

"The Big Friendly Store"

Open Saturdays Till 10 P. M.

The Effect of Good Clothes

In a recent talk to his employes, one of the greatest business men said:

"Provide yourself with a smile and an air of prosperity. Wear your best business suit and a cheerful necktie. If you have no best suit—buy one. We have to appear prosperous if we are to be prosperous."

Had this conversation taken place in Harrisburg the conclusion would have been that that big business man would have advised his employes to come to THE GLOBE. And he would also have added "Buy one of those stylish belted Overcoats, too.

They are all here in the greatest variety we've ever shown.

\$15 to \$35

MACKINAWs — BEAUTIES, AT \$6.50 to \$10

We show these popular Coats in an exceptionally large variety of bright and subdued plaids suggestive of the Michigan Woods—Belted—Norfolk and the new Skater models.

STILTING Is the Sport for Youngsters

But he'll enjoy the sport much better if he's togged out in a

The Globe "Dubbel-Hedder" Two-pants Suit at \$5.00

Featuring the "Camp Curtain" model in a nobby Scotch Homespun. We say they're the best Suits in the city, so will you when you see these.

Eton Norfolk Suits for the Little Fellows, \$3.50 to \$7.50

Right-Posture Health Suits, \$6.50 to \$15
The smartest Suits made for boys—sold exclusively by THE GLOBE.

Introducing "The Shackleton" Mackinaws at \$5.00

The popular cold weather Coats for boys of all ages—large showing of striking two-tone plaid effects.

The Weather Says, "Put on Gloves"

Choose them here, men, from a big city stock—Gloves of every description—Gray Mochas and Buckskins with black stitching—shown in the newest shades, sand and putty—also Rip Proof Gloves; a new pair for every pair that rips. Also Auto Gloves \$1.00 to \$5.00

We are Headquarters for Sweaters

Every season our Sweater business grows greater—the reason is we give the QUALITY. Shawl collars—V Necks—and "pull-over" styles, in all the newest weaves and colorings, \$3.50 to \$12 including rich Scotch mixtures

For Comfort Wear Peerless Union Suits

The Union Suits that leave nothing to be desired in underwear comfort and satisfaction—Egyptian Ribbed and "pull-over" styles—Worsted—regulars and stouts. \$1 to \$3.50

Globe Hats are Exclusive Styles

And the men who wear GLOBE HATS "stand out" because of the smart, trim features not to be found in any other hats, at \$2.00 to \$3.50

THE GLOBE

CLAIMANTS MUST PROVE STATEMENT

Man Directed to Have Examination Made by Representative of the State

Notice that the State Compensation Board will require claimants for compensation to prove that disability complained of exists in an opinion rendered by Commissioner John A. Scott to-day. A claimant against a Philadelphia glue manufacturing firm contended that the loss of thumb and index finger of his left hand was equal to the loss of his hand, but the decision says that the commission is of the opinion that the claimant has not suffered the loss of use of his hand and will have use of other fingers. The claimant is awarded 50 per cent. of wages for a certain period.

The opinion then says: "It is suggested by the board that the claimant make an honest effort to use the injured hand in such work as may be possible for him to perform; refusing to make this effort, on application by his employer, he will be subject to medical examination to determine whether practical use of the three fingers has been regained."

Next Day Depositions—Money received at suboffices of trust companies must be placed in the main office of the company before midnight each night, according to an opinion given to Banking Commissioner Smith by Deputy Attorney General Horace W. Davis. "Neither expediency nor inconvenience can justify a departure from these restrictions," says the opinion, "and unless they are adhered to such trust companies are doing business in a manner unauthorized and unwarranted by law and which interferes with a proper and careful examination by our department."

Cannot Serve Current.—The Lehigh Navigation Electric Company, ordered to stop supplying electricity to a hosiery mill in the borough of Nazareth by Public Service Commissioner Ryan in a decision handed down to-day in a complaint filed by the Pennsylvania Utilities Company against that company. It is found that the Lehigh company crossed the lines of the Pennsylvania without having secured permission.

Commissioner Adjourns.—The Public Service Commission adjourned to-day after spending three days in executive session on cases submitted this summer. A number of decisions are to be given next week.

Engineers Tour.—Engineers of the State Highway Department spent last night at Johnstown after having toured a number of the State highways, including portions of the William Penn. The engineers go over Maryland roads to-day.

To Take Flat.—Attorney General Brown and four of his deputies will establish themselves in apartments at 208 Pine streets. Mr. Brown has made his residence in the Chamber of Commerce here. The apartment will be known on the Hill as "The Law Apartments."

Few Cases.—Reports of infantile paralysis made to last night included eight from Philadelphia and one from Shamokin with two from rural Chester county.

Notice of Bonds.—The Litz, Mannheim and Ephrata Gas Company, of Litz, has filed a certificate of notification of issue of \$80,000 bonds with the Public Service commission.

CABARET COMMITTEE WORKING ON PLANS
The Harrisburg Chamber of Commerce committee which planned a street cabaret that was to be a part of the Fall opening and had to be postponed until Tuesday, October 31, met in the rooms of the Chamber of Commerce at 4 o'clock this afternoon to plan details of the postponed event.

Following is a list of the members of the committee: F. H. Bailey, chairman, L. Frank Bass, George L. Bricker, Arthur E. Brown, George Bogar, A. E. Buchanan, L. L. Ferree, Henderson Gilbert, E. Z. Gross, Fred B. Harry, C. Floyd Hopkins, John C. Herman, E. Stackpole, Jr., John F. Sweeney, Brook Trout and Flavell L. Wright.

JACOB S. SNYDER DIES
Millersburg, Pa., Oct. 20.—Jacob S. Snyder, aged 76 years, a veteran of the Civil War, died yesterday. He is survived by one son, John, of Harrisburg, and a daughter, Miss Kate Snyder, at home. The funeral will take place from his home, in Moore street, Sunday morning at 10 o'clock, in charge of his pastor, the Rev. Mr. Miller, of the Reformed Church. Burial at Killinger.

DIES AT WORMLEYSBURG
Mrs. George C. Berkeley died at the home of her son-in-law, Joseph Bryson, in Wormleysburg yesterday. Burial will be made to-morrow.

RED LIPS AND HEALTH
The first place that anemia, or thin blood, shows is in the lips and gums and the membranes that line the eye lids. You may be naturally pale and still be healthy but when these membranes lose their bright red color your blood is deficient in quantity or color.

Thin blood is a danger. It invites disease. The organisms of the blood fight off disease germs. Thin blood means less power to do this. For instance, when you cut yourself it does not heal so quickly if your blood is thin and weak.

To build up the blood there is one remedy that has been a household word for a generation, Dr. Williams' Pink Pills for Pale People. They tone up the entire system, make the blood rich and red, strengthen the nerves, increase the appetite, put color in the cheeks and lips and drive away that unnatural tired feeling. Plenty of sunlight, good wholesome food and fresh air will do the rest.

Two books, "Building Up the Blood" and "What to Eat and How to Eat" give just the information that every mother of a growing girl needs. They are free. Write for them today to the Dr. Williams Medicine Co., Schenectady, N. Y. Your own druggist sells Dr. Williams' Pink Pills.

A plate without a roof, which does not interfere with taste or speech.

\$5 ROOFLESS PLATE
Crowns and bridge work. \$5.00 up. Plates repaired while you wait. Come in the morning, have your teeth made the same day.

MACK'S DENTAL OFFICES, 210 MARKET STREET, Open Evenings

"The Money Back Jewelry Store"

A Magnificent Display That Every One Should See

New diamonds — mounted and unmounted — worth thousands of dollars — have just been added to our large collection of these precious stones.

And it doesn't make any difference what your price limit, maybe between \$5 and \$500, you're certain to find a stone to fit your fancy and your figure.

We urge everyone to see these new arrivals even though an immediate purchase may not be contemplated.

Even though you may not wish to buy, we'll take genuine pleasure in showing them to you—we feel that it's worth something to us to demonstrate to you our "Diamond Supremacy."

It's a display no lover of diamonds should miss.

Every stone will be sold strictly on its merits—represented to be just what it is—and backed by our unrestricted money-back guarantee.

AUTO HITS FARM WAGON

A small car crashed into the rear of a farm wagon near Riverside last night. The driver was thrown out and injured, and the wagon was badly damaged. No names were obtainable.

MINISTERS CONFER

Berlin, Oct. 20.—via London.—The Austro-Hungarian minister of foreign affairs, Baron Burian Jajeczek, to-day conferred with Dr. Von Bethman-Hollweg, the German imperial chancellor, at the German great army headquarters.

TO TREAT SEWAGE VIA-LIME BARREL

(Continued from First Page)

The State are of the same type which did splendid service, according to Mr. Emerson, in Danville, Kittanning, Norristown and other places where they had raged virulently enough to require the State's attention. As explained by Mr. Emerson, the type of construction and the method of operation are simple. A large barrel is required. In one hypochlorite of lime is mixed and this solution is drained into another barrel. To the latter receptacle a spigot is attached and from this the solution drips night and day into the flowing sewage. The "plants" will be erected on a small platform over a manhole a short distance above the mouth of the interceptors. At the front street and Iron alley point a man will have to be stationed at all times to keep the barrels filled and to regulate the flow of

disinfectant. At the Spring creek and lower Paxton creek sewers a man need not be on the job except in day time, as the flow can be set in the evening to drip throughout the night. Small sheds or shelters to guard the "plants" from the elements will be necessary. In the course of the discussion Chief Engineer Emerson handed the city some verbal bouquets for the steps it already had taken toward ultimately solving the sewage problem. Incidentally, Mr. Lynch and Mr. Emerson lightly sparred over the recent controversy between the State and city on the sewage disposal question. Both smilingly did a little poking with their "lefts" as they shook hands with their rights, figuratively speaking. It was all on the question of whether or not the city had really and fully complied with the State's order of July 25, 1911. Mr. Emerson pointed out that the requirements of the order had never been entirely carried out; Mr. Lynch with equal good humor replied that the State had never

answered the city's request for a conference on the subject. **Some Far Day** "Someday," said Chief Engineer Emerson, "we hope that typhoid will disappear entirely, but this must come about by a gradual solution of the sewage problem along lines which Harrisburg has already taken." "We want to do all we can," returned Mr. Lynch, "and we want to do it in an intelligent way. We think we've done a great deal; we've spent a great deal of money in constructing our interceptors, in clearing Paxton creek, Harrisburg, to our mind, has done as much as any other city, and more, perhaps, than most of them." **Flowers for Harrisburg** "You've certainly made a mighty good start," was Mr. Emerson's enthusiastic reply. "You've collected all your sewage into one big volume—and unloaded it on the other fellow 'down'." Now the State would like you to finish the job. You don't face the same problem in the same

way as the cities farther up stream. In the waters of that section the acid from the mines has some value. What you have done are proper steps in the right direction, however. Construction of the interceptors are necessary in the big scheme." The State Health Department's requirements were set forth in a letter to City Commissioner W. H. Lynch, superintendent of public improvements. The letter follows: "The disinfection apparatus which the State has required for immediate installation at the various intercepting and outfall sewers is necessarily of a simple type and suitable for use only in an emergency to help protect our neighbors down stream. The permit of July 25, 1911, contemplated the installation of a more permanent equipment which would more nearly develop the full germicidal value of the chemical. The State recognized that the preliminary steps to the construction of the permanent sewage treatment plant on the island would continue considerable time in the preparation of plans, providing for bond issue, securing of property rights, etc., and in the meantime some temporary device was considered necessary. "The city has postponed the installation of the more permanent type of disinfection apparatus, so that now it is necessary that funds be provided immediately for the installation and equipment of these simple plants to be operated until a better type can be installed. "A simple apparatus should be located near the lower ends of the intercepting sewers so as to treat continuously the sewage emptied into the sewer. As the discharge pipe leading from the intercepting manholes at Iron alley is rather short, sufficient contact between the chemical solution and the sewage would not be secured if the apparatus should be located at this manhole. It is therefore necessary to construct several plants and locate one farther up each intercepting sewer near the junction with the first branch sewer. "Hypochlorite of lime is the chemical usually employed for this work and the apparatus is constructed of barrels or wooden tanks. Duplicate tanks must be provided at each installation so that the solution can be mixed in one tank while the other is discharging. It is also necessary to provide a shelter over the equipment in order to prevent freezing in winter. "The amount of chemical must be proportioned against the organic content of the sewage to secure the best result. Ordinarily it takes about 150 pounds of hypochlorite of lime to the million gallons of raw sewage to secure proper disinfection. The exact amount, however, cannot be stated in advance, as it must be determined by bacteriological tests. "It will be necessary to provide for the operation of the apparatus day and night. In the case of the front street and Iron alley intercepting sewers, where the flow is large, it would undoubtedly be necessary to have an attendant on duty during the entire twenty-four hours. In the case of the lower Paxton and Spring creek interceptors, where the volume of sewage is not so great, it is possible that the attendant during the daytime would be sufficient. Knowing the approximate volume of sewage transported by the various intercepting sewers, you can from the above calculate the approximate daily cost of the operation. "I wish again to impress upon you the necessity for immediate action in this matter, and am willing to advise with the city regarding the designs of these simple apparatus, but the city must at once provide necessary funds for purchase of chemical and equipment and maintenance of the apparatus. Funds should also be provided for the employment of an engineer to design the more permanent type of disinfection apparatus, and when the plans are approved by the State construction should begin at once."
