Sturdy Cotton Weaves of Gingham and Madras That Will Keep Sewing Rooms Busy Until School Opens

Ginghams in bright-colored plaids are in as great favor for the opening of the Autumn season as the more sombre designs in two-tone effects and black and white. The display of new weaves for school dresses is as varied as any that we have presented in less strenuous times, and our prices are still based on normal working conditions.

Among the new season's most attractive weaves are—

D. and J. Anderson Gingham in colored fancy plaids, stripes and solid shades; yard... 45c
Wm. Anderson Gingham and Madras in many styles of plaids, checks and stripes; yard... 25c
Ginghams in fancy plaids and Roman stripes for school dresses; yard... 29c
Corded Madras, self-colored cords and colored stripes on white ground; yard... 39c
Adelphia stripes—a new silk and cotton suiting—self-colored silk stripes; yard, 50c
50c silk stripe Madras white ground with colored and silk stripes; yard... 39c
25c Voles, 36 inches, all fancy patterns; yard... 15c

Cottons in the Basement

Dress Gingham, in checks, stripes, fancy plaids and staple patterns; yard, 8 1/2c, 10c, 12 1/2c, 14c and 15c.
Percales in many styles on white and dark grounds; yd. 12 1/2c
20c and 25c Madras Shirtings, fancy colored stripes; yard... 15c
20c Wash Suitings, 30 in., stripes and solid shades, yard... 15c

Fancy silk hose in colors... 79c

Dives, Pomeroy & Stewart, Street Floor.

POSTAL CLERKS SEND PROTEST TO PRESIDENT

[Continued From First Page]

bought homes, and others were paying for homes and a change at this time would involve them in heavy financial losses. These facts will be submitted to the Chamber of Commerce within the next month.

Secretary E. L. McColgin, of the Harrisburg Chamber of Commerce, said today that he would present to the Chamber any request that reaches him, but that he had not received official information as to what immediate action the railway mail clerks desired. The resolutions adopted yesterday are as follows:

"Whereas the Second Assistant Postmaster General advises under date of August 19, 1916, that he will not approve the suggestion contained in the resolution adopted by the New York and Pittsburgh Association on August 12, 1916, to replace six crews on each of the through trains, and

from the honorable Postmaster General through the offices of United States Senators Martine, of New Jersey, Hughes, of New Jersey, O'Gorman, of New York, and Lewis, of Illinois, under date of August 19, 1916, to the effect that a modified schedule is being contemplated that will provide more time for the clerks of the New York and Pittsburgh railway post office at Harrisburg (in an interview on August 21, 1916, between Mr. Yeats and Superintendent Stice it is learned that a schedule on a five-crew basis, two crews starting at New York, two crews starting at Pittsburgh, with the fifth starting at either end, is contemplated), therefore be it

"Resolved, That the New York and Pittsburgh Association strongly protests and are opposed to the proposed schedule as outlined by the superintendent, J. L. Stice, in an interview with President Yeats on August 21, 1916, on account of the hardship placed on the men because of the increased deadheading required, adding as it does from 390 to 500 miles to the present mileage to each tour of duty; be it further

cent attitude of Honorable Woodrow Wilson, President of the United States, in urging and securing more liberal conditions for railroad employes through legislation, which officially indorses not only an eight-hour day, but previous awards brought about through arbitration setting a definite mileage limitation of 155 miles per day, seven days to the week, 365 days to the year, on a basis of 20 miles per hour, "Therefore the purpose of this resolution is to respectfully request and urge the Post Office Department to reconsider the establishment of a five-crew organization on the New York and Pittsburgh line and restore the six-crew organization so as to be consistent with the aforesaid attitude of the President of the United States and the conditions now obtaining with railroad employes."

BURY ZEP CREW WITH HONORS
London, Sept. 6.—The crew of the Zepelin which was destroyed in the recent raid on the east coast of England, will be interred this afternoon with the appointed military honors at Pottery Bar burial ground, 14 miles from Cuffey.

NEW TEMPORARY POLICE OFFICERS

Three promotions in the police force were made by Mayor Meals yesterday, approved by City Council, and became effective last night. Lieutenant J. Edward Wetzell was appointed to succeed the late Chief of Police J. Thomas Zell. Sergeant Frank Paine was chosen to fill the lieutenant's, and Traffic Officer Fred Essig was appointed to the sergeant's.

LIGHTY SPEAKS FOR DAIRYMEN

Says That Milk Is Too Often Blamed For Sickness and That It Is Not Fair to Farmers

L. W. Lighty, one of the farm advisers of the State Department of Agriculture, comes out in this week's bulletin of the State Department of Agriculture in behalf of the dairyman and the milkman. The veteran farmer says that people are too prone to blame the milk for typhoid and other diseases and declares that the milk producer is not getting a square deal. He voices his opinion on the public home way and says that probably the butcher and the baker are to blame for some things laid upon milk and that too often the milk handler is not supposed to get the man of the owner of the cow.

"When several cases of sickness happen in town or city the first suspect is the milkman," says he. "The physician is not slow to speak his doubts and fears, and at once the reporter gets busy and translates the suspicions into proved facts and the milk is the cause of typhoid fever in the minds of the readers of the daily paper."

"Thoughtless people often make wild remarks by the slovenliness of the grocery industry and the public health service of the nation declares that milk as ordinarily marketed is unfit for human food, it is time we dairymen get busy."

HOT SEPTEMBER DAY

Maximum of 86 Prediction of Weather Bureau
Starting at 72 degrees at 8 o'clock this morning the mercury went up gradually until noon when 82 degrees were recorded. The official maximum was expected to be 86 degrees by 3 o'clock this afternoon.

To-day's excess heat hit humanity harder because of the high humidity. It was 78 degrees at 9 o'clock, and still on the rise. No records were broken by to-day's hot wave. This is the month when hot weather brings strong humidity because of the moisture in the atmosphere.

At the New Store of Wm. Strouse

To-night at 7.45

The Evolution of A HAT

Will be demonstrated in the windows of The New Store this evening, commencing at 7.45.

Don't fail to see the complete formation of soft and stiff hats—from the time the raw skin is taken from the fur-bearing coney until it finally emerges into a stylish Mallory or Schoble creation—two of America's best-known hats—handled by The New Store.

The exhibit will be educational as well as interesting, and we feel sure you will consider it time well spent to witness this interesting demonstration.

Display under direction of Mr. Fernsler, of the Hat Department.

The New Store of WM. STROUSE

ACADEMY GRADS ENTER COLLEGES

Will Be Matriculated at a Dozen Different Universities This Month

The members of the class of 1916, Harrisburg Academy, will enter colleges and universities covering a wide range of learning, vary from the purely technical engineering courses offered by such institutions as Stephens Institute, the Massachusetts Institute of Technology and Cornell, to the purely classical courses afforded by such universities as Princeton, Franklin and Marshall, and Washington and Lee. The Academy boys will pursue their advanced courses in institutions located along the Atlantic Seaboard from Massachusetts to Virginia, and from New York inland to Ohio. Among the colleges and universities of which these young men aspire to be Alumni are the following:

Massachusetts Institute of Technology, Cornell, Lehigh, University of Pennsylvania, Princeton, Franklin and Marshall, University of Pennsylvania Dental School, Dickinson, Washington and Lee, Gettysburg, Ursinus, Stevens Institute and Annapolis.

The Academy management is pleased with the outlook for the ensuing school year. Last year's enrollment of one hundred and seventy pupils will be increased this year to approximately two hundred. Boarding pupils from a great distance have been enrolled.

In accordance with Dr. Dixon's request, the Academy will reopen on Friday morning, September 29, for the organization of both junior and senior schools. The first assembly and recitations will be held on Monday, October 2. The masters will be at the school several days prior to the 29th to assist the headmaster in making out study schedules, in assigning rooms to boarding pupils, and in looking after the various interests pertaining to the Fall opening.

PARALYSIS INCREASES

By Associated Press
New York, Sept. 6.—A further slight increase in the infantile paralysis epidemic was shown in the Department of Health report for the 24 hours ending at 10 a. m. to-day. Fifty-three new cases were discovered, against forty-three yesterday and there were twenty-two deaths, an increase of one.

GRAPE VINES HARD HIT BY INSECTS

State Department of Agriculture Calls Attention to Damage Done by Them

According to experts at the State Department of Agriculture there are now throughout the State many grape vines the leaves of which are turning brown. This is caused by a very small whitish flying insect called the grape leaf hopper, which lives by sucking the sap from the leaves. As the cell from which the sap is sucked dries out, and also the cells around it, and as the insect feeds several times a day and never in the same place, it is not long before there are numerous dead spots upon the leaves. When abundant the leaves dry in mid-summer, and the fruit does not ripen properly. It lacks the proper amount of sugar, and it is not good for table use, nor for grape juice, nor wine. The adult, which are only about one-eighth of an inch long, hibernates in trash in grass and about the vineyard. With the approach of the growing season it moves to the foliage or raspberries, and then to the lower leaves of the grape from which place the balance of the vines is infested. The eggs are laid, and from these young nymphs come, which must pass through five stages before they become adults with wings. These little nymphs are a yellowish white, and can be seen during the early summer working around on the undersides of grape leaves.

The Department of Agriculture recommends as the time to control these leaf hoppers when the greatest number of nymphs are present, and before many of them begin to get wings, and when they can fly they are harder to reach with spray materials. The best time to spray here in Pennsylvania is in summer.

WANTS OLD CLOTHES

Captain M. Nelsen, of the Salvation Army, has again appealed to the citizens of Harrisburg to donate all their cast off clothing to the Army for the use of the poor people of the city. Any person having these articles can call Bell phone 4058-R, or send a card to 2218 Atlas street.

"WETS" WIN IN YUKON

By Associated Press
Dawson, Y. T., Sept. 6.—Official figures on Yukon Territory's first vote on prohibition give the "wets" a majority of only three votes for the entire territory. It was announced to-day, the contest was to abolish the licensed hotel, the only form of saloon now allowed in the territory. The mining districts almost without exception voted for prohibition.
