CHANGING TEMPERATURE SPOILS

Food placed on your back porch or on the window ledge is exposed to extreme temperatures.

During the night the weather gets very cold. Next day the thermometer may go up to 70 or 80 degrees.

This rapidly changing temperature works injury to meat and other perishable foodstuffs.

A small price of ice will save from decay food valued at many times its cost.

Food should not be placed out of doors because germs are always flying about and will settle on it.

Character Moulded on Gridiron, Says Sports Coach

Here are a few flashes of philosophy culled from an interview with Fielding H. Yost, the veteran coach of the University of Michigan football team.

"In the game of football or life, it isn't the hands or the feet which succeed. It's the heart."

"If you want to judge a man put him in a football game. I read men by football. It is my work and my pleasure."

"A youth on a football field is just like a hero in a motion picture, whose every movement forms the basis of a drama."

"When I take candidates for a football team and coach them, I am preparing them for the gridiron—and for life."

"Real character surges through the artificial cloaks with which they are hidden when men find themselves on the football field."

"We live our lives but once and football forms the biggest incident in the careers of many men."

"I can watch a boy on the gridiron three years and tell you what kind of a man he will make."

"My Cobb would have been just as great as a football player. The desire and ability to be great—the grit, determination, physical and moral courage—would have carried him through just the same. Any of our great men would have succeeded on the football field."

Note in Coffin Warns Man Enemy Will "Get" Him

Atlanta, Ga., Sept. 28.—In the gathering dusk, George Williams, a negro employed by the Atlantic Ice and Coal Company, approached his home of Sims street, in Pittsburg. He was whistling, for he had worked hard and there was nothing to do till to-morrow. As he entered his hallway his foot struck against something and he stooped down to see what the object was. And then he got frightened.

It was a coffin. A miniature, it's true, for it was only about a foot long by four inches wide. But the shape of the box left no doubt in Williams' mind as to just what the box was intended to represent.

Taking it to the house to look over more closely he saw that there was a note scrawled on some manila paper attached to the coffin. The note threatened Williams' family with extinction, and whoever wrote it declared that he had traveled thousands of miles over land and sea to "get" the family.
