

Curtains and Draperies

Play an Important Part in The Furnishing of the Home

The woman with a thought for the beautiful realizes how important Curtains and Draperies are to the well-furnished home. She knows that they are as necessary as the ribbons and trimmings on her dress—they add to its attractiveness.

We show the largest stocks of Draperies and Drapery Fabrics in Central Pennsylvania. The entire stocks are new and of the very latest styles—designs—and colorings.

By the Yard—

- Cretonnes at 25c to \$1.15

LOCAL SHOOTERS HAVE LOW SCORES

R. D. Morgan, of Washington, D. C., Wins Westy Hogan Honors

Atlantic City, N. J., Sept. 15.—Shooters from Harrisburg, while making good scores, have not shown their former stride. J. G. Martin yesterday broke 71 out of 75, 97 out of 100; Harris, 72 and 95; H. B. Shoop, 74 and 89; M. B. Stewart, 71 and 96; S. S. Hoffman, 73 and 91; W. E. Hoover, 65 and 78.

R. D. Morgan, of Washington, D. C., was crowned the new amateur champion of the Westy Hogans. Incidentally, he further annexed the entire day's honors with his remarkable exhibition in going steady in the 175 targets of the regular events and then winning two shoot-offs. The Washingtonian last night had an unfinished consecutive run of 217, which eclipses any record to date in this tournament.

Morgan tied at the last minute with Fred Plum in the final 100 targets, which consisted of the championship race. Morgan, in the extra strings, smashed two sets of 20 targets each, while Plum lost the belt on missing his twenty-fifth target.

In the amateur championship event five men broke 99 in the century of blue rocks. They finished in the shoot-off as follows: Allen Hill, of Allentown; Dr. G. H. Honors, of New York City; G. N. Fish, of Lindenville, N. Y.; Ed Cain, of Dayton, and Woolfolk Henderson, of Lexington, Ky. Charles H. Newcomb and W. E. Severn, both of Philadelphia, and E. V. Gillespie, of Pittsburgh, were the 98 scores to get the last three prizes by virtue of their performance in the shoot-off. Hill landed high prize in shoot-off. Hill landed high prize in his class by breaking 59 in the extra 60 blue rocks. Dr. Martin smashed 58. Henry Powers, of Atlantic City, won the championship last year, but did not figure seriously yesterday.

Hill, Fred Tomlin, of Glassboro, N. J., Fish and Plum tied for second high amateur gun honors to Morgan. Each cracked 173 out of their possible 175. Henderson, Fred Harlow, of Newark, Ohio, and W. H. Patterson knocked down 172.

Bits From Sportland

Chicago Americans to-day enter the field as contenders for the pennant. They moved up within a half game of Boston and Detroit. Brooklyn is leading the Nationals, the Phillies having suffered another tumble yesterday.

Lykens won another game yesterday, defeating Trenton, score 9 to 2. Lykens was in a hitting mood. The season in the upper end will end tomorrow. Williamstown is still leading. They cannot lose.

By defeating Worcester yesterday the New London team won the pennant in the Eastern League race. The season closes to-morrow. Portland was the runner-up and a close second.

The Clerks and Planing Mill teams of the Lucknow Shop League played a pitched game yesterday. Finlrock hit a good game, allowing three hits. Alcorn led the Planing Mill team down with but one hit.

The first football accident occurred yesterday. Coach Frank Pendergast was the victim. In showing how to fall on the ball he dislocated his elbow and went to the Harrisburg Hospital. He may be unable to give close attention to his work. "Shorty" Miller is in charge.

Frank Harris, brother of Leo Harris, assistant coach for the Central High, will look after the second squad from Central. This will allow Coaches Smith and Harris to give close attention to the regular team. Salisbury evened up with Chambersburg yesterday, playing in the post-season series, score 3 to 1. Stricker was hit timely. Chambersburg scored in the fifth inning on a bunch of hits.

A dual tennis match will be played to-morrow between teams representing the Reservoir Park Tennis Club and the Middletown Tennis Club. Play will start at 1.30. Courts 3, 4 and 5 will be reserved for the contests.

Not caring to take any chances in losing the season's honors, Marysville will play off a game with Duncannon at Marysville to-morrow afternoon. This game was played some time ago, but disputed.

BIG IMPROVEMENT IN EASTERN ROADS

Pennsylvania, New York and New Jersey Have Made Great Strides

Washington, D. C., Sept. 15.—The great extension in the use of motor vehicles in the past few years has brought about a marked increase in the construction of new, substantial and more costly types of roads in New York, New Jersey and Pennsylvania. It has been found by the U. S. Department of Agriculture, the three 5-year study of road mileage, road types and highway finances in the three Middle Atlantic States, just reported by the Office of Public Roads and Rural Engineering, in Department Bulletin No. 386, shows that in 1914 roads treated with bituminous preparations made up 15.4 per cent of the improved highways as against 1 per cent in 1909.

A similar showing is made in the report for concrete, brick and other of the more substantial materials used in road construction. Approximately 9 per cent of the improved road mileage of the three commonwealths is now surfaced with such materials, while in 1909 roads of this type constituted only 1 per cent of the improved highways. In 1904, when the first road study was made, neither bituminous nor the more substantial roads were found in the three States, untreated macadam gravel roads predominating. The changes of recent years brought about a reduction from 51 to 39.3 per cent of the total in the proportion of untreated macadam roads during the period from 1909 to 1914. The figures are complete except for Pennsylvania, where it was impossible to secure detailed information regarding the type of surfaced roads in the second class of townships.

Macadam Passing Out
Of the road improvement made only in the 5-year period of the most recent study, more than 3,500 miles, or 37 per cent, were treated with bitumen, while only 20.5 per cent were plain gravel. This indicates conclusively, in the opinion of officials of the Office of Public Roads and Rural Engineering, that for roads carrying heavy automobile traffic, the old standard type of waterbound macadam has had its day.

In 1914 the three States named

spent in road improvement \$40,864,831, of which the detailed expenditures were: New York, more than \$23,000,000; Pennsylvania, more than \$10,900,000. In addition, counties, town, and township bonds voted in New York totaled nearly \$12,000,000; in New Jersey, \$14,000,000; in Pennsylvania, \$27,500,000. On January 1, 1915, was 185,770.84 miles, of which the approximate State mileages were: New York, 79,600; New Jersey, 15,000; and Pennsylvania, 91,500. This is exclusive of practically all streets in incorporated cities and towns. The percentages of surfaced roads added in the 5-year period were 3.5 in New York, 1.7 in New Jersey, and 7 in Pennsylvania.

The report is the first of a series which will relate to road investigations of mileage, conditions and finances throughout the United States. Owing to the establishment since 1909 of many State highway departments, the investigation for 1914 was made with increased co-operation with the State and local officials. Much dependence was also placed on the co-operation of local and State road associations, chambers of commerce, automobile clubs, postmasters and private individuals.

Comparative statistics given in the bulletin show that in 1914, as in 1904 and 1909, New Jersey led the two other States in mileage of surfaced roads per square mile of area. The ratio in 1914 for New Jersey was 0.784 of a mile per square mile of State area, for New York, 0.328; and for Pennsylvania, 0.220. In surfaced mileage per thousand of rural population, New Jersey also led in 1914 with New York second. At the close of its improved roads treated with bitumen, while New Jersey had 7 per cent and Pennsylvania approximately the same. Of brick, concrete, and other improved roads, both Pennsylvania and New Jersey had higher percentages than New York.

Road Conditions Good
Pennsylvania was found to have 2.22 miles of road per square mile of area—more than either of the other two Middle Atlantic States. The total mileage on January 1, 1915, was 109,000 miles, of which approximately 10,000 miles, or 9.15 per cent, were surfaced. The State had a highly organized highway department with 10,200 miles of road, designated as State highways, directly under its supervision and maintained at State expense. Contributions for maintenance were also made for some roads other than those designated as belonging to the State system.

Although complete information regarding revenues was not available for some jurisdictions, an estimate of road expenditures in the State for 1914 places the amount at over \$10,000,000. This is an increase as compared with 1904 of 113.2 per cent.

HOUSEHOLD SUGGESTIONS
A white chinchilla coat may be cleaned by laying the coat on a table and rubbing with cornstarch thoroughly into the material. Leave it little while and then brush the cornstarch out and the coat will look like new.
To clean Panama hats rub them with cornmeal.
Straw hats may be cleaned with a piece of velvet dipped in alcohol.
Satin slippers may be cleaned with denatured alcohol.
To wash white silk blouses take lukewarm water to which has been added a little bluing and to each quart add two teaspoonfuls of ammonia. Use a good white soap and rinse in water prepared in the same way, roll up and iron on wrong side with an iron not too hot. They will look like new and will not get yellow.

Harvard Is Favorite to Win Intercollegiate Tennis

Philadelphia, Sept. 15.—Harvard appeared to be practically assured of permanent possession of the challenge cup donated by Harrison K. Caner when to-day's play was started in the intercollegiate lawn tennis tournament at Merion. Both the contestants in the final round of the singles wore crimson jerseys, while the two Harvard teams in the semifinals of the doubles were expected to win their matches.

G. Colket Caner was to meet his teammate, J. S. Pfaffman, for the singles title and, paired with R. Harte, Jr., opposed Eugene Warren and E. R. McCormick, Southern California, in a semifinal match in the doubles. Pfaffman and Whitehouse, the other Harvard pair, met Riker and Knox, of Princeton.

HOW ARE YOUR EYES?

Giving You Trouble?

Are objects a short distance away as clear as they once were? Do your eyes itch, or burn, or "water" in strong light or wind? That's the result of eyestrain and undoubtedly rest-glasses worn for a time will remove the trouble. At any rate, consult an efficient Optician or Optometrist. If you don't need glasses, we'll tell you so.
