FISHERMEN REAP HARVEST By Ausociated Press
Vlaardingen, Netherlands, Sept. 6.—
Although the real herring fishing season has not yet begun. Dutch fishermen are already reaping a golden harvest, as a result of the absence of the German and a large part of the British fishing fleets from the North Sea and of the enormously high prices obtainable in Germany for the catches. One fortunate man has brought in a catch of herring estimated at a value of \$14,000, or three times as much as its owners make in the whole of a normal year. The great bulk of the exports goes to Germany.
