FOODS THEY BUILD OR DESTROY AMAZING BUT RARELY SUSPECTED TRUTHS ABOUT THE THINGS YOU EAT

The Medical Milk Commission, whose Sleeping Sickness finally resulted in an exposure of the dangers of farcically certified milk, attempting to reassure its startled victims, succeeded only in emphasizing the worthlessness of its relations to public health—within a period of five days following the renewal of its certification, the United States Government found three additional groups of sixty-five tubercular cows in the herd which

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time In Many Instances

A Free Prescription You Can Have Filled and Use at Home Philadelphia, Pa. Do you wear glasses? Are you a victim of eye strain or other eye weakness? If so, you will be glad to know that according to Dr. Lewis there is real hope for you. Many whose eyes were failing say they have had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can now read fine print without glasses. It is believed that thousands who wear glasses can now discard them in a reasonable time and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many

It had again declared to be free and clear of tuberculosis.

In addition to the twenty-four condemned certified cows taken from the herd which is here employed as a horrible example of the meaningless-ness of those aristocratic notions which are thought by certain medical commissions sufficiently potent to convert 10-cent market milk into 15-cent certified milk, another group of twenty-four condemned cows was seized by the government on their way from the certified herd to the Brooklyn slaughter houses.

- CERTIFIED COW E1273 This cow had tuberculosis of the cervical glands, bronchial glands, mediastinal glands, both lungs, pleura, enteric glands, and liver. Its carcass was condemned to the fertilizer tank. One week prior to its slaughter like all the others, it was producing certified milk for infants and invalids.
CERTIFIED COW E1101 This cow had tuberculosis of the cervical glands, bronchial glands, mediastinal glands, both lungs and pleura. It was sent to the fertilizer tank.
CERTIFIED COW E1572 This cow had tuberculosis of the tongue, head, lungs, mediastinal glands and bronchial glands. The carcass was converted into the sterilizing tank to be converted into canned roast beef under the new government regulations that went into effect November 1, 1914.
CERTIFIED COW E1849 This cow had tuberculosis of the bronchial glands, abscess in the udder and tapeworm cyst in muscles of the jaw. The carcass was retained for twenty-one days and then released for food.
CERTIFIED COW E937 This cow had tuberculosis of the bronchial glands, mediastinal glands and tapeworm cyst in the muscles of the jaw. The carcass was retained

How to Easily Shed That Bad Complexion

We cannot restore degenerated facial tissue any more than we can restore a lost limb. It is useless to attempt to convert a worn-out complexion into a new one. The rational procedure is to remove the complexion instead—remove the devitalized cuticle. Not by surgical means, however, as the underlying cutis is too thin, too tender, to withstand immediate exposure. Applying ordinary mercurized wax will gradually absorb the offending cuticle. By degrees, a new, youthful skin appears; soft and delicately tinted as a rose petal. No lady need hesitate to try this. Procure an ounce of mercurized wax of the drugist. Spread on a thin layer before retiring, removing this in the morning with soap and water. In ten days to two weeks the complexion is completely transformed. An approved treatment for wrinkles is provided by dissolving an ounce of powdered saxolite in a half pint of witch hazel. Bathing the face in the solution brings prompt and remarkable results. —Popular Medicine—Advertisement.

twenty-one days and then released as food.

CERTIFIED COW E1233 This cow had tuberculosis of the bronchial glands, and mediastinal glands, and pre-cervical glands. One more lesion would have condemned it to the tank.

CERTIFIED COW E1358 This cow had tuberculosis of the bronchial glands and mediastinal glands. Three ounces of tubercular pus was found in these glands. The carcass was passed for food.
CERTIFIED COW E1433 This cow had tuberculosis of the bronchial glands, mediastinal glands, and lungs. Two ounces of tubercular pus was found in one of the lungs.
CERTIFIED COW NO. 2188 This cow had tuberculosis of the tongue, mediastinal glands, and lungs. The carcass was passed for food.
All the other cows, E1587, 2255, 2085, E-1670, E1425 E1790, E1622, 2379, E-1585, 2098, E1284, E1413, 2043, E1764, and E27 were found to be suffering from tuberculosis of the lungs, bronchial glands, mediastinal glands, mesenteric glands or portal glands. All of them with the exception of certified cow E27, in which tuberculosis found in only one gland, were found to have tuberculosis of two, three or four glands.

Following the publication of these facts Dr. S. S. Goldwater, commissioner of health of New York city, ordered an investigation into the quality of the milk produced by certified dairies supplying New York with such milk. The conditions exposed by Dr. Goldwater's probe suggested that the certified milk farce was not confined to any one locality or to any one medical milk commission, but was a widespread, and dangerous evil, of which the laity had never heard a hint. As the excitement connected with the affecting the New Jersey certified herd began to subside the Essex County Medical Milk Commission, over the signature of Dr. Henry L. Coit, issued a statement, October 24, 1914, from which the following is quoted: "The commission hereby states that the certified herd under its supervision is now as free and clear of disease as science and human endeavor can make it. Two days later, October 26, the government found thirty-four more tubercular cows in the herd, notwithstanding the new certification of October 24. Four days later, October 28, the government found another group of nineteen tubercular cows in the certified herd. Three days later, October 29, the government found another group of twelve tubercular cows in the certified herd. In its blind haste to reassure the patrons of the certified dairy operating under its auspices, the medical milk commission had plunged into another fatal error. With singular disregard for the facts the commission added the following whitewash to its statement: "In its investigation of the insinuations and charges made against the dairy company the commission has been unable to find any evidence which would justify accusations of dishonesty, incompetency or willful neglect. In the face of the above statement the government discovered that many of the certified dairy's cows, which the federal authorities condemned to the

The Small Sum of One Dollar A Week

Will Dress You Beautifully

If you walked along Broadway, New York, you would see the same smart styles as we display in our store in this city.

These beautiful creations are made by us in our own factory at 84-88 Fifth Avenue, New York—right in the very heart of the fashion center of the United States.

And coming to you from the maker direct, you save the wholesaler's profit. And furthermore, you pay only one dollar a week. Come and dress up in the very latest fashion—and pay the easy way.
