**Examine Your TEETH Tonight**

—after you clean them.

You will find, in all probability, an accumulation of tartar on the enamel and bits of food deposit hiding between the crevices. YOUR DENTIFRICE does not FULLY CLEAN! Loss of teeth is caused usually by one of two conditions—Pyorrhea or decay, both of which develop, as a rule, only in the mouth where germ-laden tartar is present.

SENRECO, the recently discovered formula of a dental specialist, is two-fold in its action. First, it REALLY CLEANS, embodying specially prepared, soluble granules usually effective in clearing away food deposits. Second, it is particularly destructive to the germ of Pyorrhea. Yet it is perfectly safe, containing neither injurious chemicals nor hard grit.

Avoid Pyorrhea and decay. Get Senreco from your dealer today. In large tubes, 25c. Senreco to Senreco, 304 Walnut Street, Cincinnati, Ohio, for liberal-sized trial package.
