

Instant Hair Stain Better Than Slow "Restorers"

Some folks would have you believe that they have discovered some new and marvelous combination that will restore the color to gray, streaked or faded hair, without staining it. No such preparation has ever been discovered. There is only one preparation so far as we know that is entirely free from sulphur, lead, silver, mercury, zinc, aniline, coal tar products or their derivatives. That preparation is called "Brownatone." It is so easy and safe to apply that the wonder is that anyone ever uses anything else. "Brownatone" instantly tints the hair to any shade of brown (or black) that may be desired. If the gray shows on your temples or is streaking your hair—if the ends of your hair are lighter than the balance, or if for any reason you wish to stain all or part of your hair—use "Brownatone."

AN INTERESTING COAT

Ordinarily, there's not much interest attached to an old coat, but The New Store of Wm. Strouse is displaying an old coat about which there seems to be much current comment. The coat on display in the New Store's window belongs to James McCabe, 2124 Penn street. It was bought in October 1894 and was one of the first sales ever made by Mr. Strouse. The coat has been in active service every winter and, incidentally, was made by the same manufacturers as those supplying Mr. Strouse at the present time.

Small, who was beaten, shot and strangled to death at her home here on September 28, was begun in the district court here to-day. One of the chief witnesses for the prosecution was E. C. Conner, principal of the high school, who testified that the cord which strangled Mrs. Small resembled closely a cord which the husband used to manipulate the lever on his motorboat. This cord, the witness said, had been removed recently from the boat.
