

THE GREAT BLOOD PURIFIER

Paul Revere in his famous ride, shouted the word of "WARNING" to his countrymen. The "Milk Men" knew that his warning meant that they had reached a crisis in their life that called for a fight for existence. S.S.S. has been "about" the "WARNING" since the invasion of mankind by the common enemy, BLOOD.

S.S.S. is PURELY VEGETABLE. It builds up the entire system in a wholesome, pleasant way. Write our Medical Advisory Department for free advice.

CHAPTER III

The Deadly Testing of Federal Scientists and the Epoch-Making Decision of Chief Justice Shephard of the Court of Appeals of the District of Columbia Not Only Failed to Deter the Commercial Enemies of Clean and Safe Milk From Further Efforts to Establish a Legal Right to Label Bad Milk Good, but They Actually Inspired a Still More Desperate Resolve to Destroy All Scientific Standards of Milk Control.

The prosecution of Gregg on charges of selling milk reeking with bacteria was not newly conceived experiment. His case was one of nearly 300 then before the courts.

Another milk dealer, Charles G. Dade, had already been convicted in the same Washington, D. C. court and by the same prosecuting attorney, in connection with the United States Department of Justice.

These facts only served to emphasize the importance of the Gregg case, beginning with the conviction of Dade, the organization of dirty milk defenders decided to fight separately each of the many cases then awaiting trial.

They openly boasted that a single victory against the health authorities was all they required to establish a precedent that would enable them safely to continue their profitable business of buying dirty milk, and selling it under misleading labels to an unsuspecting public.

We can lose a hundred cases, but if we catch the attention of the public in one case our purposes will be well served," they argued.

The disturbing records of the Dade conviction threatened, if acted upon, to bring about a revolution in the dirty-milk business.

The explanation of the significance of bacteria in milk which was offered to the jury by Dr. John F. Anderson, director of the Hygienic Laboratory of the United States Public Health Service; Dr. Dieter, and Dr. Kinyoun, bacteriologists of the Department of Health; Dr. Carleton Bates, bacteriologist of the State Health Department; and Lora A. Rogers, bacteriologist of the Department of Agriculture, constituted the official interpretation of the pressure of bacteria, on which the United States government was prepared to act. Thus it becomes necessary for the dirty milk crowd to find some one jury of twelve laymen who would reject the government's scientific conclusions.

It is because the testimony of the government's scientists as recorded in the Dade case, means so much to the common people in throwing light upon the whole subject of milk pollution that it is reproduced here in two types of bacteria come from manure, and the milk containing them was therefore contaminated by some means with feces.

As a result of the growth of these bacteria in milk, which is an animal substance, the milk becomes decomposed, for the reason that when bacteria grow they do so at the expense of the medium in which they are found, splitting it up or decomposing it into various elements.

Dr. Dieter—the colon group of bacteria comes from fecal contamination. When streptococci are associated with the coliform group, the result is a contamination. The presence of both together indicates contamination. The streptococci are found in diseased processes of the animal's intestines, and in human beings in diseased conditions, such as boils, abscesses, etc.

Dr. Kinyoun—Such milk is filthy by reason of the fact that it contained organisms that are clear, pungent. Such organisms are normal and natural constituents of dung, but not of milk. They find their way into milk by allowing dung to get into it. This can be prevented by clear methods. We have daily instances of milk which does not contain any. There is no way in which B. coli can get into milk before it leaves the cow. Streptococci are injurious to the human

Bowman's

Bowman's Repudiate The Scarcity Of Fashionable Velour Hats

Many! More! Still more! And now quite the choicest assortment you'll meet with.

Fine quality and lustrous; soft and silky. A number of different shapes vary in brim and crown—the latter may be telescoped, creased or dented, and worn other ways if you choose.

Autumn shades:

Purple Wine Fuchsia Mole Gold
Brown Navy Green
Black Rose Copen

These hats are identical with the latest velours now being shown on Fifth Avenue and worn by women of discriminating taste. They are a favorite of fashion, and part of the correct apparel for Autumn.

Bowman's price is low—

QUARANTINE IS RAISED ON STATE

Most Effective Ever Devised For Protection of People of Any Commonwealth

What is considered the most effective quarantine ever instituted by any State was raised last night by the Health authorities. It had been in force for the past six months to prevent the entrance of foreign children under sixteen years of age from other States without certificates of freedom from infantile paralysis, under the direction of Dr. Samuel Dixon, Commissioner of Health.

THE FORMULA FAILED

Willie had disobeyed again and his mother had sent for a switch, declaring that she meant to "wear him out."

"Now, Willie," she demanded solemnly, "do you know what I am going to do with this switch?"

"Yes'm," he answered promptly, "you're going to shake it at me and say, 'Willie, Parsons, if you ever do that again I'll switch you good!'"

But she didn't.—The Christian Herald.

Why Coal Prices Advanced

Three new things enter prominently into the present cost of coal.

One is the increased cost of wages granted the miners.

The second is the cost occasioned by the recent enactment of the Workmen's Compensation Act.

The third is the increased cost of material used in mining coal, this being largely due to the war.

The advance given the miners amounts on the average, to about 21 cents per ton on domestic sizes.

It is estimated that the Workmen's Compensation Act and the increased cost of material further adds about 13c per ton to the cost of production.

Delivery expenses are higher than ever before. The teamsters get almost twice as much as they paid them 15 years ago. Horses cost nearly 100 per cent. more and the cost of material further adds about 13c per ton to the cost of production.

A COMPARISON

"I'm Full of Pep Now"

Charlie Ziegler Says That Tanlac Relieved Him of Kidney Trouble, Nervousness and Headaches. "Great Stuff!" He Says

"I feel as if I could get out and ram one right over the fence with all the bases full," says Charlie Ziegler, popular conductor, who lives at 426 17th St., Harrisburg.

"Tanlac is sure great stuff great stuff for it fixed me up in two shakes like the last rose of summer, too. I have had a lot of trouble with my kidneys during the last few years. In fact, I was in pretty bad shape all over. I was subject to bilious headaches that almost put me down and I had a burning sensation over my heart that would sometimes read into my sides.

"I was chronically constipated so that I had to take a cathartic every eight or ten days. I was constantly sick with gas and it made me night uncomfortable all the time. I was nervous as a cat and didn't have much appetite or ambition.

"I had tried various remedies before I began on Tanlac but I can't say that they did me any particular good but Tanlac acted like magic. I could hardly realize how quickly it got me right and how it got rid of my gas instantly, my headaches completely disappeared, that burning over my heart was quenched and my kidneys began to come back to normal.

"Now I am full of pep and feel better than I have for years. I sleep like a top, I have a fine appetite and no longer have to take cathartics. I feel alive and glad of it.

"Tanlac, the famous reconstructive tonic of which Conductor Ziegler speaks so enthusiastically is now being specially introduced in Harrisburg at the Famous Drug Store, 18 North Third Street, where the Tanlac man is always ready to explain the benefits to be derived from the use of the master medicine. Tanlac is for sale also at the Famous Drug Store in the P. R. R. Station.—adv.

GREAT STEEL KING IS HERE TODAY

(Continued from First Page)

of the Carnegie Steel Company. In fifteen years he had risen from a dollar-a-day stake driver to head of the most powerful manufacturing concern in America.

In 1901 the late J. Pierpont Morgan built around Mr. Schwab the United States Steel Corporation. When he resigned the presidency, two years later, people whispered, "Schwab is through."

As a matter of fact, he was just beginning.

It was not by his triumphs with Carnegie or the Steel Trust that Mr. Schwab will be measured. In the one case he was accompanied by a corps of able and experienced assistants; in the other he was given a powerful combination of mines, mills and capital. But for the performance of his greatest work he had only poor, battered Bethlehem—and Charles M. Schwab.

Story of Bethlehem

The story of Bethlehem is a commercial epic, an epic of labor, a drama of industrial imagination. The plant which Mr. Schwab took hold of in 1903 had been caught and crushed by a reaction of financial conditions had rusted away. Its machines had forgotten how to hum. It was said to be running behind more than a million dollars a year.

For the first time in his career, it seemed, Schwab had struck a real snag. Much of his fortune was invested in a company which financiers regarded as the burying ground of capital.

In this year of our Lord, 1916, Bethlehem is a world war in industry. The banks of the Lehigh are crowded with two miles with factories and machine shops. The plants cover 1,350 acres, and more land is being acquired constantly. The river's loud voice is lost in the whir of many wheels. And Charles M. Schwab, with 60,000 men working for him, is the largest individual employer in the world.

Bethlehem is the only ordnance manufacturer in America that makes complete, both plain steel and armor piercing, and ammunition in complete rounds. It is greater than Germany's Essen, and it has orders from its ledger to write Patriotism the great war let loose the company has been able to get, almost at its own price, more foreign ordnance orders than the plants could handle. Yet orders of the United States government were taken and filled as usual, without a cent being added to the former selling price.

During the recent session for a government-owned armor plant Mr. Schwab announced that he would allow the Federal government to buy the plant and the machinery at any price the commission might name.

That Old Button String

—the pride of a child who claimed the greatest number of buttons of different kinds and colors—was never more varied nor beautiful as a collection than our new Autumn assortments now complete.

Buttons for every purpose—coats, raincoats, dresses, suits, blouses and trimming purposes.

One line in particular, and most handsome, will be found only at Bowman's.

Prices range from—

20c to \$2.00 Dozen

Metal buttons including round gold and silver styles and filigree. Persian designs full of color. Parisian ivory buttons in an extensive variety of shapes; flat; concave; pyramid and novelties. Fancy bone buttons.

Beautiful colored buttons in two-tone effects. Solid ivory buttons in shaded colors. Engine turned designs. Glass buttons with painted designs. Jet

—and as many more different kinds.

BOWMAN'S—Main Floor

WEDDING AT DAUPHIN

Dauphin, Pa., Oct. 2.—A quiet wedding ceremony was performed on Thursday evening by Squire William Ege, when Miss Hattie Winn, of Hope, Pa., and William Hochlander, Jr., of Zionville, were married.

The interest, the devotion of his wife had much to do with Schwab's rapid rise. Thirty years of success have served only to ripen that devotion, and when the steel master speaks of Mrs. Schwab to-day his voice softens and his eyes shine with a light that it is good to see. For his wife is the same inspiration to him now that she was in the early days.

Men who worked with Schwab in those days tell how he was forever subordinating himself to his chief, giving the best of his mind and muscle, and leaving all the glory to the old steel master.

Firemen's Field Day Held at Lewistown on Saturday

Field Day was held here on Saturday when the volunteer firemen of Mifflin county held their fifth annual affair. At least 12,000 visitors were here and the town was decorated in national colors and all the industries of the county were closed down. At 10 o'clock the parade moved from Market street over the town.

Harrisburg Business College

A Reliable School, 31st Year

224 Market St. Harrisburg, Pa.

Long before REVRECO was offered to you we submitted it to hundreds of dentists, requesting that they put it to every test. Told them that they put it to an unusually good dentifrice, especially as to its cleansing qualities and its remedial action on sore throats, bleeding gums, in the treatment of Pyorrhea, etc. Submitted the formula and asked them their opinion. They tested Revreco from every angle; some going even so far as to make a chemical analysis—

And I'm my Vote YES

With practically no acid—adv.

"Seneco appeals to me more than any dentifrice I have ever seen." "I cannot say too much for Seneco. It's one of the best I have used." "I can recommend Seneco for the reason it makes the teeth glister and is free from the irritating qualities of many dentifrices." "I am indeed glad to get a tooth powder that does not irritate the gums and that formulating a dentifrice that is so good as Revreco." (Inclosure on file at our office.)

Seneco is a tooth powder that is so good that it is a real blessing to the teeth. It is a real blessing to the teeth. It is a real blessing to the teeth.

THE ORIGINAL MALTED MILK
