NEWS OF STEELTON

There is a Real Difference

Cream of tartar, derived from grapes, is used in Royal Baking Powder because it is the best and most healthful ingredient known for the purpose.

Phosphate and alum, which are derived from mineral sources, are used in some baking powders, instead of cream of tartar, because they are cheaper.

If you have been induced to use baking powders made from alum or phosphate, use Royal Baking Powder instead. You will be pleased with the results and the difference in the quality of the food.

Gave Him Lots of Pep

"I felt all tired out," says William
Hannum, a munition maker, who lives
at Steelton, Pa. "I have been working
pretty hard lately and I guess the
nervous strain together with the boiting of my food sort of put me on the
burn.

"I know my stomach was on the
fritz and I couldn't eat anything without feeling as if I had swallowed a
top balloon and about a pound and a
half of fine hot lead.

"I's and nervous as if something
was due to happan any minute and I
was constipated, too. I was falling of
in weight, lost 14 pounds in a short
ime.

"I'm not much for medicines, but I
felt so mean that I naturally read
about Tanlac, and when I saw that it
had helped a fellow I knew I went anaked him about it. He told me it was
and got me some.
