BEGIN ON SALTS AT FIRST SIGN OF KIDNEY PAIN

We eat too much meat, which clogs kidneys, then the back hurts.

Says glass of Salts flushes Kidneys and ends Bladder irritation.

Uric acid in meat excites the kidneys, they become overworked; get sluggish, ache, and feel like lumps of lead. The urine becomes cloudy; the bladder is irritated, and you may be obliged to urinate two or three times during the night. When the kidneys clog you must help them flush off the body's urinous waste or you'll be a real sick person shortly. At first you feel a dull misery in the kidney region, you suffer from back-ache, sick headache, dizziness, stomach gets sour, tongue coated and you feel rheumatic twinges when the weather is bad.

Eat less meat, drink lots of water; also get from any pharmacist four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean clogged kidneys and stimulate them to normal activity, also to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active. Druggists here say they sell lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

Sudden Drop in Temperature

It is a scientific fact that rapid freezing and thawing in this changeable climate causes food to rapidly deteriorate.

The cost of perishable goods you will lose by doing without ice will amount to much more than the cost of the ice.

If a bottle of milk is thrown away the loss on a single bottle would have paid for ice to keep it, besides keeping your other food sweet and clean all day.

If baby is made ill the doctor's bill may amount to as much as a year's ice bill.

Food should never be placed out of doors where it is exposed to the action of germs, which may cause serious illness.
