ADMISSION :: 25 CENTS

**Grand Theatre** 1426 Derry St., Beginning Monday, September 11th.

The newest, largest and finest pipeorgan in this section of the State, which has been building for several months and required three men one month to install, will be introduced to the music-loving public, through a week of special display recitals, by Prof. C. W. Wallace, who drew up the elaborate specifications for this big organ-which embodies new and novel, as well as the best features gleaned from practical and theoretical, as well as his own vast experience with all known makes of organs. The mechanical appliances are considerably different than any now in use on any local organ, and the practical mechanism is superior to that of any organ heretofore erected by the Moller Co. It incorporates features which adapt it equally well to motion picture, concert or church work, and is easily the equal, as a musical instrument, of any in the State, and by far Harrisburg's greatest. Prof. Wallace who a marvelously gifted organist has never been heard at his best in Harrisburg, because of restrictions imposed by all past engagements here. It is the future policy of the Grand Theater (which, besides having the finest screen, and most softly and mellow-lighted pictures in the city, is one of the newest, largest and is the best ventilated also) to devote a portion of each evening to an organ recital by Prof. Wallace who will be given absolute freedom in the conduct of same, so that all, old and young, and all degrees of musical training or appreciation will be treated to a rich and rare musical entertainment as well as the highest class feature pictures and others. The public is cordially invited to attend the inaugural week beginning Monday, the 11th, at which time Prof. Wallace will explain and demonstrate the numerous sets of pipes and their many beautiful blending combinations.
