained from any druggist, and should always be kept handy.—Advertisement
